INDESIT company

Model type:
SD1721HA

Commercial code:
F048488

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

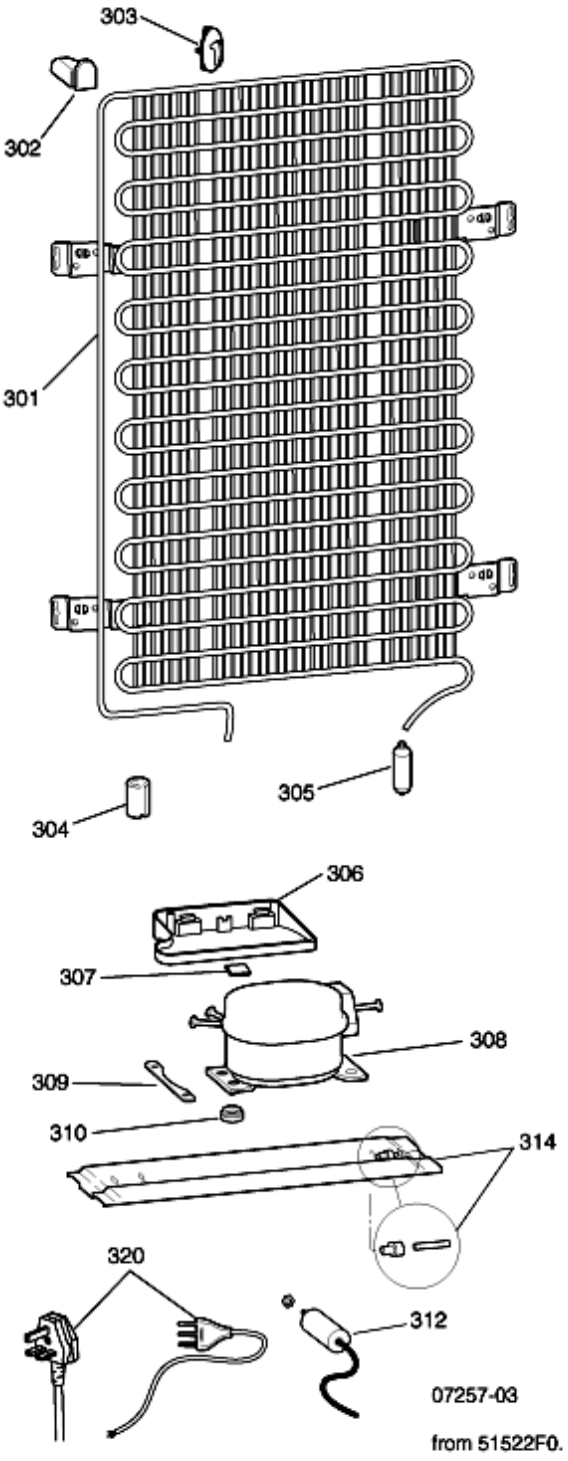

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

n2509g01: DOOR CHANGE

To Identify the correct parts refer to the Image in Partfinder and/or Service Net showing both the OLD & NEW Aesthetic Doors.
GRAB HANDLES -
MODELS with OLD Aesthetics - BEFORE SERIAL NUMBER COMMENCING 80712…. (12 July 2008) The grab handle used with this door has 2 screw fixings; 2 washers were introduced later (listed in the parts list). Where it is necessary to replace this type of grab handle, 2 screws and 2 washers should also be ordered and fitted. When stock of this Grab Handle becomes depleted a NEW Aesthetic DOOR & DOOR CONVERSION KIT will be required.
MODELS with OLD Aesthetics - AFTER SERIAL NUMBER COMMENCING 80713…. (13 July 2008) The grab handle used with this door has 3 screw fixings, compared to the original mentioned above, which has only 2. This handle is a seal break handle and is NOT inter-changeable with the previous handle or door
DOORS -
OLD Aesthetic DOORS are NO LONGER AVAILABLE for the above models. A NEW Aesthetic DOOR is available and is inter-changeable with the OLD Aesthetic MODELS mentioned above. Where there is a colour trim option to choose from, it will be shown in the description of the relevant door. NOTE: A DOOR COVERSION KIT C00273834 will be required if this door is to be fitted to an OLD Aesthetic model. The DOOR CONVERSION KIT consists of the following: 2x Hinge Pin Cover Grey (Argento), 2x Hinge Pin Cover Silver (Argento Vivo), 2x Hinge Pin Cover Stainless Steel (Inox), 1x Hinge Bush, 1x Cover Strip, 1x Grab Handle (3 Fix Grey & Silver), 3x Grab Handle screw, 3x Grab Handle washer, 1x Closure Aid (L/H), 1x Lower Hinge Pin, 1x Lower Hinge, 1x Upper Hinge screw, 1x Upper Hinge, 1x Lower Hinge Fixing Plate. The logo/badge is not included. Therefore, when requesting a replacement door for this appliance you should also request a new logo/badge.
3 fixing hole type GRAB HANDLE SHOULD NOT BE USED ON DOORS/MODELS PRODUCED BEFORE serial number 80712…., UNLESS IT HAS THE NEW Aesthetic DOOR ALREADY FITTED.
DISCLAIMER: The part supplied may differ from the original in colour, form or content, but is considered to be an acceptable interchangeable alternative. In accordance with its policy of progressive product design and environmental protection, Indesit Company reserves the right to alter specifications and use quality recycled components.

