INDESIT company

Model type:

TVF651EU/HA

Commercial code:

F048891

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

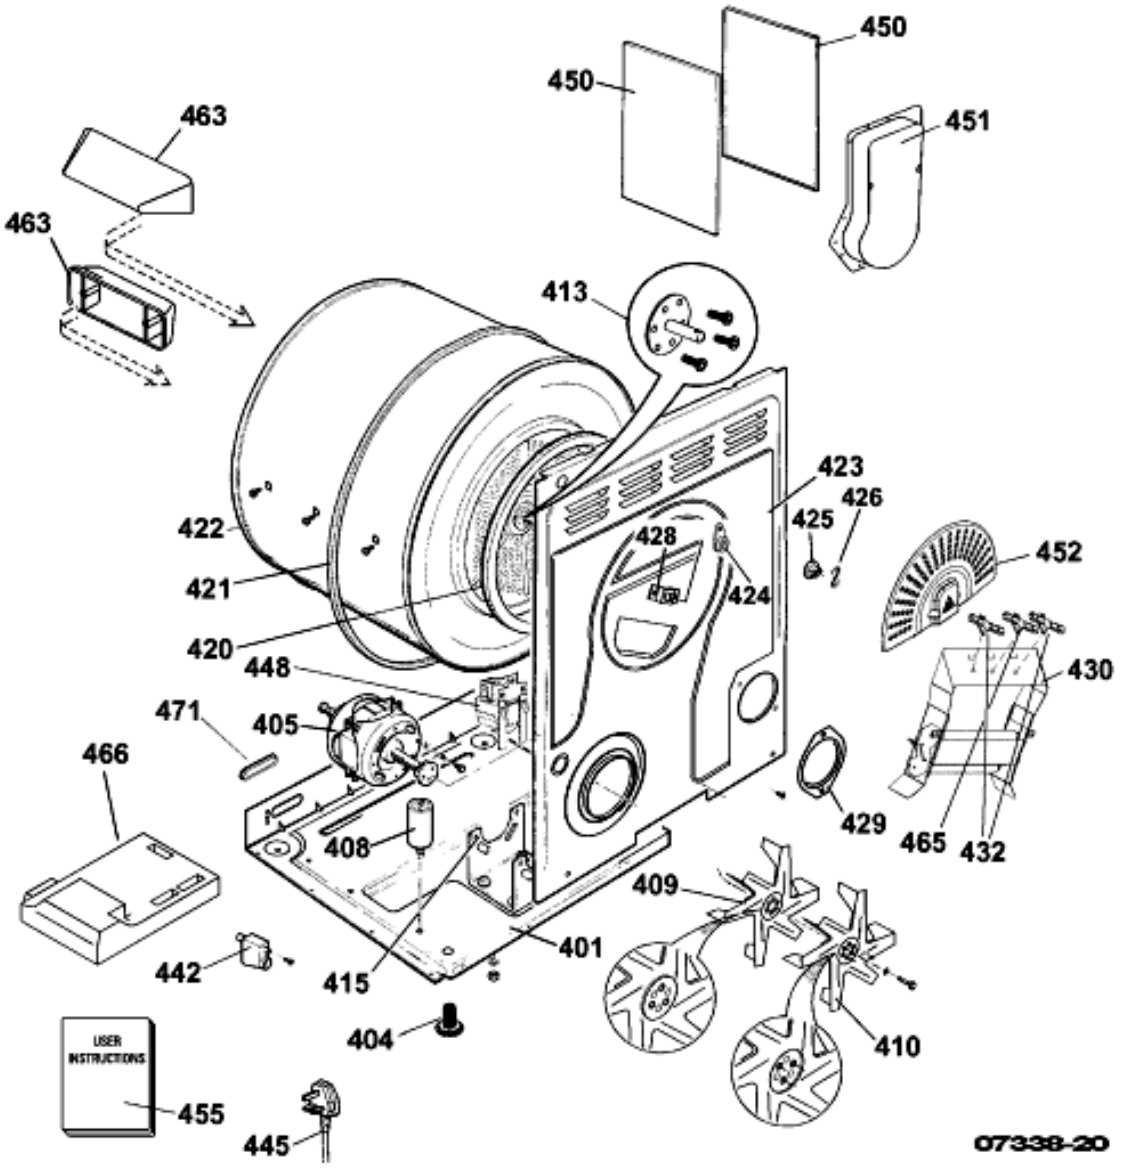

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

n4008c01: Smart Card - LVB/DRYERS

Beginning April 2008 spare parts warehouse started to manage the EVOII modules with eeprom fixed, these can only be programmed with smart card/palmare/pc.

Attention!! The premodification with eeprom socket can be programmed with smart card/palmare/pc using a blank eeprom or with pre programmed eeprom.

