INDESIT company

Model type:
WITL125EU

Commercial code:
F034281

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

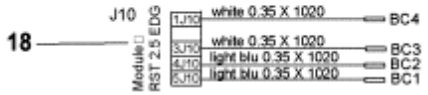

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

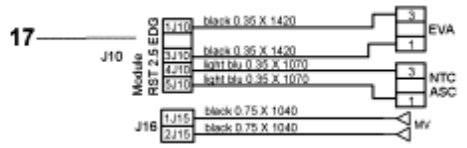

7.Technical documentation cover shows model name and its commercial codes

n1040245: Brembate washing machine basket doors re

For all washing machine models produced in the Brembate factory and relevant to this note, in replacing the loading mouth code 083895/112743/252375 proceed as follows:
-remove the 18 rivets (9 on the right, 9 on the left) hooking the two doors to the loading mouth on the machine;
-take replacement part 083895/112743/252375 and carry out the same operation described in the previous point;
-hook the two new doors and the new loading mouth on the basket of the machine using the nut and bolts kit code 080691 (formed of 18 screws + 18 washers + 18 nuts);
-use silicone (SAT code 081629) for hooking the loading mouth on the basket.

n1040340: TUB ASSEMBLY 111505 - 111573 (EVO II) ON EVOI TOP LOADING APPLIANCES

Given below are the instructions to install the new EVOII Top Loading tubs (codes 111505 and 111573) on EVOI Top Loading washing machines produced before serial no. 40628.0001 (see note n1040332).

Please note that:

the EVOI Top Loading range tubs (spare part codes 110152-110153) are no longer managed as spare parts and have been replaced as follows:

if you order code 110152 (EVOI T.L. 600-1000 RPM TUB) you will receive in its place:
- 111505: EVOII T.L. 600-1000 RPM TUB
- 111409: EVOII T.L. DRAIN PUMP

if you order code 110153 (EVOI T.L. 1200 RPM TUB) you will receive in its place:
- 111573: EVOII T.L. 1200 RPM TUB-BASKET ASSEMBLY
- 111409: EVOII T.L. DRAIN PUMP

Proceed as follows:

1) Replace the EVOI DRAIN PUMP with the new EVOII DRAIN PUMP - 111409;

2) Eliminate the DETERGENT RECOVERY TUBE (the new tub and new pump are not provided with the corresponding hole);

3) Do not remove the VENT TUBE that is on the appliance (the one on the new EVOII tub-basket assembly is no longer provided

with the vent on the rear panel).

Given below are the models affected:

n1040345: Replacement of drum lock button TL EVOII.

Tools and material needed: pliers, screwdriver, gauge, spring P/N Sat 114989, button P/N Sat 114990.

1) turn the central tip of the catch in the direction shown (FIG.1);

2) bring the tip to a vertical position and ensure that the broken button is disengaged from the catch restraint and can be removed (FIG.2);

3) remove the remaining part of the button with the aid of a screwdriver, taking care not to scratch the doors (FIG.3);

4) pre-assemble spring to button (FIG.4);

5) insert button between catch and door (FIG.5);

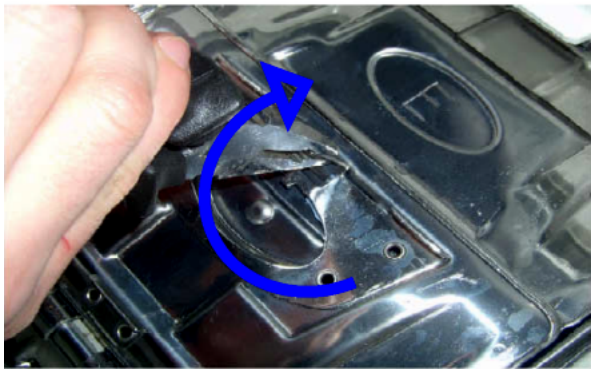

6) bring the button into position and arrange the spring in its location in the door (FIG.6);

7) turn the central tip of the catch in the direction shown to return it to its starting position (FIG.7);

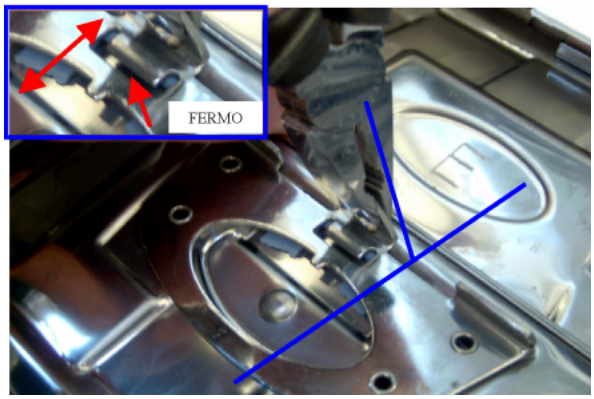

8) check the distance between button and catch (FIG.8);

9) check correct operation of the button when opening and closing the doors (slight inclination errors of the catch can result in faulty closing of the doors) (FIG.9).

