INDESIT company

Model type:
IS70CS

Commercial code:
F030618

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

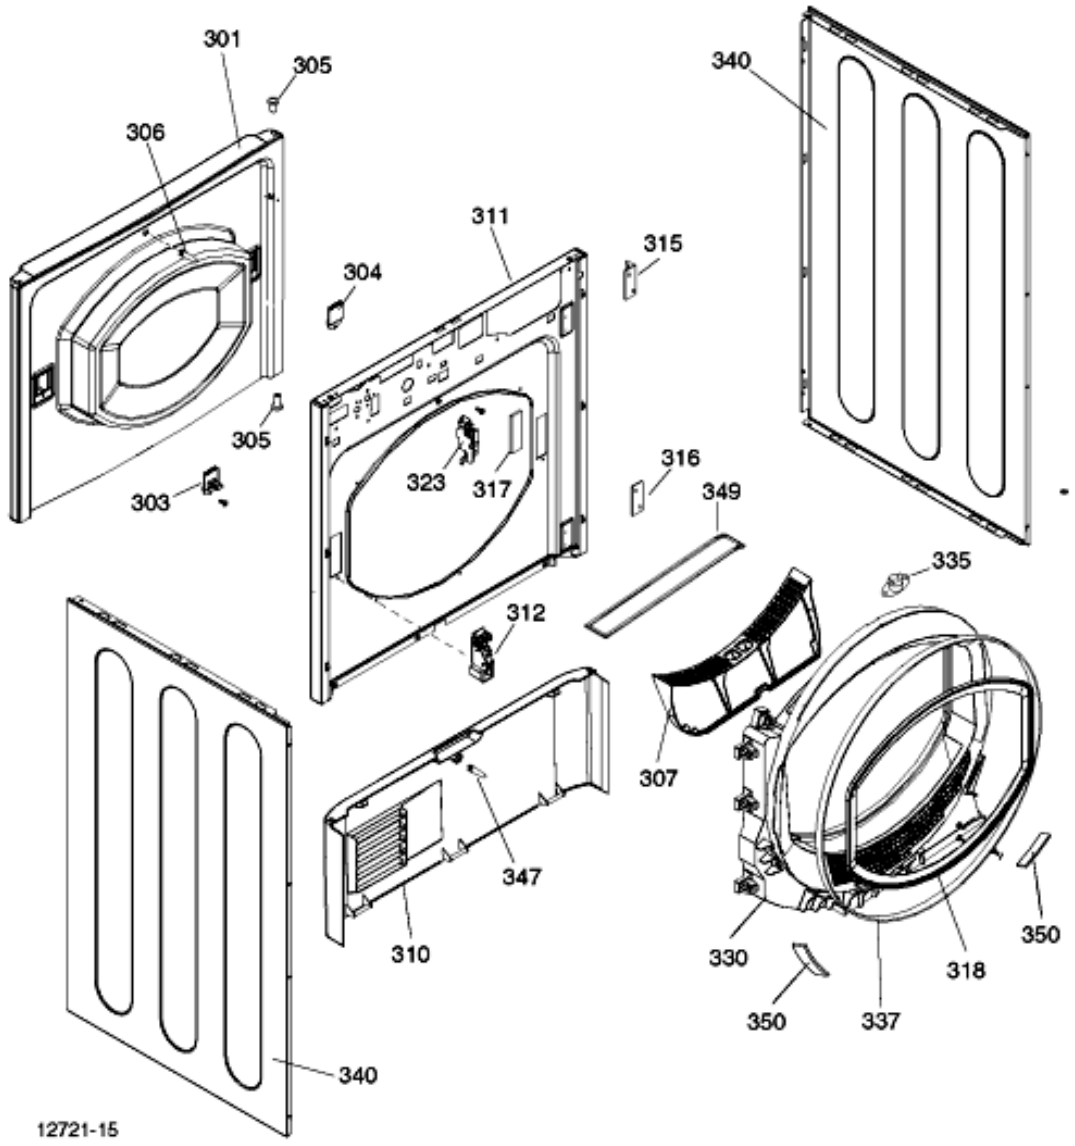

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

SN1122: Notice SN1122

This Stacking kit will fit Vogue 2, 3 & 4 washings machines only.
It is only supplied in polar white.

It is not suitable for any other model of washing machine.

Click view list at the bottom of this notice to order the stacking kit

SN1138: Notice SN1138

During date code 50727, (July 2005) the design of the sensing drum was changed from a sensing band and copper brush pick up to a plain drum with and sensor situated in the air duct assembly.

To fit this part to an appliance prior to date code 50727, (July 2005) it will be necessary to remove the sensing band, insulation strip and the lifters from the old drum and fit them to the new one.