Spare parts of modules with eeprom fixed/eeprom socket:

C00265676 with eeprom fixed - C00143068 with eeprom socket - for models with conducibility sensor
C00254298 with eeprom fixed - C00143068 with eeprom socket - for models without conducibility sensor
C00254297 with eeprom fixed - C00259941 with eeprom socket
C00254531 with eeprom fixed - C00143058 with eeprom socket
C00254297 with eeprom fixed - C00143057 with eeprom socket - for models without blocking drum
C00265697 with eeprom fixed - C00143057 with eeprom socket - for models with blocking drum
C00254297 with eeprom fixed - C00143056 with eeprom socket
C00254530 with eeprom fixed - C00259738 with eeprom socket
C00254533 with eeprom fixed - C00143060 with eeprom socket
C00254535 with eeprom fixed - C00145013 with eeprom socket
C00254530 with eeprom fixed - C00145551 with eeprom socket
C00254529 with eeprom fixed - C00142293 with eeprom socket
C00257406 with eeprom fixed - C00143989 with eeprom socket
C00257409 with eeprom fixed - C00144151 with eeprom fixed
C00254530 with eeprom fixed - C00143069 with eeprom fixed

DRYERS
C00255835 with eeprom fixed - C00258789 with eeprom socket
C00255835 with eeprom fixed - C00194077 with eeprom socket

This notice has a "reference list" specific for each product where you can find the link between smart card and the eeprom code with the same software.

n4408c00: VENTED HEATER/THERMOSTATS

From Serial Number 70802.0001, two different heater manufacturers were used in production, DBK and Blasi. The DBK and

Blasi Heaters are totally interchangeable if replaced as an assembly.

Attention,
The thermostat kits for these heaters are not interchangeable.

From Serial number 70802.0001. Before a Thermostat kit is replaced the type of heater as fitted to the machine must be first identified.

Identification,
The cover of the Blasi heater has 2 raised dome shaped pips, there is also a Blasi Label attached to the inside of the heater cover (photo N4408C00-BLASI).

The Cover of the DBK Heater has 4 raised dome shaped pips (photo N4408C00-DBK).

DBK heaters and covers are used as service spares, therefore if a heater or cover have previously been replaced further identification is required.

The DBK heater element wire is in a strip.
The Blasi heater element wire is circular.

Note.
For the Dryer to work correctly it is important that the correct Thermostat Kit is always fitted.

n4408l00: DRUM ASSEMBLY WITH FIXED SHAFT

From Serial Number 80901.0001 a new drum with a fixed (Rivetted) shaft has been introduced in production, this drum is interchangeable and will be supplied as the service spare.

Please Note;
There are 2 drum shaft repair kits
Repair Kit for Drums with a Screwed Drum Shaft
Repair Kit for Drums with a Rivetted Drum Shaft
Select the correct kit from the parts list

Note: Only use the correct kit for the Drum fitted to the Dryer.

n4409k01: Introduction of Interface Module with Stand–By

From serial number 91102.0001 a new interface module with ‘Stand-By’ was introduced on production and is fitted to all electronic tumble dryers. The "Stand-By" mode is activated after the machine has finished the programme. This module can be used as a direct replacement for the version without Stand-By.

n4410i00: Introduction of Welling Type 358 Motor

From 17/08/2010 serial No.00817.0001 production started to use a type 358 motor manufactured by Welling, this motor uses a 9µf capacitor.

The Welling 358 motor can be used as an alternative to the previous 358 type motor manufactured by IMEP but a 9µf capacitor must also be fitted.

CAPACITORS
Ana Imep motors had 7.5uf,(6kg models) 8.0uf (7kg models) or 9uf Capacitirs (7.5kg models), fitted in production.
A 9uf capacitor can be used as the service replacement for all machines fitted with a Ana Imep motor.
Welling 358 motors must only be fitted with a 9uf Capacitor.

BOTH 358 MOTORS ARE INTERCHANGEABLE PROVIDING THE CORRECT CAPACITOR IS FITTED

n4410j02: A2 MODULE and HEATER Introduction

A2 MODULE / DELTA HEATER INTRODUCTION

During week commencing 23/11/2009 Serial No.91123.0001 a new A2 power module and heater assembly was introduce in production. This change was gradually introduced starting from the above date with full production due by week commencing 2/01/2010 Serial No.100102.0001. During this period production may vary from the original build to the A2 build depending on availability of A2 components, so to enable easy identification for models produced with the A2 power module and heater assembly, there will be a circular BLUE label (see Attached image) attached to the rear of the machine near the appliance rating plate. The label will be discontinued when full production of A2 module and heater is achieved on 02/01/20010.

MACHINES WITH A SERIAL NUMBER BETWEEN 91123.0000 and 91231.0000

No Blue Dot A1 Module and Heater

Blue Dot A2 Module and Heater

n4412c01: VENTED TUMBLE DRYER DRUM LIFTER

From Sept 2011, a curved drum lifter, has been used in production, the new lifter is fully interchangeable with the original straight drum lifter, once stock of the straight drum lifter is exhausted, the curved drum lifter will become the Service Spare, for all production dates".

n4409k00: FRONT AIR DUCT & AIR DUCT SEAL

FRONT AIR DUCT SEAL
Both 14mm and 16mm Air Duct Seals have been used in production.
14 mm - used Before Serial No. 50501.0000 (May 2005)and After 00115.0001 (Jan 2010)
16 mm - used Between Serial No.s 50501.0001 (May 2005) and 00115.0000 (Jan 2010) - See note below
If replacing only the Seal - select the CORRECT size from the parts list.
AIR DUCT
White Air Ducts were used in production from 10601.0000 (June 2011), the only difference to the Grey Ducts is the colour change.
WHITE AIR DUCTS ONLY will become the only Service Air Duct Once Stock of the Grey Air Ducts is exhausted
If the original air duct is grey, the air duct kit is required which includes a white filter.
NOTE: ALL SERIAL NUMBERS:
If the AIR DUCT is being replaced you will require a 14mm Seal because the service replacement AIR DUCT is 14mm. See parts List

---
