INDESIT company

Model type:
CP059MD

Commercial code:
F028248

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

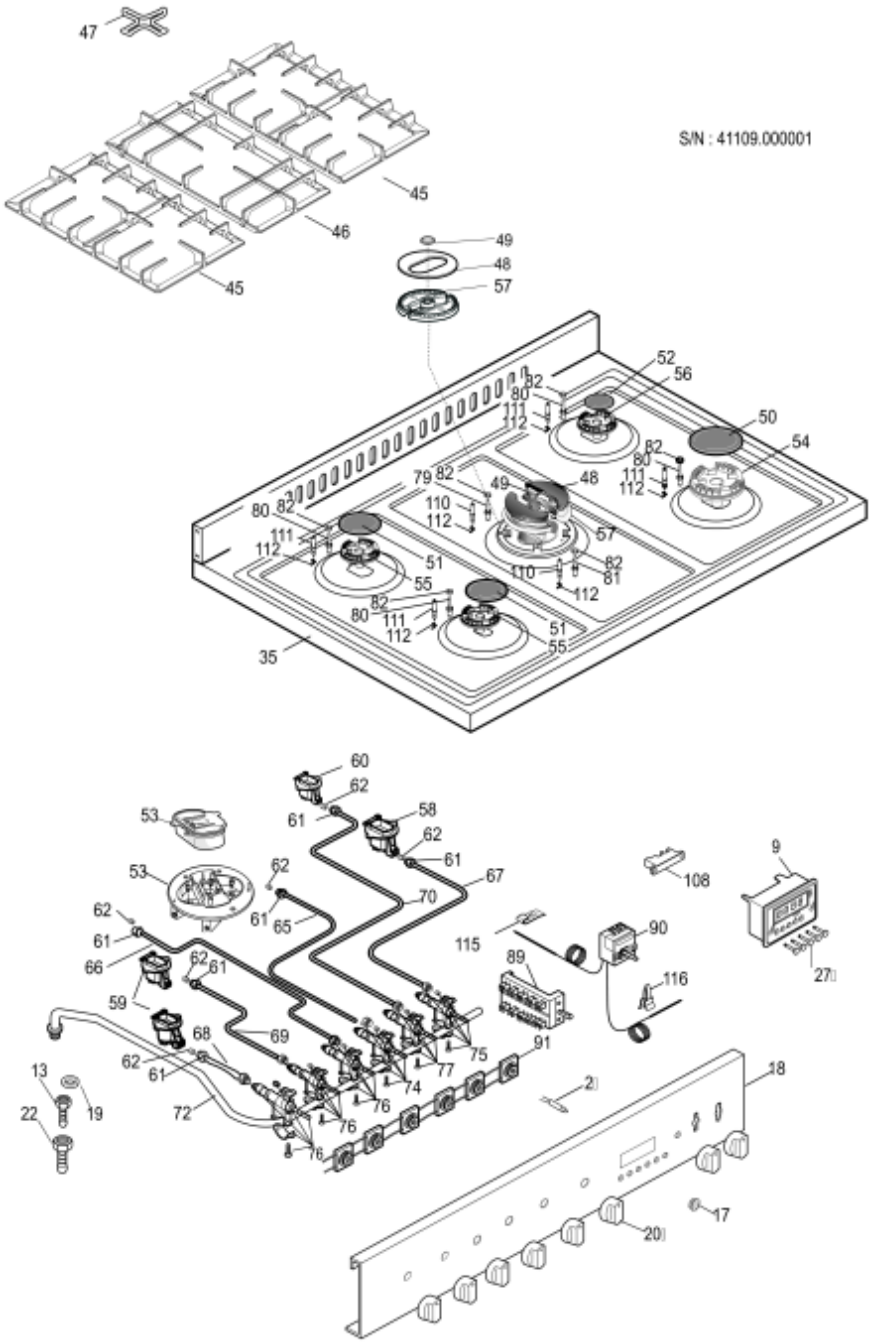

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

N1015143: INTRODUCTION OF FRONT SUPPORT

The front support C00111782 must also be ordered together with fronts C00095301 and C00091973, to be stuck on the fronts with biadhesive for correct installation of the Programmer.

