INDESIT company

Model type:

B13

Commercial code:

F033824

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

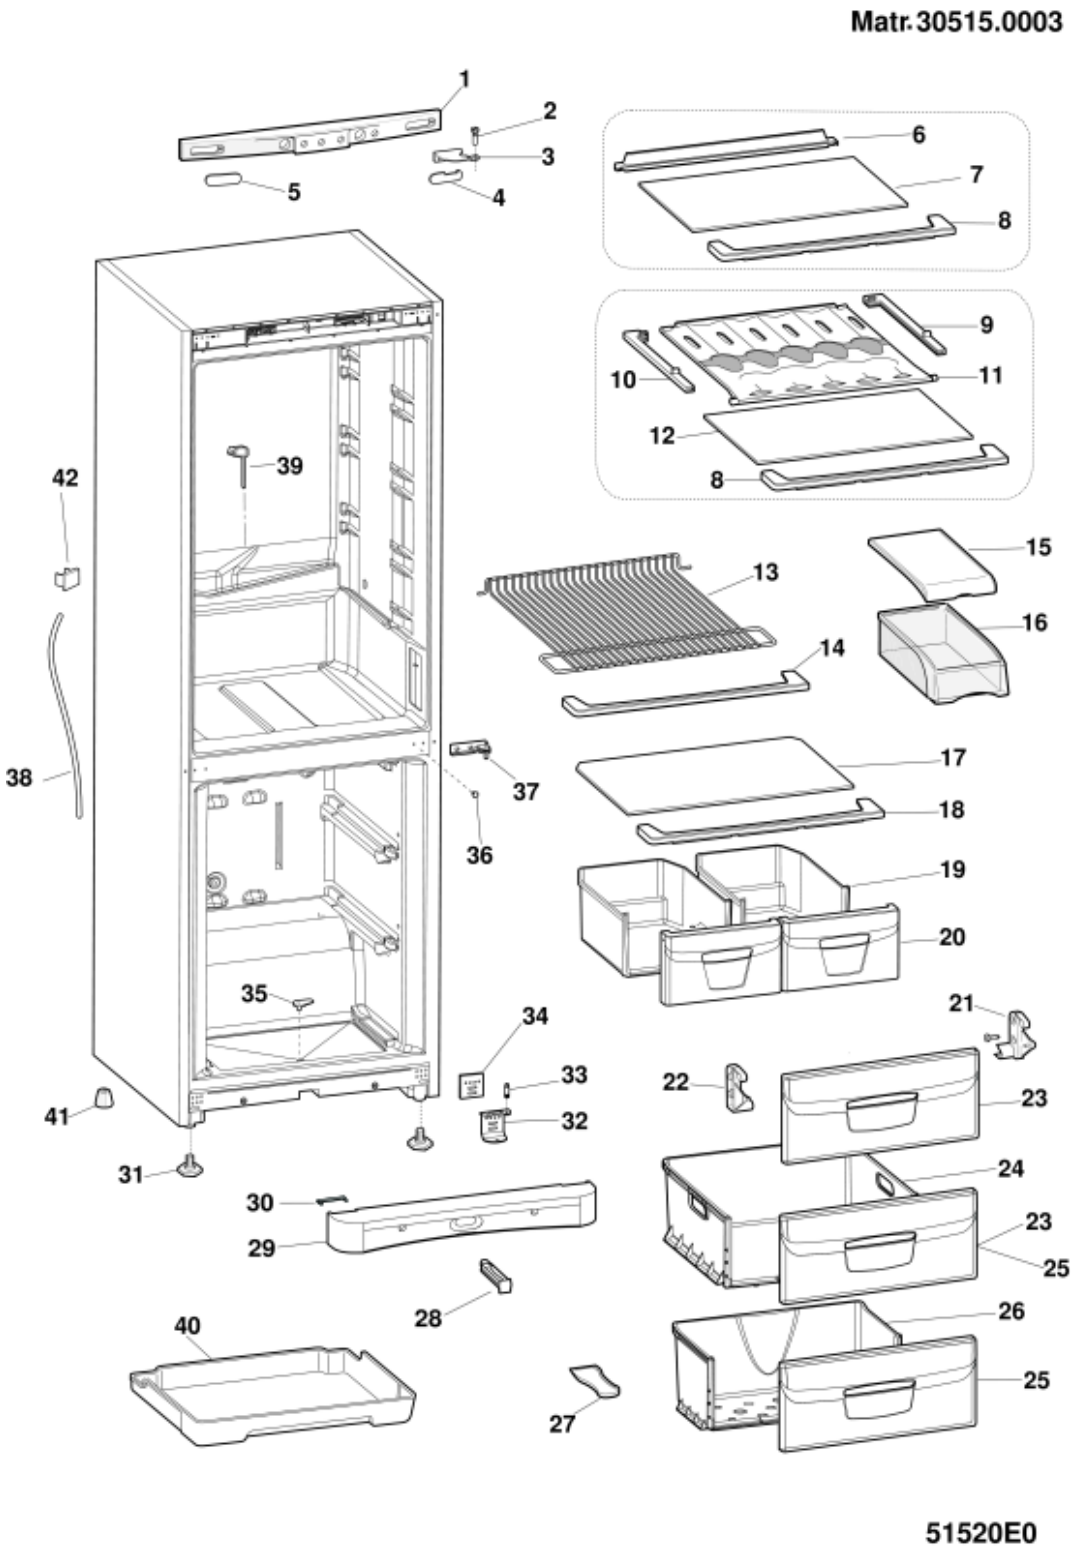

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

n1025093: Doors / weather stripping combined fridges / freezers Indesit/2000 Melano and Setubal

---

With the exception of the model R45, width 700 mm produced in Turkey (Manisa), on all the combined fridge and freezer models in the Indesit (range 2000), width 600 mm produced in Italy (Melano) and in Portugal (Setubal), Poland (Lodowek) the doors handled as replacement are without weather stripping because this is no longer blocked between door and counter-door.
The weather stripping has a new profile and is located in the housing resulting along the external perimeter of the counter-door, where it is threaded through by simple hand pressure. To remove the weather stripping it will suffice to unthread it from its housing without any other operation.

Therefore in case of replacement of the door the weather stripping may be recovered from the existing door, however the weather strips are handled singularly as a spare part.

n1030088: Production of Indesit 60 fridge-freezers (2003 restyling) in Polar White colour

---

