INDESIT company

Model type:
LL65IT

Commercial code:
F028903

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

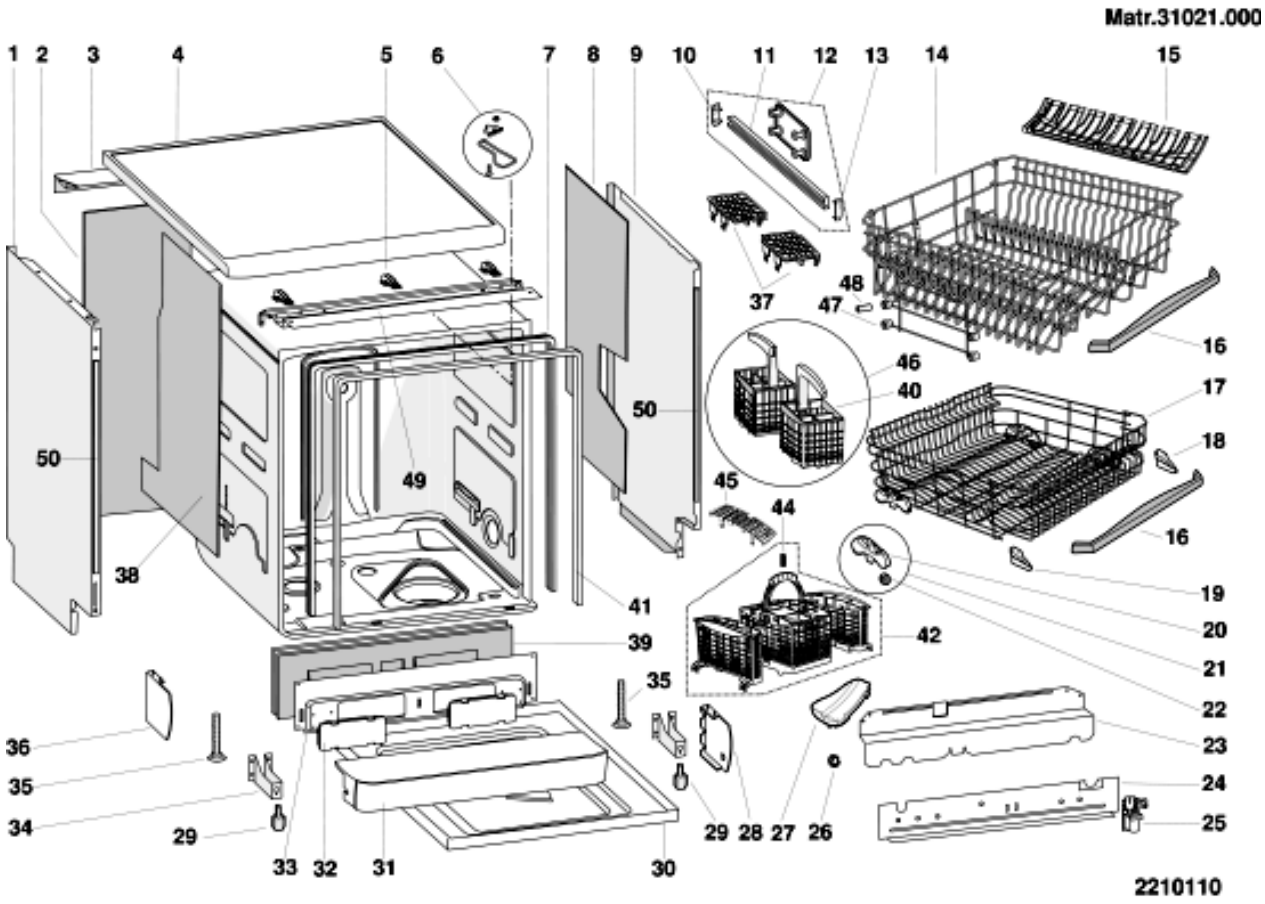

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

N1045072: Introduction of fixed rear foot H=31mm on free-standing models.

From serial no. 40218.0001, free-standing dishwashers affected by this modification have been equipped with new fixed rear feet (H=31mm).
The new foot replaces the adjustable one (H=155mm) Service code 092555; on the EVO3 range with TurboDry the new foot replaces the adjustable foot (H=95mm) Service code 094605.
The Spare Part Warehouse will continue to manage only 155mm and 95mm adjustable feet as they are interchangeable with the fixed 31mm foot.
The three feet are shown in illustration N1045072FIG1.

