INDESIT company

Model type:
TAN14NFP

Commercial code:
F034665

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

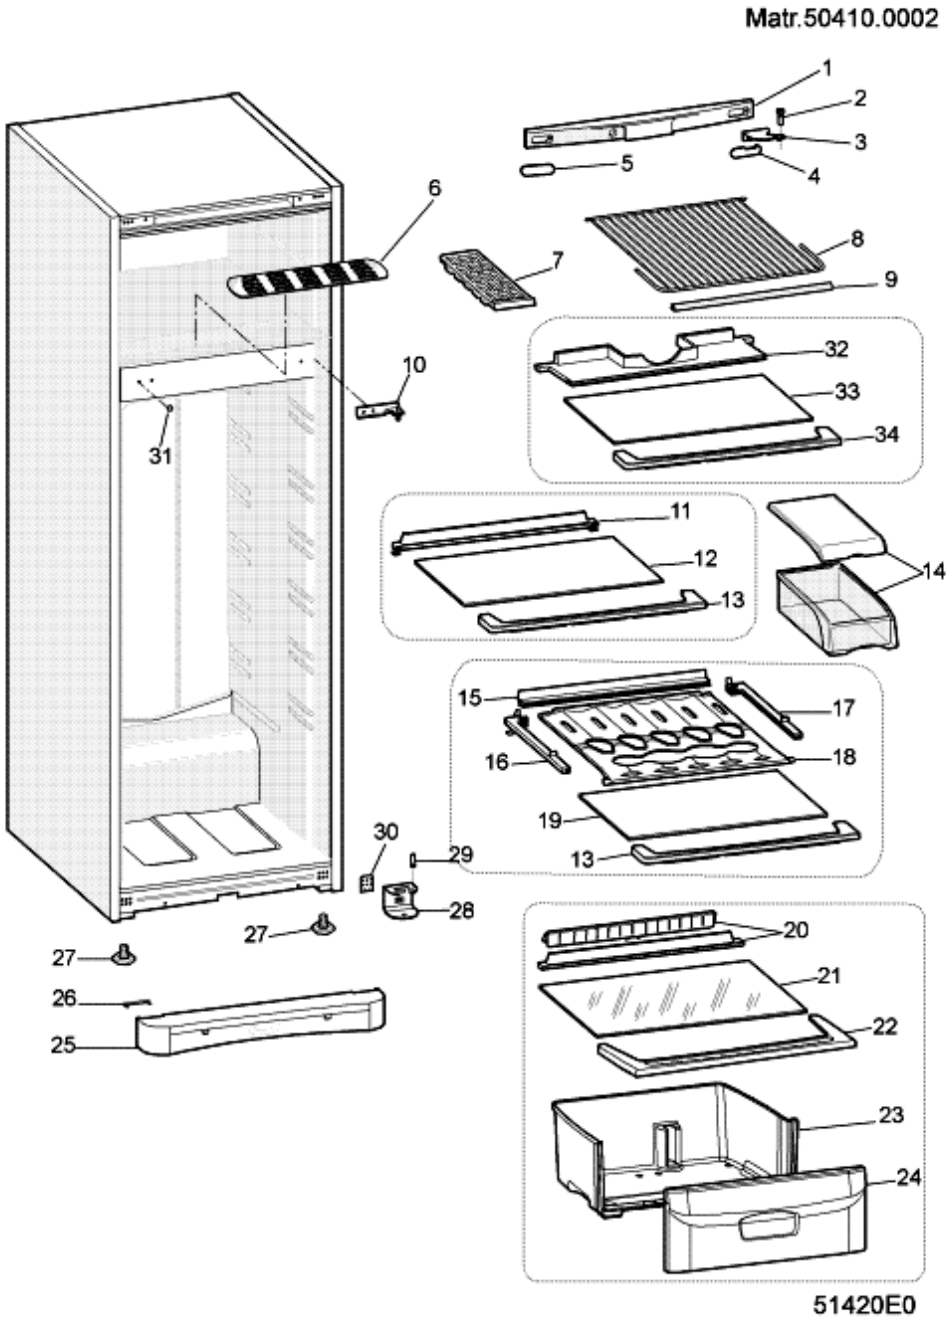

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

n1025093: Doors / weather stripping combined fridges / freezers Indesit/2000 Melano and Setubal

---

With the exception of the model R45, width 700 mm produced in Turkey (Manisa), on all the combined fridge and freezer models in the Indesit (range 2000), width 600 mm produced in Italy (Melano) and in Portugal (Setubal), Poland (Lodowek) the doors handled as replacement are without weather stripping because this is no longer blocked between door and counter-door.
The weather stripping has a new profile and is located in the housing resulting along the external perimeter of the counter-door, where it is threaded through by simple hand pressure. To remove the weather stripping it will suffice to unthread it from its housing without any other operation.

Therefore in case of replacement of the door the weather stripping may be recovered from the existing door, however the weather strips are handled singularly as a spare part.

n1025150: PCB no. 119384 (new reed switch position) mechanical no-frost fridges (Melano 93

As from September-05 (serial no. 50901.0001) the factory started installing a control panel PCB with the reed switch position moved to top of the board on Ariston no-frost fridges (05 range) (see photo N1025150 fig.1).
This modification was needed to improve alignment between the reed switch and magnet for the door open signal (the reed switch was initially mounted on the bottom of the PCB (solder side), see photo N1025150fig2.
Moving the reed switch on the PCB also involved modification of the cabinet control panel, on which the two tabs have been eliminated to allow the PCB to be fitted correctly (see photo N1025150fig3).
On premodification models replacing PCB code 119384(Rohs 143104) calls for the service engineer to remove the two tabs from the control panel.