N1040345fig9

From serial no. 50404.0001, the new "Polar White" colour is used on all washing machines produced in factory 91 in place of White 27.
The third last number of the Industrial Code given on the rating plate of the modified models is 9 (e.g. 91298310900).
To determine the new Polar White codes, it is necessary to know the industrial code or serial number of the appliance being repaired.
The new items, which bear the initials "PW" in place of "B27", are not aesthetically interchangeable with premodification items as the whites are different. Both colours will be available for some time.

n1040382: Drain pump with bayonet-style filter - top Loading Brembate

---

From serial no. 51021.0001 a new drain pump with bayonet-style filter has been installed on all top loading washing machines manufactured in Brembate.

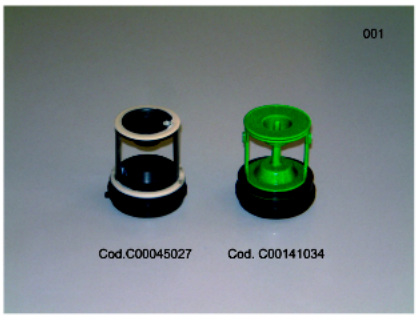

New parts:
C00141862 - Drain pump
C00141034 - Pump filter kit

Premodification parts:
C00111409 - Drain pump
C00045027 - Pump filter kit

The new parts can be used instead of premodification ones.

n1040414: New expander installed on Top Loading Brembate.

From serial no. 50213.0001 the new expander C00118593 has replaced the original part C00055037.
The new expander can also be used on premodification versions of the models referred to in this bulletin.

n4007c00: New pulley installed on top loading washing machines 1200RPM (NO tub lock)

From serial no. 70122.0001 the pulley track has been widened from 21.2mm to 24.2mm (see picture N1040404FIG1).

new pulley
C00142832 - D280 24.2 mm track

Premodification pulley
C00083912 - D280 21.2 mm track

The new pulley can also be used on premodification versions of the models referred to in this release.

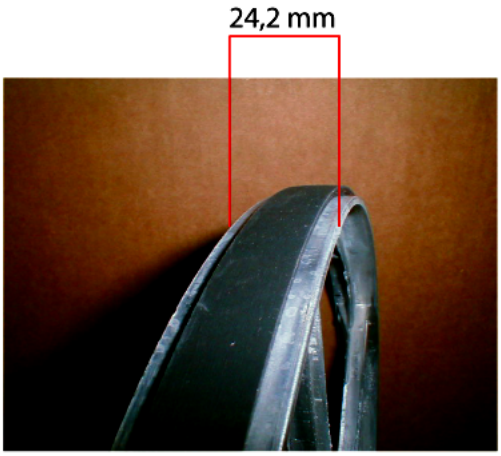

n4008c01: Smart Card - LVB/DRYERS

Beginning April 2008 spare parts warehouse started to manage the EVOII modules with eeprom fixed, these can only be programmed with smart card/palmare/pc.

Attention!! The premodification with eeprom socket can be programmed with smart card/palmare/pc using a blank eeprom or with pre programmed eeprom.

Spare parts of modules with eeprom fixed/eeprom socket:

N1040404FIG1

C00265676 with eeprom fixed - C00143068 with eeprom socket - for models with conducibility sensor

This notice has a "reference list" specific for each product where you can find the link between smart card and the eeprom code with the same software.

n4009a02: Motor fixing changed on Top Loading washing machines

---

Top Loading washing machines have changed the fix of motor to the tub.

The tub design is changed in the motor fixing side and two new screws code C00268497 are introduced instead of the old screws C00084333 and the old nut:

C00266015 nut of products with Triphase motor;

C00258673 nut of products with Collector motor.