N1045072FIG1

n1045048: BIT 100 CARD INITIALIZATION

Free-standing dishwasher

1- Close the door and switch the dishwasher on.
2- Wait for the test cycle to start (2 LEDs light up or "ROD" appears on dishwashers with display).
3- Wait 10 seconds (dishwasher will start to fill water...)
N.B. If the cycle fails to start the card has probably already initialized, so proceed to point 5.
4- To reset the test cycle turn the programme button to reset or hold down the start/reset button for 5 seconds. (Wait for the buzzer to beep three times or if the dishwasher does not have a buzzer, wait for the programme LEDs to switch off.)
5- To check the aforementioned steps have completed successfully, select a programme and see if it starts; (reset it after this check).
6- The dishwasher is ready for the customer.

Built-in dishwashers

1- Close the door and switch the dishwasher on.
2- Wait for the test cycle to start
3- Wait 10 seconds (the dishwasher will start to fill...)
N.B. If the cycle fails to start the card has probably already initialized, so proceed to point 5.
4- To reset the cycle, open the door (2 LEDs lit up) and press the programme button for three bips of the buzzer (or until the programme LEDs go off for dishwashers with no buzzer).
5- To check the aforementioned steps have completed successfully, press the select programme button and check that the indicator light beside the corresponding programme comes on.
6- The dishwasher is ready for thecustomer.

n1045069: Modification of racks and dispenser lid on EVO3 dishwashers

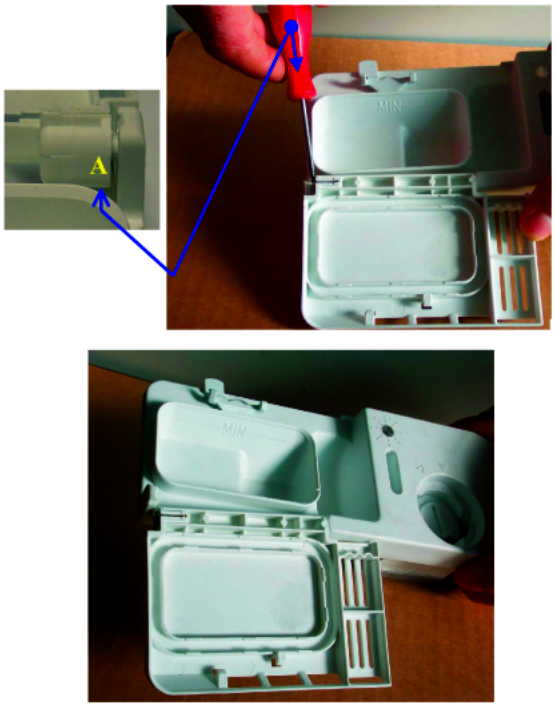

---

To obtain better dissolving of the detergent during the wash cycle, the following modifications have been made to EVO3 dishwashers:
- new dispenser lid, replacement code 098134 (see figure N1045069FIG4) created;
- upper racks modified with lid catch angle changed from 9° to 16° (see figure N1045069FIG5);
- MultiSystem lower racks modified with insertion of a spacer wire at the electric dispenser (see figure N1045069FIG6).

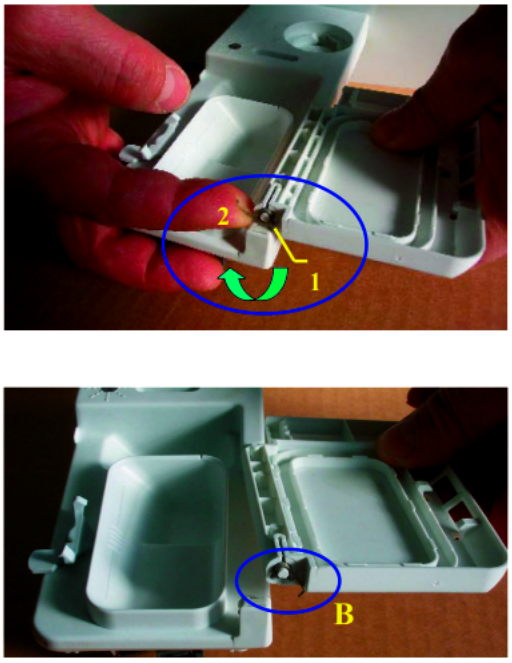

The upper and lower racks have the same spare part codes as the premodification items; Replacements Warehouse stocks have been replaced.

