INDESIT company

Model type:

K6T72S(X)/NL

Commercial code:

F033910

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

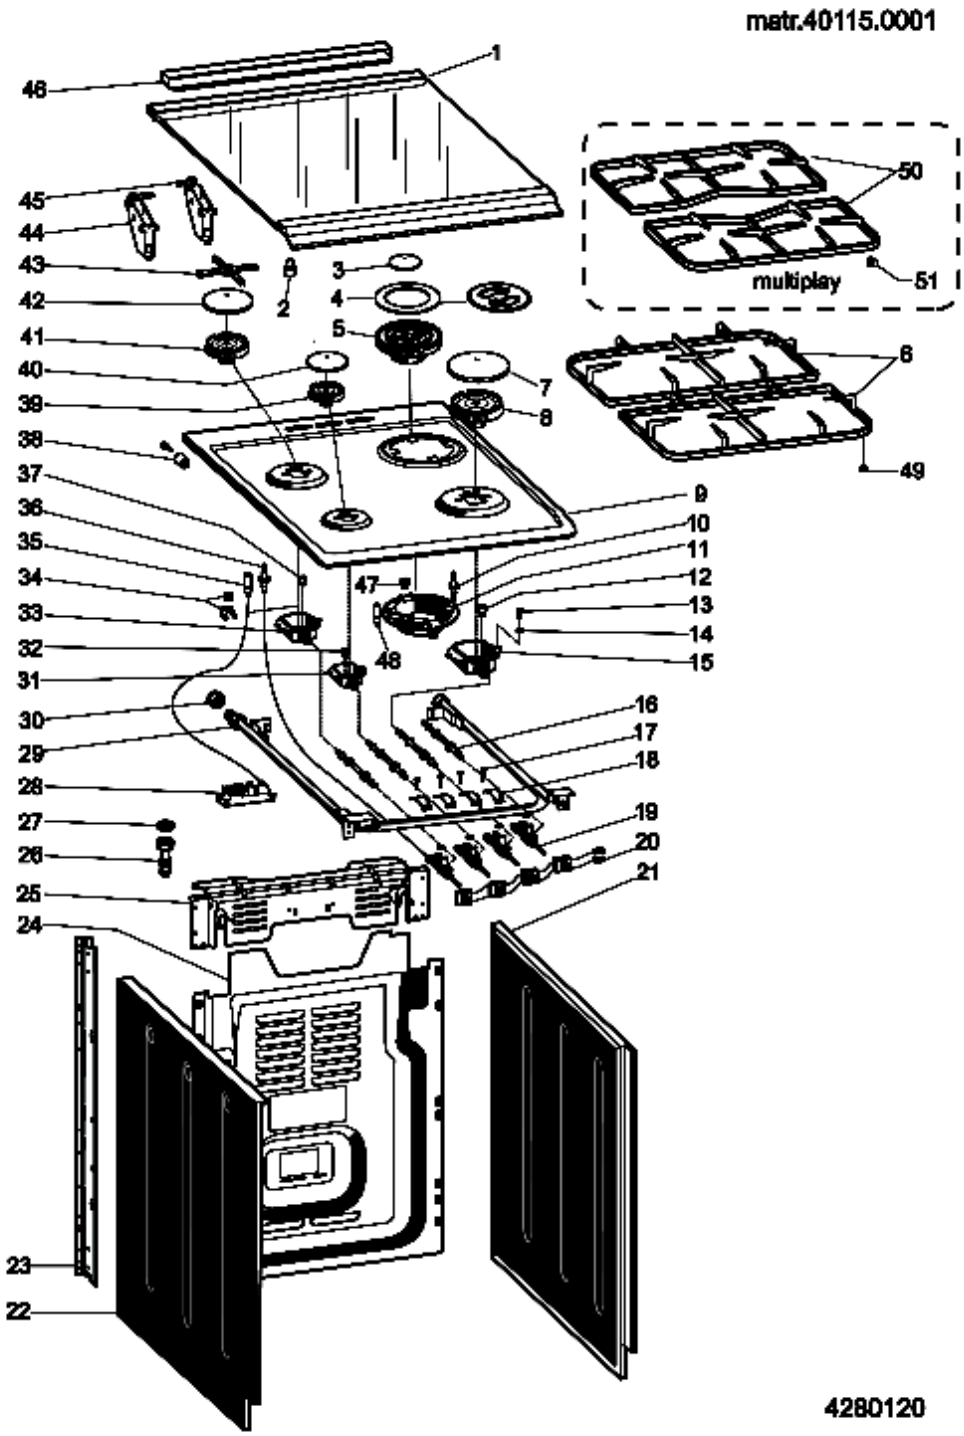

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

n1015060: INJECTOR KITS 60X60 S2000 LODZ COOKERS WITH MUFFLE

New SAT codes have been created for the injector kits on 60x60 s2000 cookers with muffle produced in the Lodz factory. Given below is the list of codes by type of gas.
-111155 = natural gas g20 20mbar/g25 25mbar
-111156 = liquid gas g30 29mbar/g31 37 mbar
-111158 = city gas g110 8mbar
-109688 = propaned air g130 8mbar
-111162 = natural gas g20 13mbar (CSI)
-111163 = natural gas gz50 20mbar (PL)
-111165 = natural gas gz35 13mbar (PL)
-111166 = liquid gas gpb-b 36 mbar (PL)

