INDESIT company

Model type:
WIDXXL106EU

Commercial code:
F039998

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

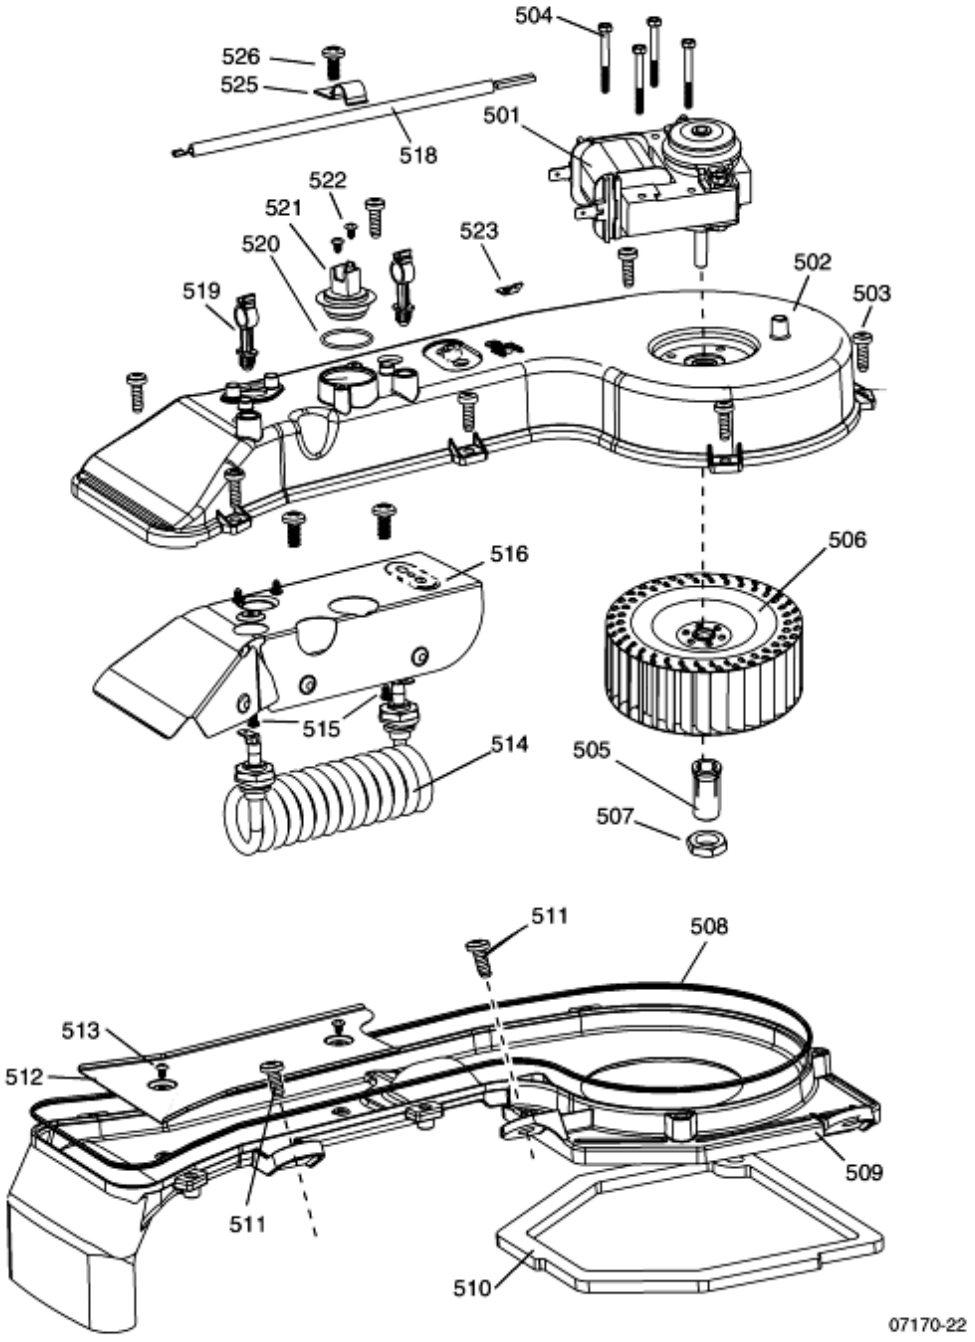

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

n4008c01: Smart Card - LVB/DRYERS

Beginning April 2008 spare parts warehouse started to manage the EVOII modules with eeprom fixed, these can only be programmed with smart card/palmare/pc.

Attention!! The premodification with eeprom socket can be programmed with smart card/palmare/pc using a blank eeprom or with pre programmed eeprom.