Lid installation instructions:
1) prise the lid out of the dispenser seat using a small screwdriver at point A (figure N1045069FIG1);
2) replace the lid, checking that release spring B (figure N1045069FIG2) is in place; before fitting the new lid load the spring from position 1 to position 2 (figure N1045069FIG2);
3) fit the lid in its special seat and check for correct operation (figure N1045069FIG3).
Lid closing may be harder for the first few cycles after replacement, due to settling of the material.

N1045069FIG1

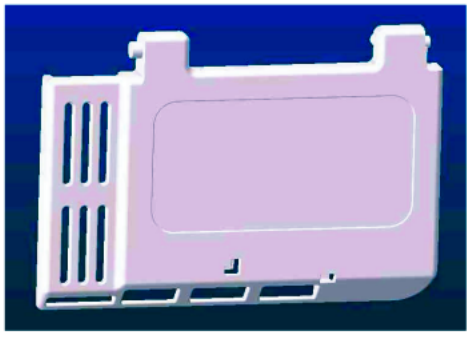

N1045069FIG2

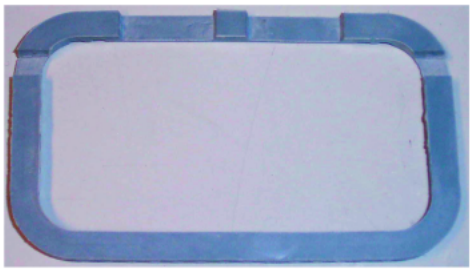

N1045069FIG3

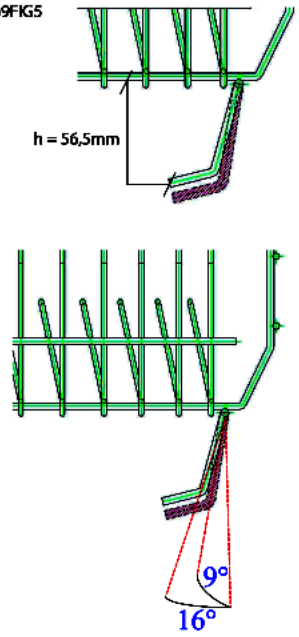

N1045069FIG4

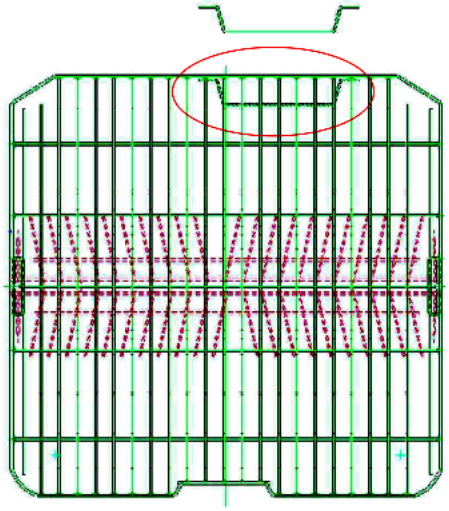

N1045069FIG5

N1045069FIG6

n1045070: Introduction of 1/2 load control with BIT 100 timer by means of solenoid valve.

EVO3 dishwasher models affected by this modification have been equipped with the new BIT 100 timer, in place of the alternating wash motor, that controls the 1/2 load system by means of a solenoid valve located on the volute of the electric pump.
Modified items:
- electric pump code 088896(W45V220P20) replaced with 077140(W75V220P24);
- electric pump code 088888(W45V240P20) replaced with 080512(W75V240P24);
- volute code 088889 replaced with 054979;

- BIT 100 timer code 094686 replaced with 097431;
- alternating wash motor code 077172 replaced with half load solenoid valve code 054985.

Given below are the models affected, with modification introduction serial no. and relevant new and premodification wiring/diagrams:

n1045075: Unification of Timer BIT 100 Service codes 097431 and 095281 with 097481.

BIT 100 "P2" TIMER (210097637.XX) Service code 097431 has been replaced with BIT 100 "E2" TIMER (210097877.02) Service code 097481.
BIT 100 "D" TIMER (210093806.XX) Service code 095281 has been replaced with BIT 100 "E2" TIMER (210097877.02) Service code 097481.

Replacement of Service codes 097431 and 095281 with 097481 is only possible with BIT 100 "E2" TIMER card code 210097877.02.