SN1162: Notice SN1162

SN1175: Notice SN1175

CONDENSOR/VENTED TUMBLE DRYERS

CHANGES TO THE REAR PANEL and DRUM BEARING

Rear Panel

The original Rear Panel is no longer available.
The Service Replacement Rear Panels are now a kit with a Teardrop shaped Bearing, these Panels are fully interchangeable with the earlier Rear Panels.

Drum Bearing

Two Versions of Drum Rear Bearing have been used in production.

Original Bearing was Square shaped.
Later Production was Teardrop shaped

The Bearings are not interchangeable.

The large M10 washer is not required on models with a Teardrop Bearing.

Inspect the Bearing fitted and use Part Finder to identify the correct Bearing.

MICROSWITCH OPERATING PIECE

From Serial Number 60525.0001 the length of the Micro Switch Operating Piece has been increased by 2mm.

SN1176: Notice SN1176

DRYERS WITH MODIFIED REAR DRUM PROFILE

From Serial Number 60605.0001 all Vented Models and
From Serial Number 60606.0001 all Condenser Models.

The rear profile of the drum has been changed, along with this change the Drum Rear Seal has changed from 26mm to 16mm.

When replacing a rear drum seal after these dates a 16mm seal must be used.

Confirm correct part required from Partfinder.

Note. If a machine with a serial number before the above dates, has had a drum fitted with a modified rear drum profile, a 16mm seal must be used.

SN1177: Notice SN1177

CONDENSER PUMP AND FLOAT

A Kit is required to replace a Pump if the Serial Number is before 60602.9999, as the original Pump is no longer available

From Serial Number 60603.0000 a New Pump and Float have been used in Production.
When changing the float or pin on these later models, the Float and Pin must be changed together and are available as the Float/Pin Kit.
Water Deflection Vert./Horz. And seal are not used in the new assembly.

From Serial Number 71025.0000 the Float pin was reduced by 3mm to allow more water into the float reservoir.

The Parts are Not Interchangeable.

Click "View List" below to Select the Correct parts to order.

SN1180: Notice SN1180

NEW FRONT PANEL AND TIMER ADAPTOR

Mechanical Condenser Dryer

From Serial Number 60927.0001 a new Front Panel and Timer Adaptor have been used in Production.

The Front Panels are interchangeable, but the Timer Adaptor will only fit the same production Front Panel.

Click "View List" below to Select the Required Parts.

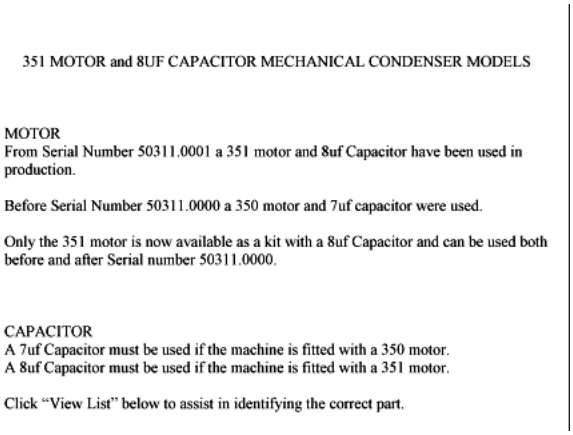

SN1181: Notice SN1181

SN1182: Notice SN1182

CONDENSER MOTOR and COOLING FAN

FAN
From Serial number 60907.0001 the fixing dimensions to the motor shaft changed.

With this change to the motor shaft a new version of cooling fan was introduced, the original and new versions of fan are not

351 MOTOR and 8UF CAPACITOR MECHANICAL CONDENSER MODELS

MOTOR
From Serial Number 50311.0001 a 351 motor and 8uf Capacitor have been used in production.

Before Serial Number 50311.0000 a 350 motor and 7uf capacitor were used.

Only the 351 motor is now available as a kit with a 8uf Capacitor and can be used both before and after Serial number 50311.0000.

CAPACITOR
A 7uf Capacitor must be used if the machine is fitted with a 350 motor.
A 8uf Capacitor must be used if the machine is fitted with a 351 motor.

Click "View List" below to assist in identifying the correct part.

interchangeable. The original fan C00207723 (1703002) can only be fitted to a model produced before serial number 60907.0001

A further change has been made to the original fan C00207723 (1703002) this has been replaced in service by a fan that is shorter in length to 72mm part code C00095599. The fitting of this fan does not effect the performance of the condenser drying process.

For 'C' Energy models a change has also been made in production to the fan as fitted from serial number 60907.0001 C00199451 (1703672) this has been replaced by a fan that is shorter in length 72mm part code C00272335. The fitting of this fan does not affect the performance of the condenser drying process.