Spare parts warehouse will go on to manage only the new tubs with the same spare part codes:

C00111505 - Tub 600/1000 rpm

C00111573 - Tub 1200 rpm

C00252343 - Tub 1400 rpm

In assistance on premodification products with the new tubs, you have to fix the motor using the new screws C00268497 instead of the screws and nut that you find in the product.

Dete of modify in production:

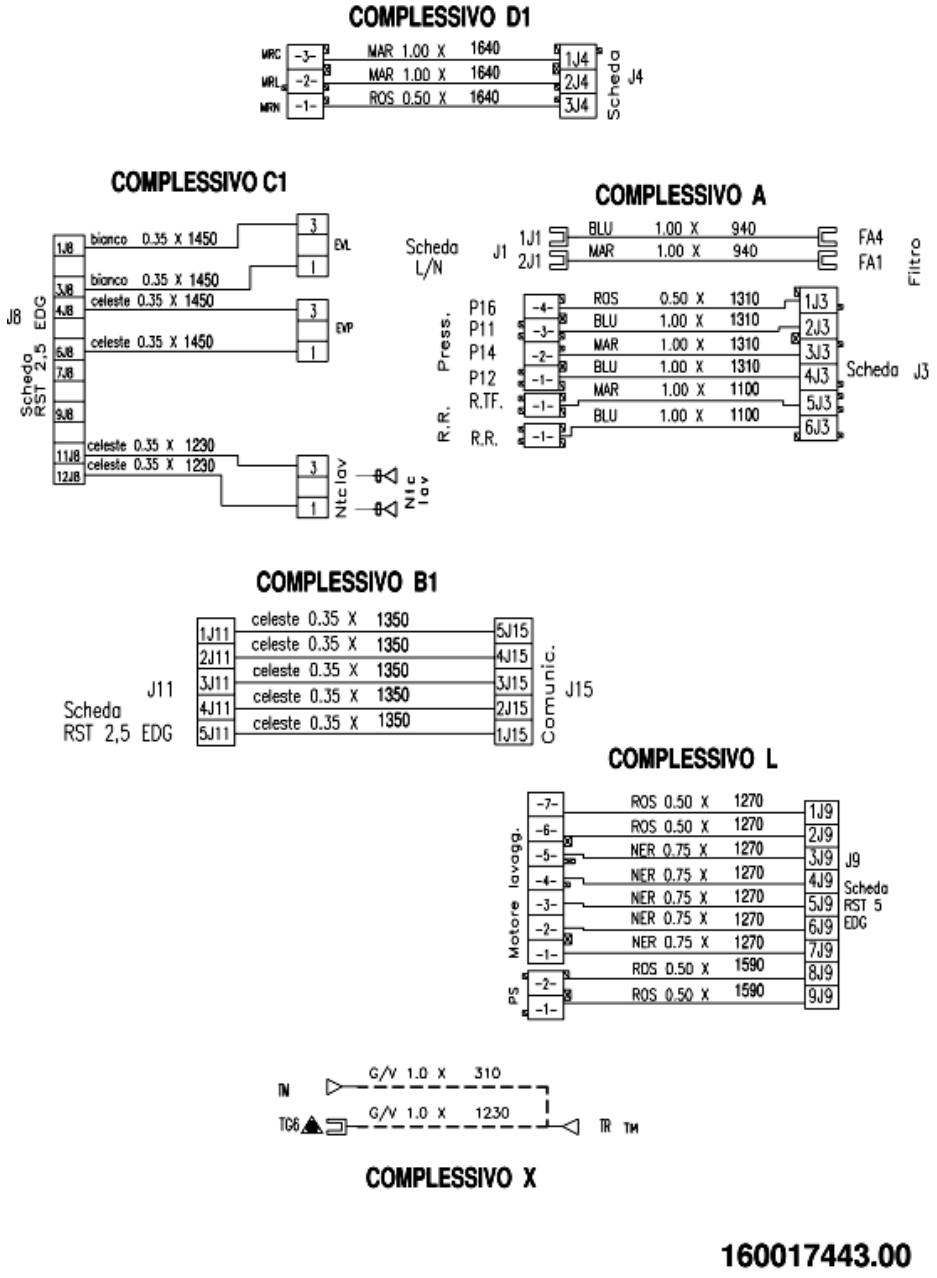

s/n 80818.0001 - all models 1400 rpm Collector and Triphase motor

s/n 80818.0001 - all models 600 – 800 – 1000 – 1200 rpm Triphase motor

s/n 90113.0001 - all models 600 – 800 – 1000 – 1200 rpm Collector motor