The card code is printed on an adhesive label located on the box or on the card itself (illustration N1045075FIG1).

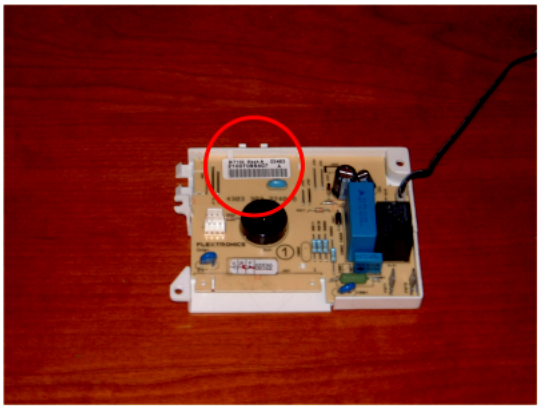

Possible 210097877.XX card spares with modification index below 02 cannot be used for replacing, but can be used on the relevant INDESIT models (giving the BIT 100 "E2" TIMER Service code 097481 in the spare part list) until stocks last.

Stocks of Service code 097481 in the Spare Part Warehouse have been replaced with card 210097877.02.

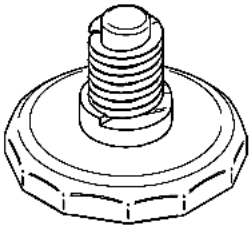

n1045080: Modification of front feet on free-standing DW.

From serial no. 40413.0001, free-standing dishwashers affected by this modification have been equipped with new front feet Service code 109991 in place of 056414.
The new foot is shown in fig. N1045080FIG1.

N1045075FIG1

N1045080FIG1

SAT CODE 109991

n1045082: Timer Bit 100 programmes for Evo3 60cm dishwashers

Table N1045082FIG1 shows information relevant to the programmes of the following Timer Bit 100 for Evo 3 60 cm

dishwashers:
Timer BIT 100 - E1 - Service code 097890 (rohs 143206);
Timer BIT 100 - E2 - Service code 097481 (rohs 143207);
Timer BIT 100 - E3 - Service code 099892 (rohs 143208);
Timer BIT 100 - S1 - Service code 109875 (rohs 143211).

PROGRAMMES:
1) Energico or Super Wash or Intensive
2) Normal or Daily
3) Eco (Ciclo per Istituti)
4) Rapido
5) Ammollo
6) Cristalli
7) Special Guest
8) Just you
9) Duo-Wash o Crystal and Pot

PROGRAMME PHASES:
A) Pre-wash
B) Pre-wash
C) Wash
D) Rinse
E) Rinse
F) Rinse
G) Drying

PROGRAMME MODIFICATIONS ARE INDICATED IN RED.

n1045083: Modification of filters on EVO3 60 cm dishwashers

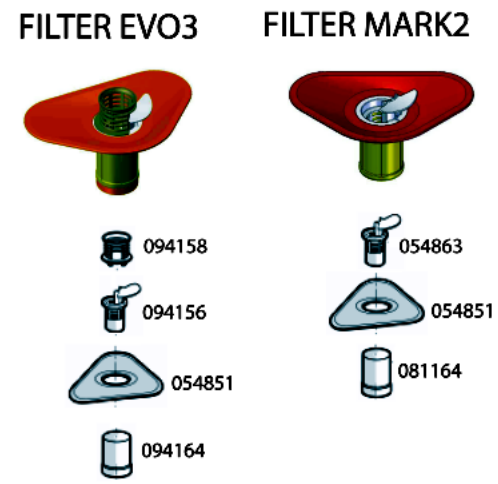

All dishwasher models affected by this modification have been equipped with the items listed below, in order to solve the drain pump clooging problem.

Introduction of:
Cylindrical plastic filter code 081164
Central filter code 054863

Elimination of:
Cylindrical plastic filter code 094164
Central filter code 094156
Central filter grid code 094158

The modification has been introduced progressively, starting from serial no. 40516.0001.

N1045083FIG1

n1045084: Elimination of duct fixing pin code 056342

Duct fixing pin code 056342 has been eliminated from all dishwashers affected by this note, modifying the connection between the feeder-distribution assembly and the internal duct.

Introduced items:
Internal duct 110527
Feeder-distribution assembly 110526

Eliminated items:
Internal duct 054926
Feeder-distribution assembly 094134 (EX 054871)
Duct fixing pin 056342

The modification has been introduced progressively, starting from serial no. 40517.0001.

n1045085: Introduction of new litre counter turbine integrated on air-break.

All dishwashers affected by this note have been equipped with a new litre counter turbine on the air-break.
Picture N1045085FIG1 illustrates the premodification structure, picture N1045085FIG2 the new structure.

Items affected by the modification.

AIR-BREAK:
new 110610;
premodification 094174;
the new item features a new integrated litre counter turbine and its water supply hose has a smaller diameter.

LITRE COUNTER TURBINE code 094172 has been eliminated.

SOLENOID VALVES:
new:
1-WAY code 110611;
2-WAY code 084558(Rohs 143737);
premodification:
1-WAY code 094227;
2-WAY code 094168;
the new solenoid valves have a smaller diameter drain hose fitting.

HOSES:
new solenoid valve hose/air-break code 110612;
premodification turbine hose/air-break code 094267;
premodification solenoid valve hose/air-break code 094267;
the new hose has a smaller internal diameter.

WIRING:
the litre counter turbine connecting cable is longer, but since the connector is the same, the new item can be used in place of the premodification one.

n1045093: Modification of light blue folding shelf attachment.

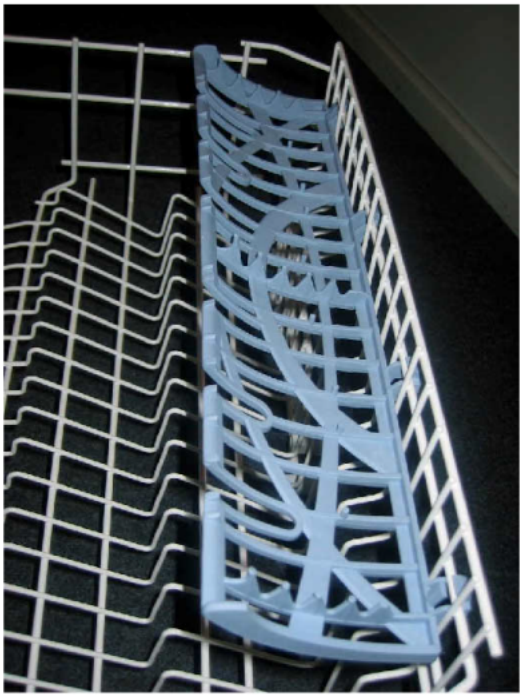

From serial no. 41109.0001 all models affected by this bulletin feature a modification of the folding shelf to upper basket coupling system.
This modification called for alteration of the relative baskets: the distance between the wire on which the folding shelf is attached and the wire below it has been increased from 9.5 mm to 17 mm, as shown in the attached image.
The altered folding shelves are not interchangeable and cannot be installed on premodification baskets: in the case of service interventions on product with serial number prior to 41109.0001 the entire upper basket must be replaced.
The baskets are reciprocally interchangeable and are managed as assemblies complete with their accessories, inclusive of folding shelves.

The replacement P/Ns affected by the modification are as follows:

UPPER BASKET LIGHT BLUE FOLDING SHELF
new 114799 - premodification 094140.

UPPER BASKET ASSEMBLIES
new 115001 - premodification 094139;
new 115002 - premodification 094222;
new 115003 - premodification 094233.

N1045093FIG1
NEW FLAP UPPER BASKET SAT CODE 114799

N1045093FIG2
OLD FLAP UPPER BASKET SAT CODE 094140

n1045127: New airbreak - solution of water spurts leaking from base LVS 60 CM

From serial number 50930.0001, to solve the problem of water spurts emitted from the lower right and left side of the door the following modifications were introduced in production:

1-Airbreak without insert to allow the necessary pressure venting
2-Honeycomb top panel to protect the kitchen unit from any steam emitted (only on built-under models)
3-Tank seal length increased by 3 cm to improve water tightness
4-Die-cut roof sound-deadening panel
5-Three clips for correct fixing of the tank base seal (in production from serial number 50701.0001)

New parts:
C00141308 - Airbreak
C00141310 - Honeycomb top panel (built-under versions only)
C00141317 - Tank seal
C00141314 - Roof sound-deadening panel
C00140679 - Tank base seal fixing clip

Premodification parts
C00110610 - Airbreak
C00116110 - Tank seal
C00097300 - Roof sound-deadening panel

