INDESIT company

Model type:

K6C32(X)/G

Commercial code:

F033169

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

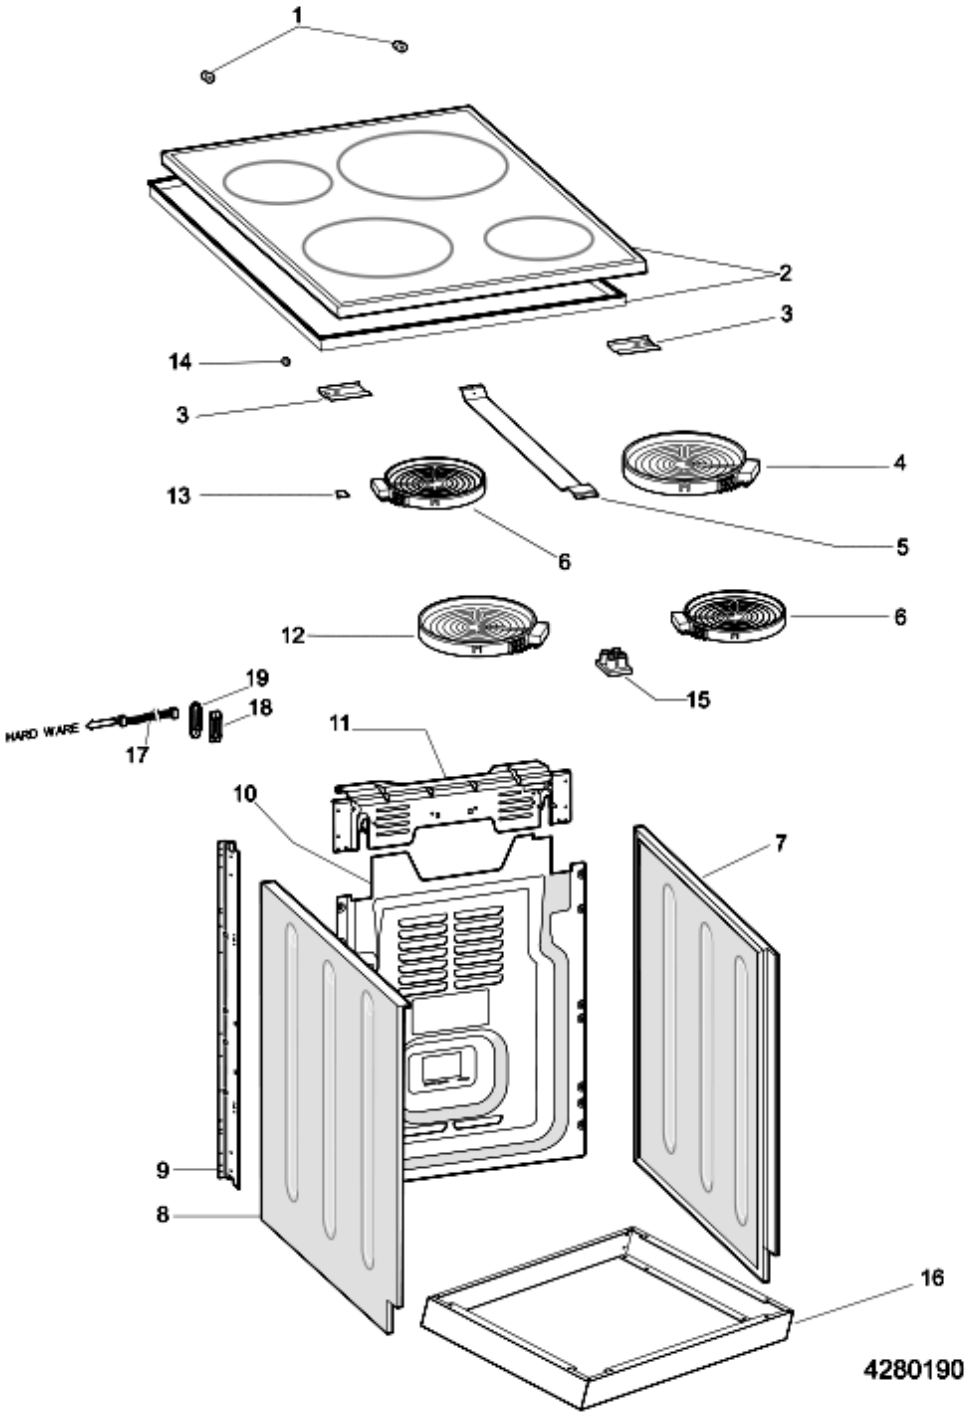

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

n0512g01: INTRODUCED NEW DRAWER

---

n0512i02: Changes to Terminal Block

---

n0514g00: EARTH RIVET

This Console Panel is not supplied with an Earth Rivet.

Ask the Customer if the panel is metal.

If metal add C00044805 Rivet to the order.

If ordering a Braille control for a Customer or an Indesit Engineer add C00044805 Rivet to the order.

Failure to fit the rivet will leave the Console Panel without an Earth.

Note: Advise Customer that a special tool is required to fit the Rivet.

n1015072: REPLACEMENT OF ENERGY REGULATOR ON 60X60 COOKERS UK

From serial no. 40930.0001, the energy regulator has been replaced on all 60x60 cookers produced in the Lotz factory for the UK market. The regulator code 019090 (240V) has been introduced in place of code 037056 (230V). The new component is not

interchangeable with the premodification item, which will continue to be stocked by the Spare Parts Warehouse as it is used on other products.

