INDESIT company

Model type:
4DAABHA

Commercial code:
F058683

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

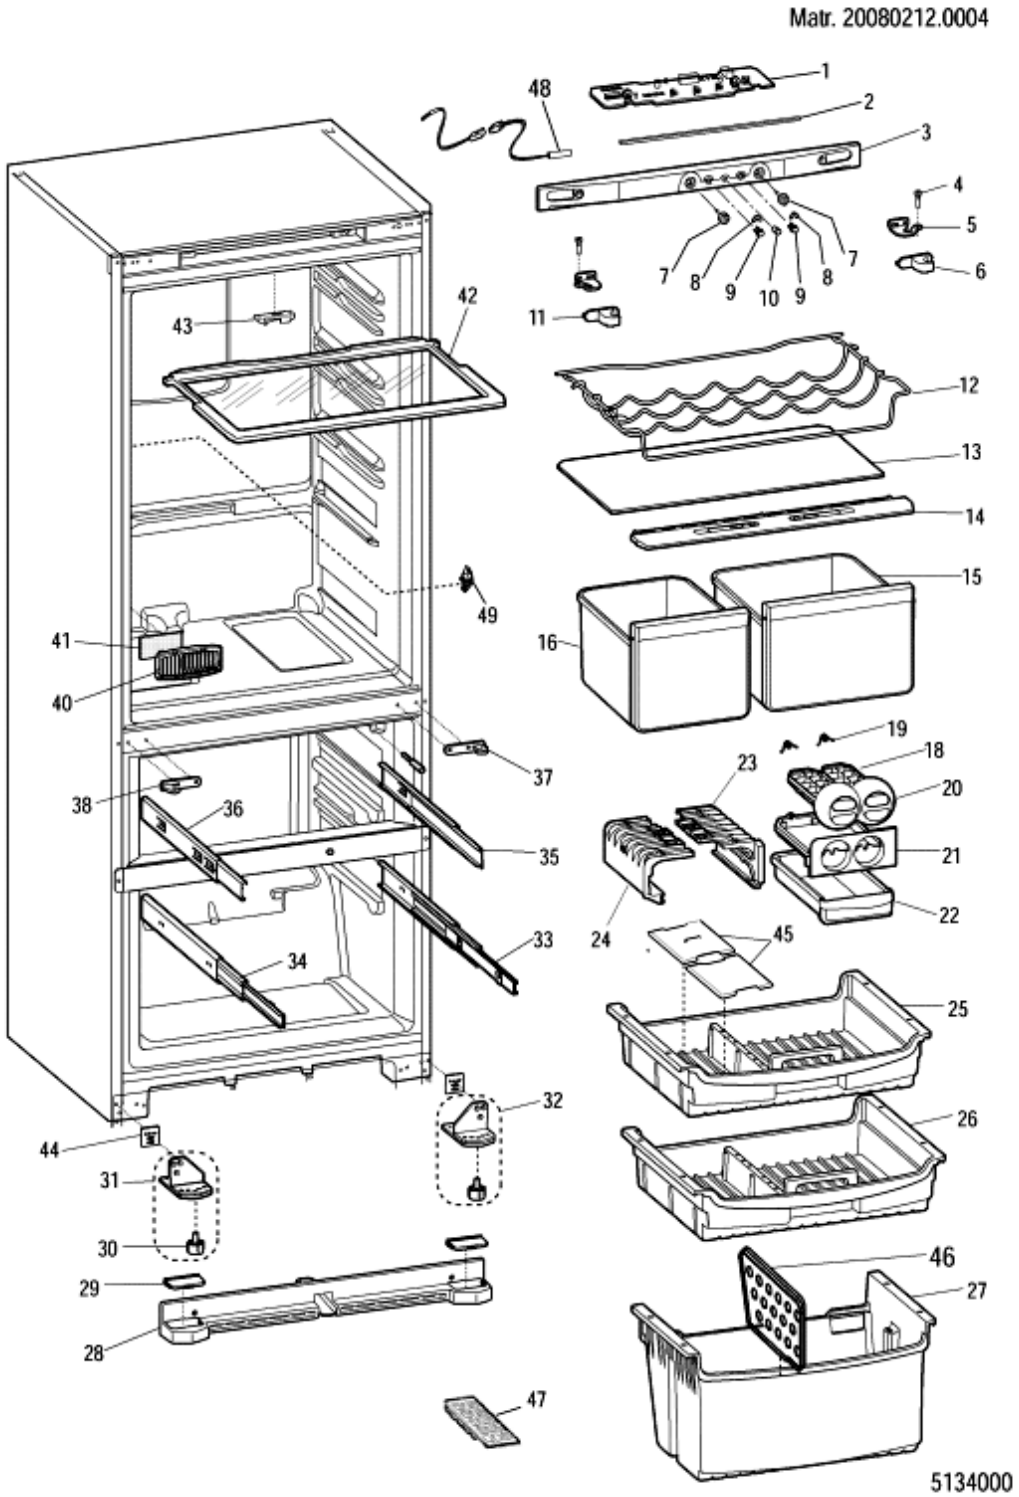

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

n2510b00: SUBSTITUTION RUBBER BUFFER FOR COMPRESSOR

Since month of February 2010 has been substitute in assistance the rubber buffer for compressor C00089673 with the C00109592.
Substitution is not valid for the products which use JIAXIPERA compressors respectively differentiate for type, Single Door (SD) / Double Door (DD) or different:

SD/DD C00089673 --> C00277320
NOT SD/DD C00089673 --> C00032453

n2510l00: COLOUR CHANGE AND DOOR SEAL REPLACEMENT

COLOUR CHANGE OF MAGNETIC SEAL FOR DOORS
During its production life, this model has been produced with black or white door seal gaskets. The service door assemblies are therefore available with black or white seal gaskets. Black and Polar White seal gaskets are available as a separate serviceable part also. Visually check the colour required and choose the relevant part from the parts list or use the serial number "View List" however this list may not be a valid source of attaining the correct part number due to stock bin levels.

DOOR SEAL REPLACEMENT
We recommend this part be fitted by suitably qualified persons/engineers with technical competence, applicable product knowledge and the suitable tools.