Given below are the relevant trade part codes:

79282480000	CP 059 MD
79288290000	CP 059 MD(X) F
79288290100	CP 059 MD.3 (X) F

n1015057: INTRODUCTION OF KNOB WITH NEW CHROME FINISH ON SEMI-PROFESSIONAL COOKERS

From serial no. 40223.0001, all semi-professional cookers affected by this modification and produced in the Refrontolo factory have been equipped with a new control knob.
The new knob (Service code 108815) differs from the premodification item (091766) for the chrome finish. Thus the new item is not aesthetically interchangeable with the premodification item. Therefore, knob code 091766 must be used on cookers before serial no. 40223.0001, and knob code 108815 must be used on models after serial no. 40223.0001.
Premodification knobs (091766) will be available from the spare parts warehouse while stocks last, after which, when a premodification knob needs replacing on a cooker before serial no. 40223.0001, all the cooker knobs must be replaced with with code 108815 to avoid aesthetic problems.
E.g.: if 1 knob needs replacing on model CP059MD, serial no. 31020.0001 (20 October 2003), order 8 knobs code 108815.

n1015068: Buttons - New chrome finish

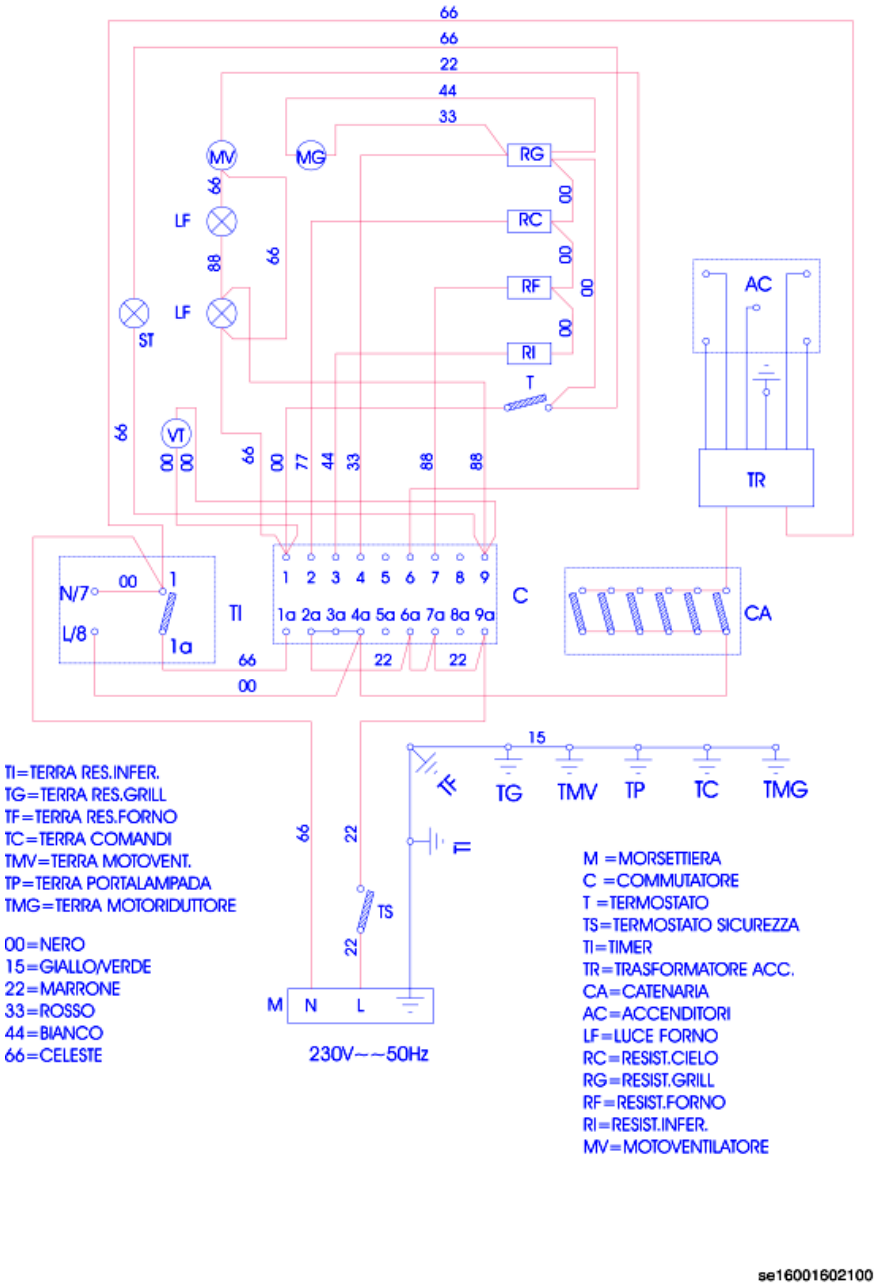

From serial number 405100001 onwards, replacement of buttons 108815 by buttons 111916.

The old and new buttons are not individually interchangeable because the chrome finish is different.

The old buttons will be used by the spare parts department until stock runs out.
Then, if replacing buttons on an appliance whose serial number is before 405100001, all of the buttons must be changed.