The summary tables of the injectors by type of gas are attached. The table indicates the SAT code of each injector, related burner, outlet hole diameter and heat rating expressed in kw.
Important: before using one of the injector kit make sure that the cooker concerned is approved for that type of gas.

n1015087: INTRODUCTION OF COLAMINATED SIDE PANELS ON 50x60 60X60 COOKERS WITH NORMAL PLINT

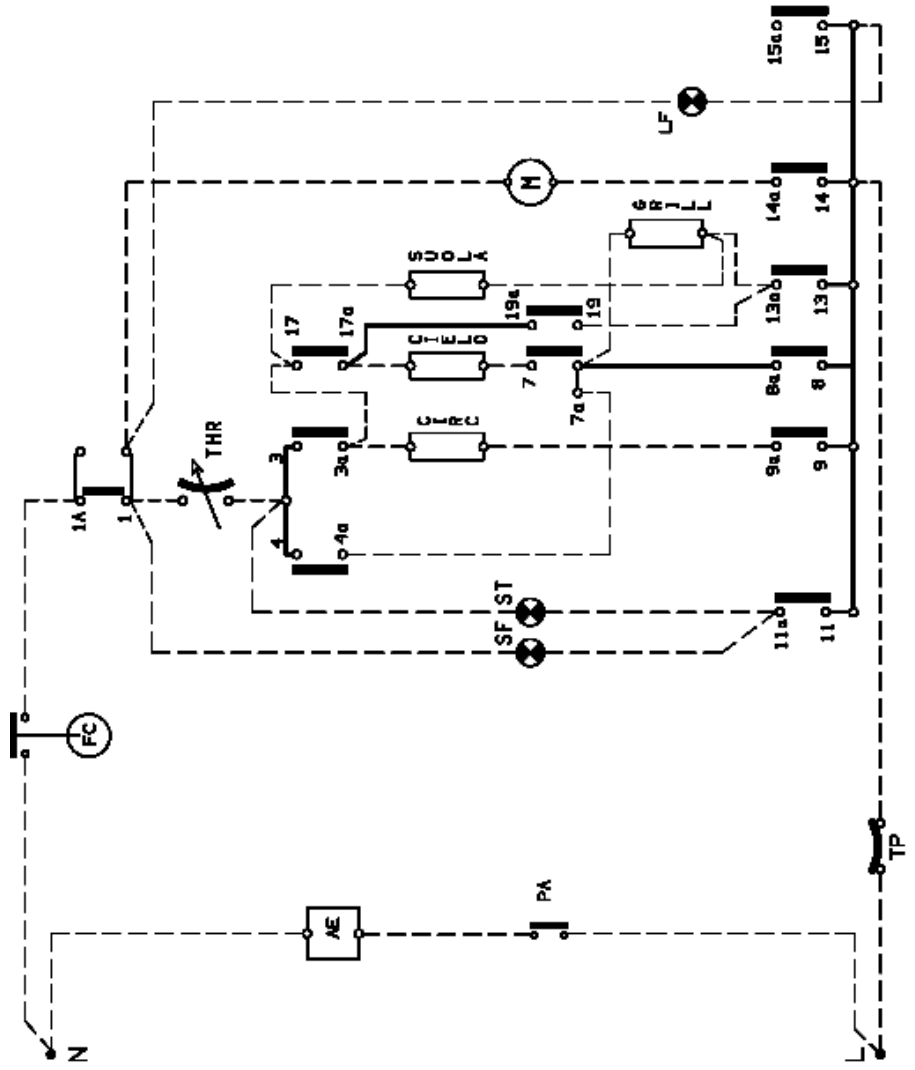

From serial no. 50102.0001, all 50x60/60x60 cookers produced in the Lodz factory and affected by this note have been equipped with co-laminated stainless steel side panels in place of the steel ones.
The new side panels are not interchangeable with the premodification parts, therefore:

a) on appliances with serial number prior to 50102.0001 use:
- 109587 (interchangeable with 077456) RH panel
- 109588 (interchangeable with 077457) LH panel

b) on appliances with serial number subsequent to 50102.0001 use:
- 115183 RH panel
- 115184 LH panel
