INDESIT company

Model type:
G75CEX

Commercial code:
F029347

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

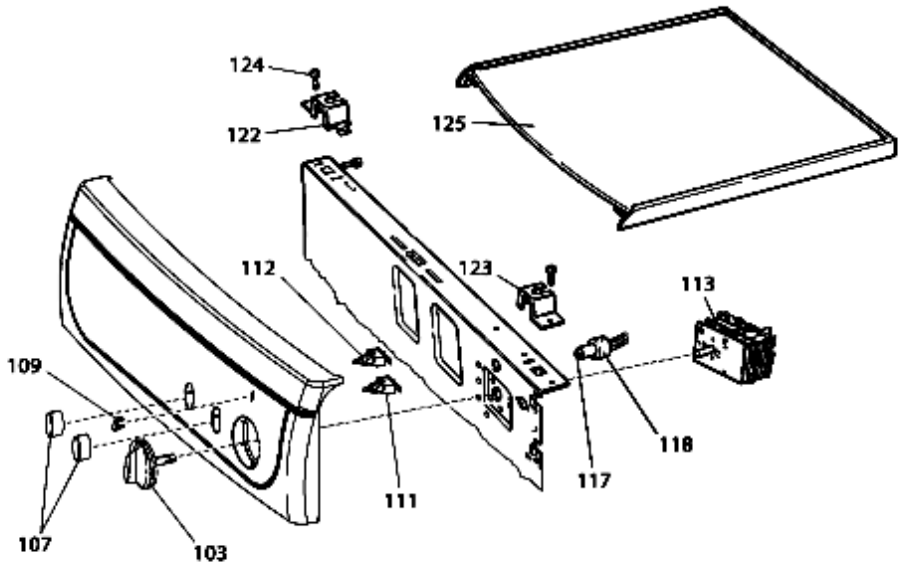

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

n1040337: Dryer column assembly kit

The purpose of this note is to indicate the spare part codes of the DRYER - WASHING MACHINE ASSEMBLY KITS, as only some INDESIT dryers (see list) can be installed on specific washing machine models of the INDESIT EVOI range (see lists). To order the correct kit, refer to the lists below.

INDESIT DRYERS THAT CAN BE INSTALLED IN COLUMN:
G73VUEX commercial code 29343
G73VUK commercial code 28679
G74CUK commercial code 28680
G74VEX commercial code 29344

n1040380: Modification of door hook and relative slot on dryers.

From serial no. 50701.0001 the door hook and slot have been modified on all dryers affected by this modification.

New parts:
C00119844 - door hook slot
C00119841 - door hook
C00141611 - door hook slot + door hook kit

Premodification parts:
C00095523 - door hook slot
C00095514 - door hook

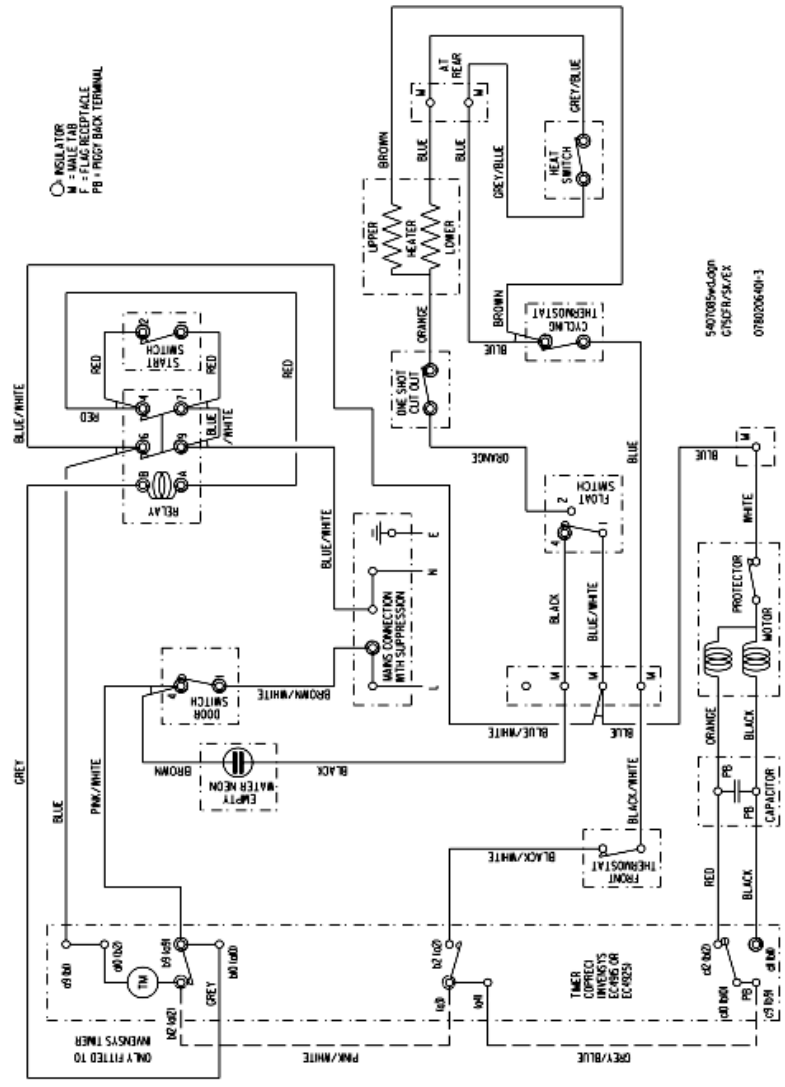

n4413a01: WATER CONTAINER NO LONGER AVAILABLE

THE WATER CONTAINER IS NO LONGER AVAILABLE.
THE VALVE AND ASSOCIATE SEALS ARE AVAILABLE.