MOTOR
The service motor type 351 part code C00194688 is used for replacement to all production and is supplied as a kit including the later version fan C00272335 and an 8uf capacitor

Click "View List" below to Select Parts

n4407c00: Condenser Motor

From Serial Number 60907.0001 the Condenser Dryer Motor and Cooling Fan have been changed. The method of Cooling Fan Location/Fixing has changed.

The new Cooling Fan and Motor are not interchangeable with Models made before 60907.0001.

If replacing the Motor, a Kit is available which includes the latest Motor, an 8uf Capacitor and the latest Cooling Fan.

This Motor kit can be fitted to models both before and after Serial Number 60907.0001 providing all the parts in the Kit are replaced.

n4407l00: BRACE FITTED TO VENTED MODELS REAR PANEL

BRACE FITTED TO VENTED MODELS REAR PANEL

A Brace has been fitted to all current Vented Tumble Dryers from Serial Number 71210.0000

The Brace can be fitted to Machines before Serial Number 71210.0000 providing the Rear Panel is replaced as well. The Brace is secured to the Rear panel by 2 screws.

See Parts List for required parts.

n4408e00: CONDENSER DOOR CATCH/LATCH CHANGES

INTRODUCTION OF EMZ DOOR CATCH/LATCH

From serial number 80215.0000 a EMZ Door Catch and Latch were used in production.

A EMZ Door Catch Kit, including the latch and catch replaces any faulty catch whatever the serial number.

If the Latch only, is required the correct Latch can be identified from partfinder, by viewing the attached photograph.

n4408f00: CONDENSOR DRYER BASE/WHEELS

CONDENSOR BASE ASSEMBLY/REMOVAL OF WHEELS FROM THE BASE

FROM SERIAL NUMBER 80424.00001 a new condensor dryer base assembly has been used in production.
The new assembly has sliders moulded into the base to replace the original 2 rear wheels.

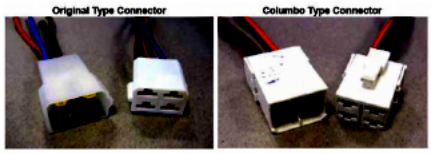

n4409i01: Bearing Pad Grooved

'C' Energy Condenser Tumble Dryers.
From serial number 90817.0001 the quantity of bearing pads C00255284 fitted on production was reduced fro 5 to 4.
'B' Energy Condenser Tumble Dryers are not effected and will continue to use 5 bearing pads

n4410k01: TUMBLE DRYER HEATER CHANGE

FROM SERIAL NUMBER 01112.0000 (12th November 2010) A NEW HEATER WITH A COLOMBO CONNECTOR HAS BEEN USED IN PRODUCTION.
THE ONLY DIFFERENCE BETWEEN THE 2 HEATERS IS THE WIRING CONNECTOR.

IF THE NEW HEATER CONNECTOR IS REPLACED WITH THE CONNECTOR FROM THE ORIGINAL HEATER, THE NEW HEATER CAN BE FITTED TO ALL SERIAL NUMBERS.

n4414f00: DRUM SHAFT

C00115748 DRUM SHAFT MUST ONLY BE FITTED TO DRUMS WHERE THE DRUM SHAFT IS SCREWED TO THE DRUM.

n4414g00: DRUM SHAFT REPAIR KITS

THERE ARE 2 TUMBLE DRYER DRUM SHAFT KITS.

C00113038 DRUMS WHERE THE DRUM SHAFT IS SCREWED
C00305794 DRUMS WHERE THE DRUM SHAFT IS RIVETTED.
THE CORRECT KIT MUST ALWAYS BE FITTED.
BOTH KITS CONSIST OF THE DRUM SHAFT/SUPPORT, DRIVE PIN FIXING SCREWS and REAR BEARING.
STARTING FROM JUNE 2014 THE DRUM SEALS WHICH WERE INCLUDED IN KIT C00113038 HAVE BEEN REMOVED.

n4407f00: INLET RING REMOVED

FROM SERIAL NUMBER 70521.0000 THE INLET RING IS NO LONGER USED IN PRODUCTION.

n4408l02: DRUM SUPPORT WHEELS

THE DRUM SUPPORT WHEELS ARE NO LONGER USED IN PRODUCTION.

IF THE DRUM SUPPORT WHEELS REQUIRE REPLACING, A KIT IS AVAILABLE, WHICH USES FRONT BEARING PADS TO SUPPORT THE DRUM FRONT.

n4413j00: BREAKING BELTS

To overcome the issue of breaking belts the 6 Rib belt has been replaced by the 8 rib belt C00300793

n4414a03: BEARING PADS REDUCED

FROM JUNE 2013 THE NUMBER OF BEARING PADS FITTED IN PRODUCTION WAS REDUCED FROM 5 to 4.
FROM THIS DATE THE LEFT HAND BEARING PAD (WHEN VIEWED FROM THE FRONT) IS NO LONGER FITTED