Spare parts of modules with eeprom fixed/eeprom socket:

C00265676 with eeprom fixed - C00143068 with eeprom socket - for models with conducibility sensor
C00254298 with eeprom fixed - C00143068 with eeprom socket - for models without conducibility sensor
C00254297 with eeprom fixed - C00259941 with eeprom socket
C00254531 with eeprom fixed - C00143058 with eeprom socket
C00254297 with eeprom fixed - C00143057 with eeprom socket - for models without blocking drum
C00265697 with eeprom fixed - C00143057 with eeprom socket - for models with blocking drum
C00254297 with eeprom fixed - C00143056 with eeprom socket
C00254530 with eeprom fixed - C00259738 with eeprom socket
C00254533 with eeprom fixed - C00143060 with eeprom socket
C00254535 with eeprom fixed - C00145013 with eeprom socket
C00254530 with eeprom fixed - C00145551 with eeprom socket
C00254529 with eeprom fixed - C00142293 with eeprom socket
C00257406 with eeprom fixed - C00143989 with eeprom socket
C00257409 with eeprom fixed - C00144151 with eeprom fixed
C00254530 with eeprom fixed - C00143069 with eeprom fixed

DRYERS
C00255835 with eeprom fixed - C00258789 with eeprom socket
C00255835 with eeprom fixed - C00194077 with eeprom socket

This notice has a "reference list" specific for each product where you can find the link between smart card and the eeprom code with the same software.

n4010c00: Tacho Kit

The tacho kit includes both tacho generator and the fixing disc

n4208h00: Module Wiring change

Module Wiring Change

On Kinmel Park manufactured washer dryers (factory code 94) produced from serial number 61101.0001 the module connection J10 to the dryer heater box changed from a single connection to a double connection identified by reference J13 & J14.

When fitting this module to a product produced before serial number 61101.0001 it will be necessary convert the J10 connection to J13 & J14 by fitting harness part codes C00142746 & C00142747. The module programme and function is not affected.

n0508c01: Door Gasket Clamp Band

A New Polypropylene Gasket clamp band has been introduced in production from Serial number 80325.0000
The purpose is to provide added support to the inner rim of the door gasket.

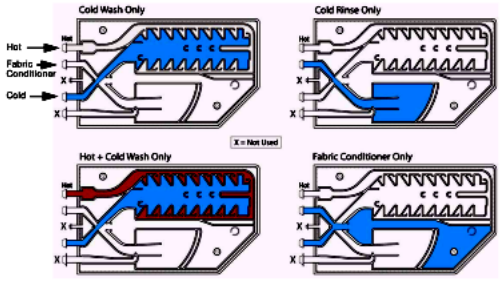

n4012e01: Shallow Dispenser Kit (WMA/WD - Vogue 4)

One of two types of dispenser were fitted to these models
TYPE ONE: Has separate external hose's and solenoid valve's and can be HOT & COLD or COLD fill only versions.
TYPE TWO: Has the solenoid valve's integrated into the dispenser moulding and is COLD fill only versions.
Both types will be secured to the console area by 2 screw fixings.

The Integrated type two dispenser is NO LONGER available and will need to be replaced using the Shallow dispenser kit.
NOTE: Solenoid valve's and valve supports are NOT supplied with the kit. If replacement valves are required these will need to be visually identified from images in Partfinder and ordered seperately.

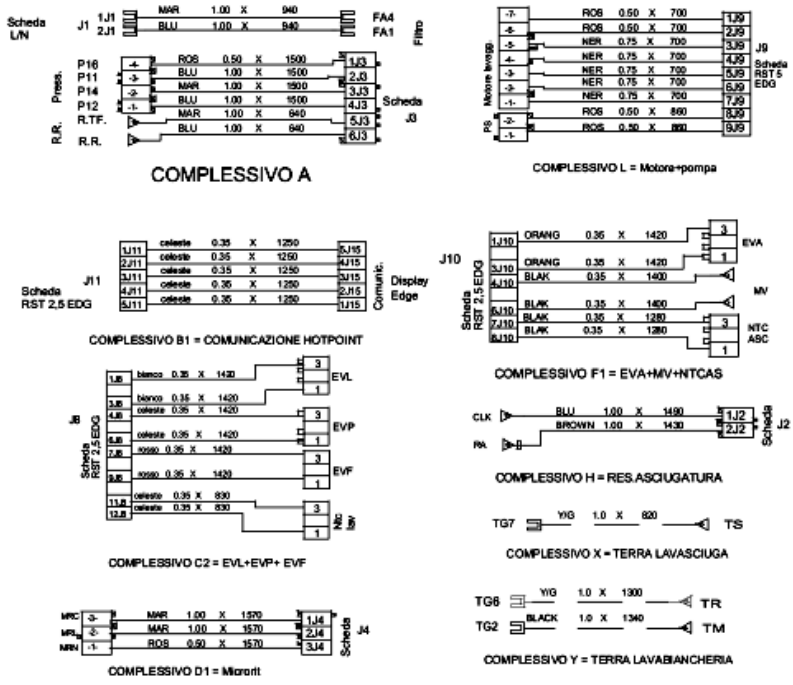

The Kit will consist of the following:
•1 x Spray plate (Adapted for Universal use)
•1 x Dispenser body (2 screw hole fixing type)
•1 x Dispenser drawer (Smooth textured moulding on drawer base)
•3 x Hose's (Dispenser to valve)
•2 x Blanking Cap's (used to blank un-used water fill spigots - refer to leaflet)
•1 x Drawer latch
•3 x Cable ties

The Contents of this kit should be used to convert from a dispenser with integral valves to a dispenser with external valves / hoses.
Any unused inlet spigots on the dispenser box are to be covered with blanking caps supplied. This does not apply to the spigots which have the raised ridge, as these are already blocked.
Cold Fill Only machines will need a blanking cap fitting to the "HOT" spigot.
Ensure the correct hose is connected to the correct dispenser spigot.
Refer to the water flow diagrams to identify them.
Ensure that the hoses from the rear of the dispenser box to the valves are secured safely using Cable Ties (supplied) to avoid contact with the Top Concrete Counterweight.