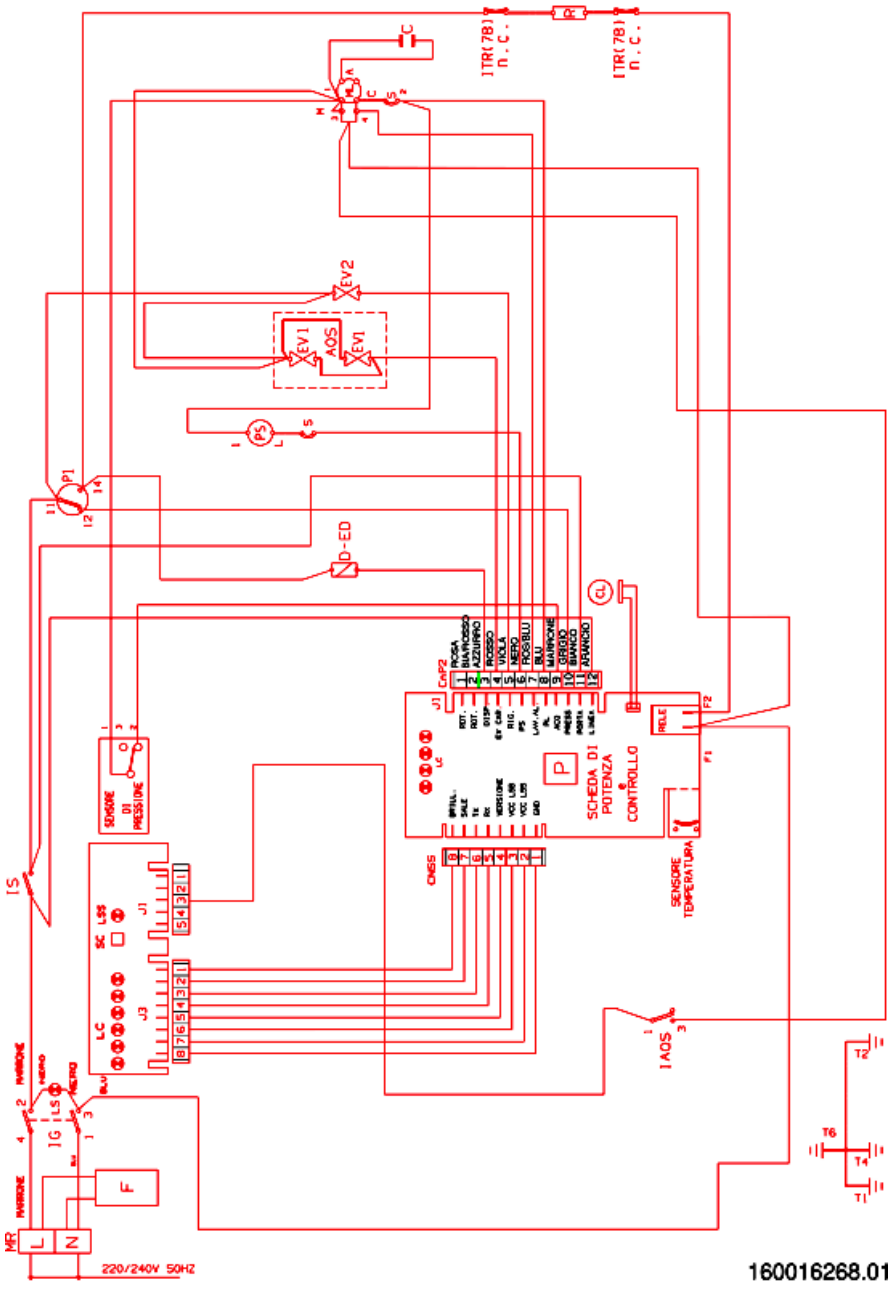

1) AIRBREAK REPLACEMENT
It is mandatory to use the new part; in the event of replacement with premodification appliances proceed as follows:
- replace the airbreak with the new part C00141308
- if present, refit the roof sound-deadening panel after cutting out a 10x10 cm square from the rear left-hand corner
- on the built-under version, fit honeycomb panel C00141310 on the top of the appliance
- replace tank seal with the new seal P/N C00141317

WARNING: when replacing an airbreak without a litre-counter turbine use exclusively the same type of part (P/N C00094174 - all the relevant details are given in bulletin n1045085)

2) CHANGING THE TANK SEAL
On appliances with serial number from 40101.0001 to 50930.0001, you can use the new tank seal P/N C00141317 after cutting 1.5 cm off each end.