n2509h00: DOOR CHANGE -FRIDGES

To Identify the correct parts refer to the Image in Partfinder and/or Service Net showing both the OLD & NEW Aesthetic Doors.
The doors being supplied are of the new aesthetic type and may require a conversion kit.
The conversion kit is only required if you are changing from old aesthetic to new aesthetic doors. (This is not required for door reversal)

n2509h01: GRAB HANDLE CHANGES

To identify the correct parts refer to the relevant image against the parts list, showing both the OLD & NEW Aesthetic Doors.
OLD AESTHETIC DOORS:
. Fridge door will be flush with the height of the cabinet
. Hinge bush located close to the flat seal side of the door on both fridge and freezer doors header/handle
.LED lights may show through the upper fridge door trim
NEW AESTHETIC DOORS:
. Fridge door will protrude higher than the cabinet by approximately 100mm
. No LED lights on show through the upper fridge door trim (trim is now a solid block)
. Hinge bush located nearer the front side of the door on both fridge and freezer door header/handle
The grab handle used with the OLD Aesthetics door could have had either 2 screw fittings, or 3 screw fittings. The stock of the 2 screw fitting handles has depleted, the handles for models SD1721, SD1746, RL150P, RL175P, RLA175P, SD1521HA, SD1721HA, SD1721VHA are now available in a complete silver colour (Argento Vivo) rather than white with a silver bar. Or for other models it will therefore be necessary to use a NEW Aesthetic DOOR & DOOR CONVERSION KIT. (Please see notice against the doors) If the appliance has a 3 screw fitting handle then only the handle needs to be ordered.
OLD AESTHETICS DOORS and HANDLES once depleted in stock will be substituted to the NEW AESTHETIC TYPE
DISCLAIMER: The part supplied may differ from the original in colour, form or content, but is considered to be an acceptable interchangeable alternative. In accordance with its policy of progressive product design and environmental protection, Indesit Company reserves the right to alter specifications and use quality recycled components.

n3508a03: IDENTIFYING COMPS & SPECIFIC PARTS IN PARTS LIST

IDENTIFYING COMPRESSORS & SPECIFIC ASSOCIATED COMPONENTS IN A PARTS LIST

All compressor assemblies are supplied complete with the necessary associated electrical components and covers. But NOT capacitors and dissipators, as these are not always required with a replacement compressor.

All the associated electrical components and covers are BRAND specific and therefore not interchangeable across brands.

The most common descriptions for associated components are:
PTC, Start Device, Overload, Terminal Block, Cover/Lid or a derivation of these items listed, E.G. PTC start, PTC/Oload.

Compressor brands commonly used are:
Electrolux, ACC, Danfoss, Tecumseh, Aspera and Jiaxpera
Where possible part of the brand name has been added to the component description to help with identification.

Some models have more than one compressor listed in the parts list; either one is acceptable as a replacement.

Care needs to be taken when ordering any Associated components; these are brand specific, E.G. PTC Danfoss