n3008g00: ASSEMBLY GUIDE-LONGERON UPPER DRAWER FOR "QUADRIO"

The Right-Left guides for the upper freezer drawer are managed assembled with the longeron: the assembly is composed of fix

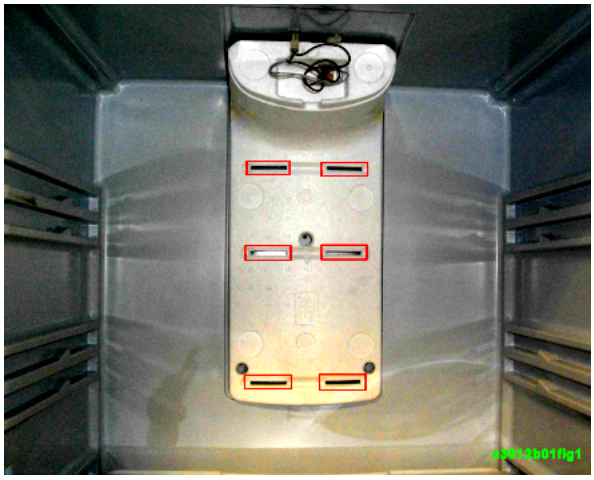

guide (internal of cell), mobile guide (fixed by rivets on the longeron of the drawer) and upper longeron.
For this reason the guide-longeron Right-Left assemblies will be managed respectively by C00265551 and C00265554.

n3010d02: THERMOSTOP+WIRING-AMP LAMP BULB QUADRIO

Starting from S/N 00301... has been introduced in production a lamp thermostop with modified intervention parameters, so for this reason also setting file was revised. In spare parts warehouse old stock has been removed and it will be managed only new parts with same code C00271011. Following this modification it will be necessary to re-program the board when lamp thermostop is substituted on appliances with S/N until to 00228...

n3012b01: SUBSTITUTION MULTIFLOW COVER

Starting from S/N 11027... multiflow insulating and its cover has been modified:
vents has been removed(n3012b01fig1-n3012b01fig2) and fissures on cover has been reduced. Spare parts warehouse will manage only modified components so, to make assistance on pre-modification products, it will be necessary to cut with a cutter the final part of the vent(n3012b01fig3) on multiflow insulating and apply new cover.