The PCB and and cabinet control panels managed as replacement parts are already aligned with the modification described.

Parts affected:

C00119384 - THERMOSTAT PCB (FR NF-MEC)

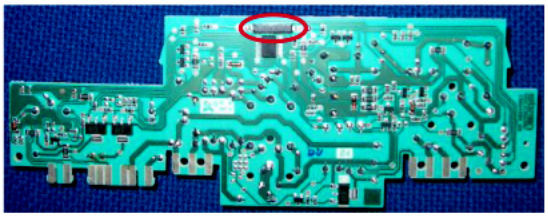

C00119618 - POLAR WHITE CONTROL PANEL (MECHANICAL-NF) 596X55
C00140642 - ALUMINIUM CONTROL PANEL (MECHANICAL-NF) 596X55
C00140841 - SILVER CONTROL PANEL (MECHANICAL-NF) 596X55

N1025150FIG2

n1025159: Ice formation on drain tube

N1025150FIG3

C00119618
C00140642
C00140841

There are managed kits C00142056 and C00271921.

Check Technical Bulletin TB001012.

n3010b02: PLAYZONE ELIMINATION

Playzone shelf has been eliminated in Manisa and Lodz production and replaced with a normal shelf already present in interested models.
These spare parts will not managed at the end of stock.

This modification changes also model name of the product without modification of industrial code, in following way:

MANISA (81)

n1025153: New 100W freezer heating element on '05 mechanical 187/60 no-frost fridges

---

From serial number 51001.0001, the factory has been installing a new 100W heating element on the freezer evaporator.

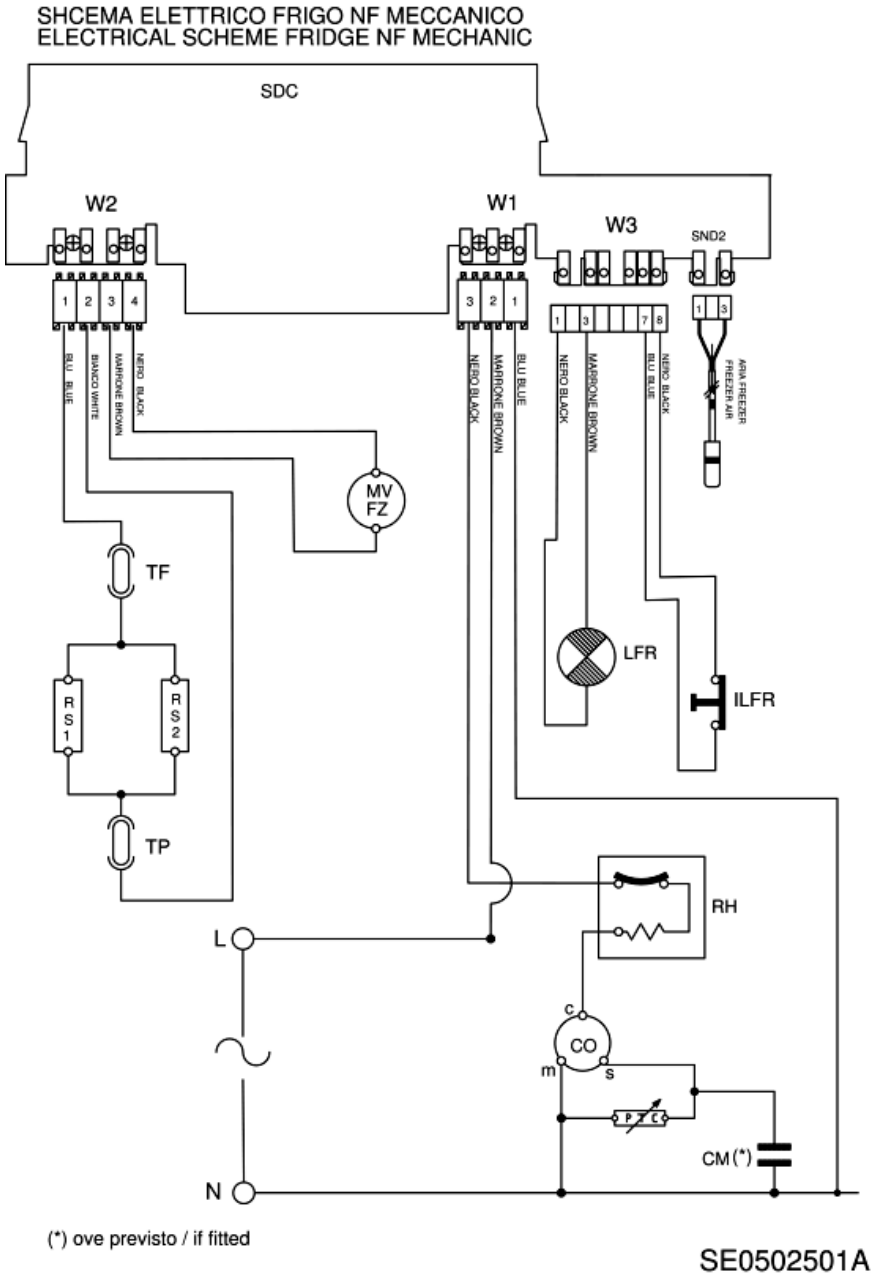

New parts
C00141703 - EVAPORATOR KIT -FZ NF-26 HOSES (MECHANICAL)
C00141701 - HEATING ELEMENT + THERMAL FUSE KIT 100W/80°C

Parts replaced
C00141093 - EVAPORATOR KIT -FZ NF-22 HOSES (MECHANICAL)
C00141095 - HEATING ELEMENT + THERMAL FUSE KIT 125W/80°C

The new parts can be used on premodification appliances.