In January 2005, the Melano factory started producing Indesit fridge-freezers(width 60 cm) in the new "polar white" colour in place of white-27.
The industrial code of these models has changed (see example), whereas the initials (BE33PI) and commercial code (29265) have remained the same.

E.g. 93292650201 = BE33PI white-27
E.g. 93292650301= BE33PI polar white

The colour change affects the following structural and external appearance parts only:

-Body, body control panel, plinth.
-Central hinge and hinge covers, hole covers.
-Doors, gaskets, handles, control panel, bushes.
-Knobs, control panel button covers.

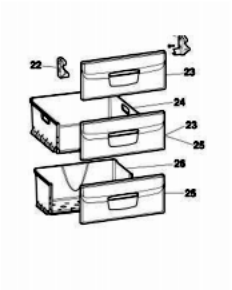

All internal accessories (racks, profiles, drawers, etc.) and door accessories (door shelves, egg trays, boxes, etc.) have remained the same.
NB- When you order a spare part, please pay attention to the industrial code.
Given below is the list of Polar White models:

n3010b00: SUBSTITUTION FRONT PANEL FREEZER DRAWER C00094718-C00094439

Since January 2010 for STATIC products will be not more managed original spare parts C00094718-C00094439 (ref. 23-25), for this reason will be supplied C00076116 (ref. 19-24).
New one is ONLY functionally interchangeable, therefore we should expect a difference in aesthetics.