n1015084: INTRODUCTION OF COLAMINATED SIDE PANELS ON 50X60 60X60 COOKERS WITH HIGH PLINTH

From serial no. 50102.0001, all 50x60/60x60 cookers produced in the Lodz factory and affected by this note have been equipped with co-laminated stainless steel side panels in place of the steel ones.
The new side panels are not interchangeable with the premodification parts, therefore:

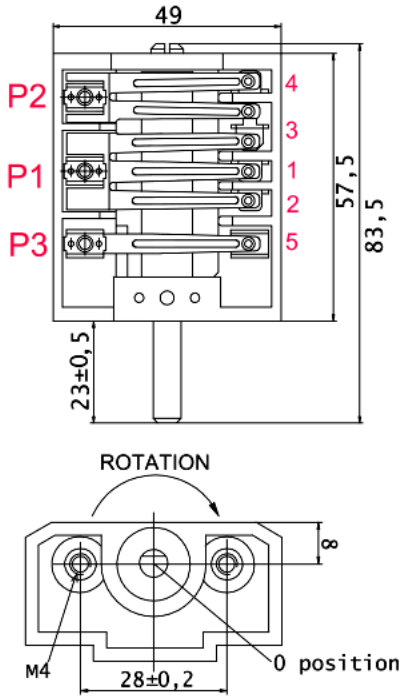

a) on appliances with serial number prior to 50102.0001 use:
- 084636 RH panel
- 084635 LH panel

b) on appliances with serial number subsequent to 50102.0001 use:
- 115185 RH panel
- 115186 LH panel

n1015106: PLATES CHANGEOVER SWITCH C00013413

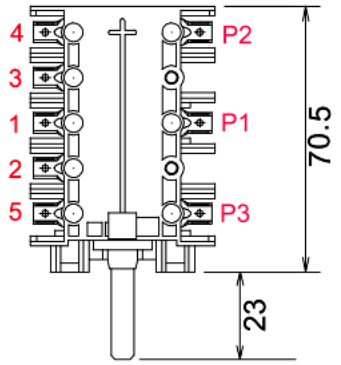

The plates changeover switch used for cookers produced in the Lodz plant can be supplied by three different manufacturers: Deka, Ego and Dreefs.
The three changeover switches, even though different in appearance, are interchangeable.
Part code C00013413 used for service operations is the EGO changeover switch.
Pictures of the three changeover switches and the relative electrical connection diagram of are given below.
