INDESIT company

Model type:

BA35FNFPS

BA35FNFS

Commercial code:

F032234

ARISTON INDESIT Scholtès

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

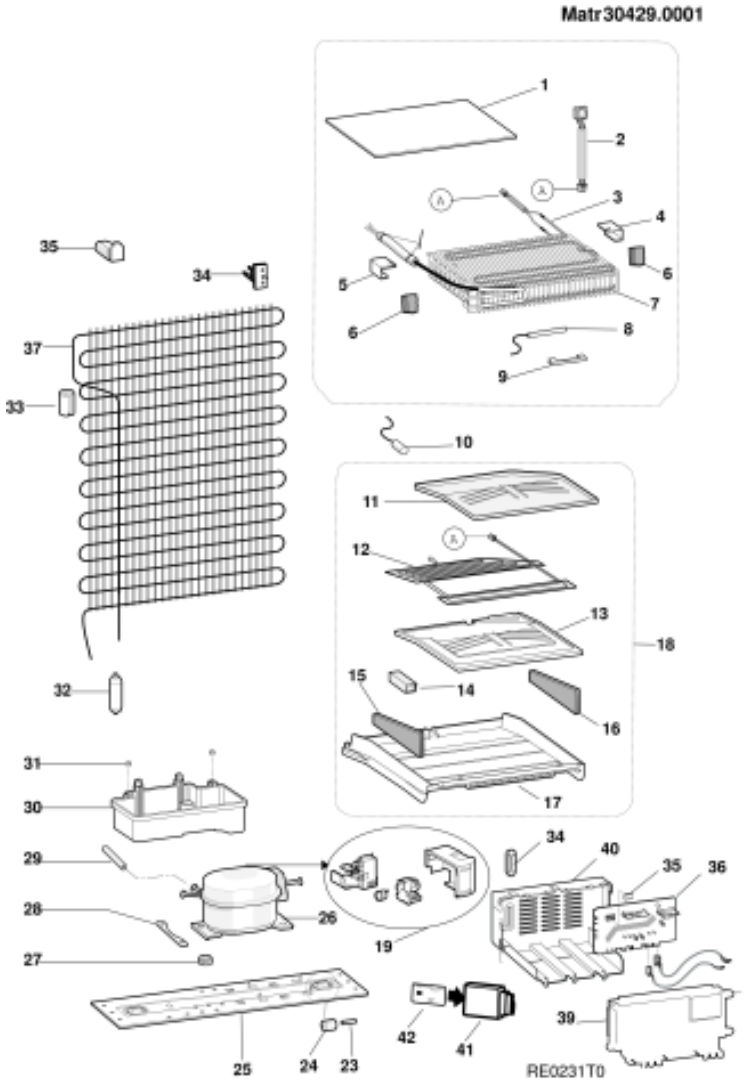

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

0999364: new fin evaporator and rezistance

Since 01/04/05 new fin evaporator end new rezistance will be used on EU combi models. New parts as an assembly can be used on the appliances which are produced before the modification.

New parts;
115198- fin evaporator
115199- new evaporator rezistance

To fit new evaporator follow below procedure;
· First of all fin evaporator should be positioned at right and back of the freezer roof and than right bracket should be screwed like previous manner (the same track of the hole for right bracket exists on the cabinet). Use the evaporator as a template to screw and position the left bracket symmetricaly.

0999368: color modification

Since April 2005, color of products has been changed from Bianco 27 to Polar White in Manisa Plant.

Industrial code has been changed but, commercial code remains the same as you can see in below example.

81272820201 = MTB4511TK (bianco-27)

81272820301 = MTB4511TK (polar white)

External colored parts

New spare part codes have been given for the below external parts.

Cabinet, cabinet head panel, door, door head panel, door gasket, kick plate.

The external parts colered bianco 27 are limited with our stock and in the future it will be substituded by polar white parts.

Internal colored parts

Spare part code remains the same for the internal parts such as crisper, shelf profile etc. They will be supplied in polar white color with the same spare part code.

0999376: ICE FORMATION AT THE BACK OF THE EVAPORATOR

Below modifications have been performed to prevent ice formation at the back of the evaporator on L70 combies. These new parts can be supplied as an assembly C00141277
1- Spugnetta evaporatore left and right have been modified since 12/08/2005. Spare part codes remain the same (C00094468-C00094467). These parts must be replaced together in case of necessity of the replacement.

2- Power of the rezistance for divisorio camere has been increased from 40W to 50W since 03/10/2005. Spare part code remains the same (C00095774).

3- Power of the rezistance for evaporator has been increased from 140W to 150W since 26/09/2005. Spare part code remains the same (C00115199).

4- Drain hose end piece C00141278 has been used for draining the water to the evaporating tray since 26/09/2005.

5- Fan motor plastic assembly has been modified. The hole for propeller has been modified to prevent friction between propeller and fan motor plastic since 03/10/05.
Spare part code remains the same (C00116498).

These new parts can be supplied as an assembly C00141277.(TB001014 - ex.TECHNICAL NEWS STN-CL 0511.1)

0999379: TWO HOLES HAVE BEEN CANCELLED ON MULTIFLOW FOR COMBIES

Due to low temperature at the lower part of the fridge section on Manisa combies two holes which are placed on multiflow cover have been cancelled for all combies since 13/04/2006.

n3010b02: PLAYZONE ELIMINATION

Playzone shelf has been eliminated in Manisa and Lodz production and replaced with a normal shelf already present in interested models.
These spare parts will not managed at the end of stock.

This modification changes also model name of the product without modification of industrial code, in following way:
