INDESIT company

Model type:
AS60VEX

Commercial code:
F030652

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

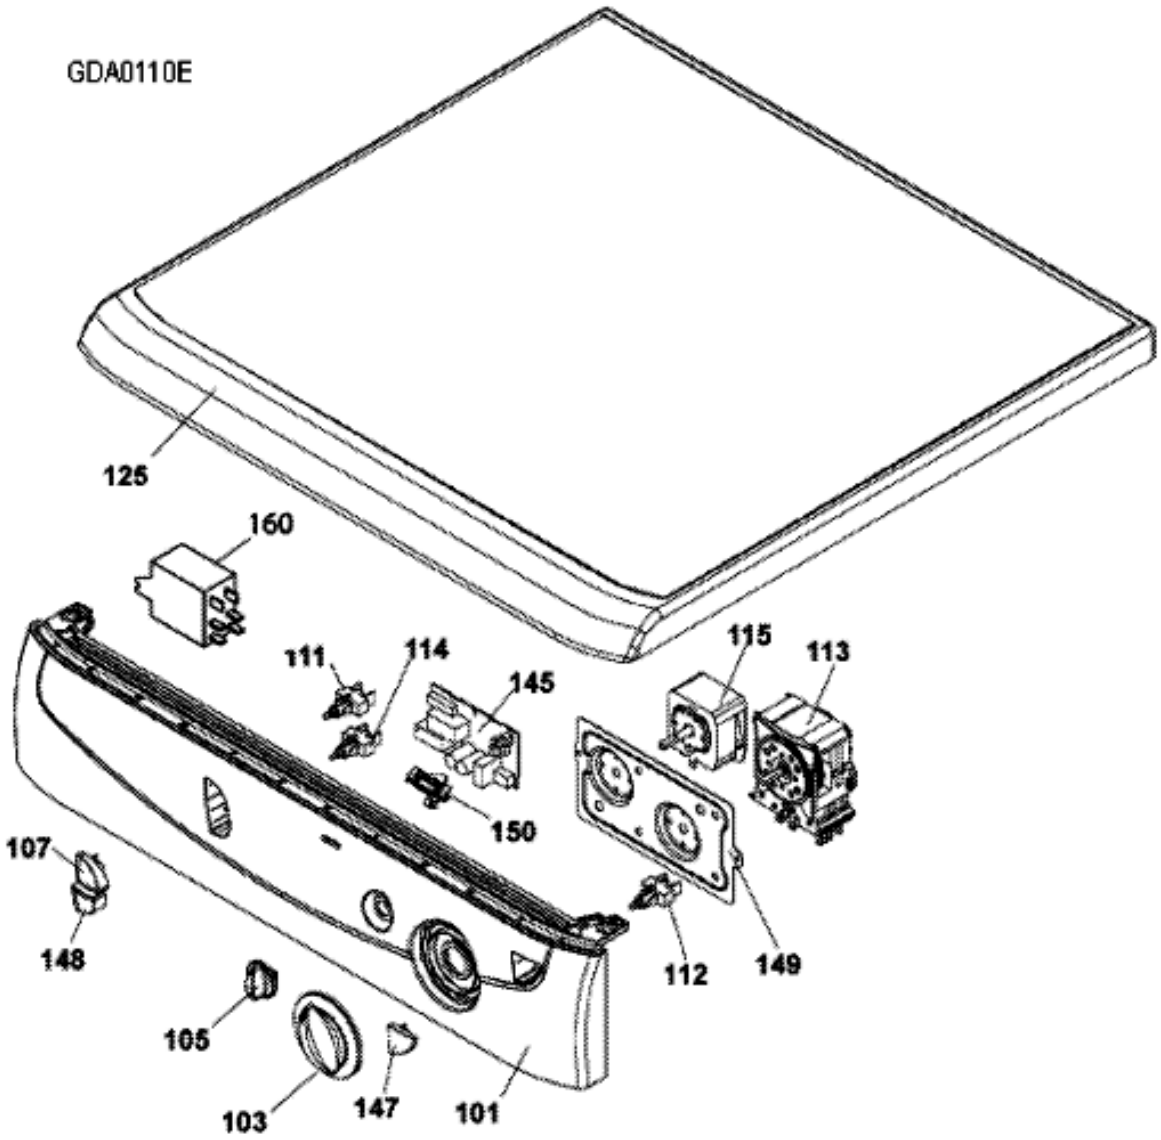

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

n1040357: Fixing bracket for installing Dryers on Washing Machines

---

The spare part KITS for installing the Dryers affected by this note on Washing Machines are the following:

- Spare part code C00115839 KIT for VENTED DRYERS - WHITE

- Spare part code C00114866 KIT for CONDENSER DRYERS - WHITE

- Spare part code C00149478 KIT with SHELF for CONDENSER/VENTED - WHITE

- Spare part code C00280677 (exC00142690) KIT VENTED DRYERS USA 2010 - white

- Spare part code C00280679 KIT VENTED DRYERS USA 2010 - SILVER

- Spare part code C00280681 (exC00142830) KIT CONDENSER DRYERS USA 2010 - white

- Spare part code C00280680 KIT CONDENSER DRYERS USA 2010 - SILVER

n1040402: New micro delay unit installed on electronic dryers.

From serial no. 50711.0001 the delay unit has been installed.

New parts
C00141694 - Micro delay unit.
C00142144 - Indesit white front panel.
C00141691 - Ariston white front panel.

premodification parts
C00112145 - Micro delay unit.
C00112210 - Indesit white front panel.
C00113818 - Ariston white front panel.

The new items are not interchangeable with the premodification ones.

IMPORTANT!!
When assembling the new micro delay unit with replacement code C00141694, place the hook as shown in the attached figure.

Models affected:
cc30636 - ISL60NL
cc30638 - ISL60VEX
cc35832 - ISL60VSK
cc30652 - AS60VEX
cc30655 - AS60VSK
cc30659 - AS60VEXPAI
cc30651 - ASL60VEX
cc33618 - ALE60VFR

n1040405: Feet installed on dryers

Four feet have been installed on the dryers referred to in this release (see pictures N1040405FIG1-FIG2).

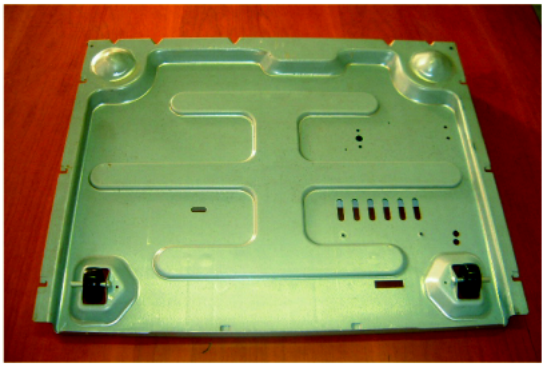

New parts
C00142439 - foot
C00142908 - base

premodification parts
C00095591 - wheel
C00095592 - pivot
C00112148 - base

Models/serial numbers affected by modification:
cc30632 - IS60VFR - s/n 51020.0001
cc30636 - ISL60NL - s/n 51102.0001

cc36302 - AS60VXAUS - s/n 51024.0001

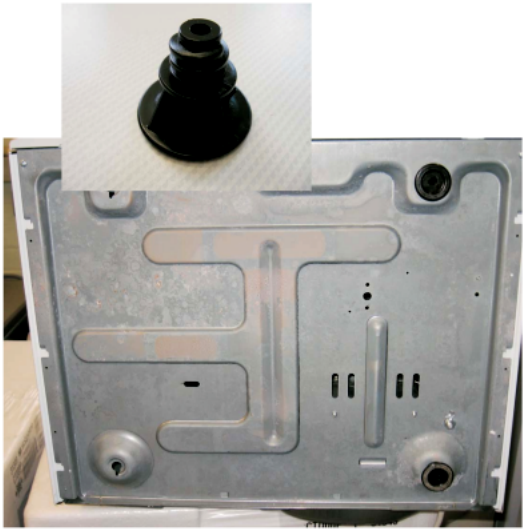

N1040405FIG1

OLD

N1040405FIG2

NEW

n4407k00: Introduction of Relay

On this model from serial number 70828.0000 a relay was introduced to prevent drum rotation when the door is opened. The relay may be located either on the cabinet base or behind the dashboard. With change a different door switch was also introduced.

These parts are not interchangeable.

n4408c00: VENTED HEATER/THERMOSTATS

From Serial Number 70802.0001, two different heater manufacturers were used in production, DBK and Blasi. The DBK and Blasi Heaters are totally interchangeable if replaced as an assembly.

Attention,
The thermostat kits for these heaters are not interchangeable.

From Serial number 70802.0001. Before a Thermostat kit is replaced the type of heater as fitted to the machine must be first identified.

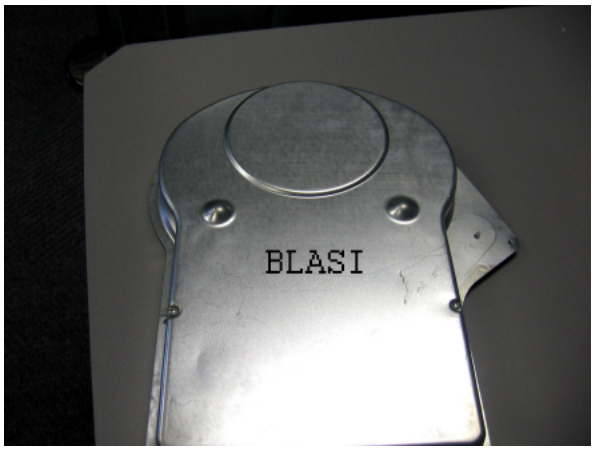

Identification,
The cover of the Blasi heater has 2 raised dome shaped pips, there is also a Blasi Label attached to the inside of the heater cover (photo N4408C00-BLASI).

The Cover of the DBK Heater has 4 raised dome shaped pips (photo N4408C00-DBK).

DBK heaters and covers are used as service spares, therefore if a heater or cover have previously been replaced further identification is required.

The DBK heater element wire is in a strip.
The Blasi heater element wire is circular.

Note.
For the Dryer to work correctly it is important that the correct Thermostat Kit is always fitted.

n4408l00: DRUM ASSEMBLY WITH FIXED SHAFT

From Serial Number 80901.0001 a new drum with a fixed (Rivetted) shaft has been introduced in production, this drum is interchangeable and will be supplied as the service spare.

Please Note;
There are 2 drum shaft repair kits
Repair Kit for Drums with a Screwed Drum Shaft
Repair Kit for Drums with a Rivetted Drum Shaft
Select the correct kit from the parts list

Note: Only use the correct kit for the Drum fitted to the Dryer.

n4410i00: Introduction of Welling Type 358 Motor

From 17/08/2010 serial No.00817.0001 production started to use a type 358 motor manufactured by Welling, this motor uses a 9µf capacitor.

The Welling 358 motor can be used as an alternative to the previous 358 type motor manufactured by IMEP but a 9µf capacitor must also be fitted.

CAPACITORS
Ana Imep motors had 7.5uf,(6kg models) 8.0uf (7kg models) or 9uf Capacitirs (7.5kg models), fitted in production.
A 9uf capacitor can be used as the service replacement for all machines fitted with a Ana Imep motor.
Welling 358 motors must only be fitted with a 9uf Capacitor.

BOTH 358 MOTORS ARE INTERCHANGEABLE PROVIDING THE CORRECT CAPACITOR IS FITTED

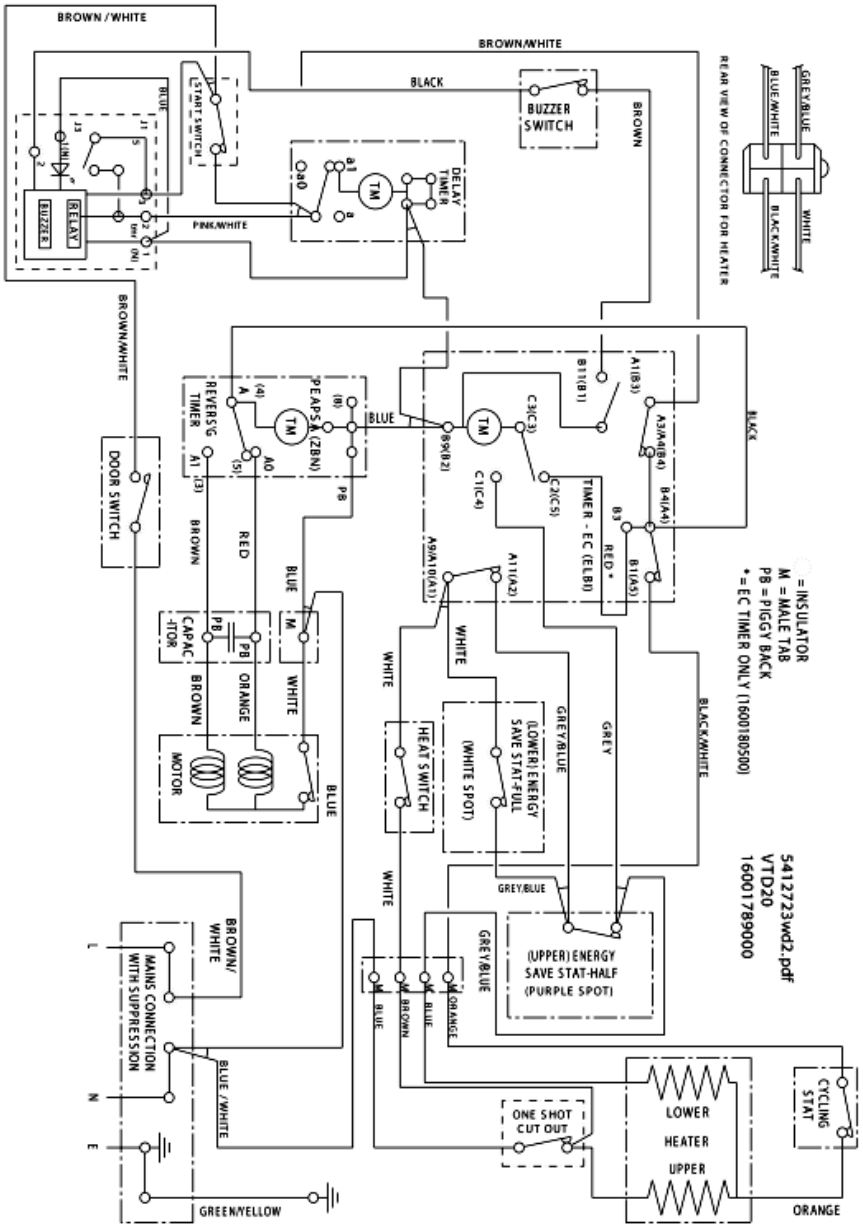

n4409k00: FRONT AIR DUCT & AIR DUCT SEAL

FRONT AIR DUCT SEAL
Both 14mm and 16mm Air Duct Seals have been used in production.
14 mm - used Before Serial No. 50501.0000 (May 2005)and After 00115.0001 (Jan 2010)
16 mm - used Between Serial No.s 50501.0001 (May 2005) and 00115.0000 (Jan 2010) - See note below
If replacing only the Seal - select the CORRECT size from the parts list.
AIR DUCT
White Air Ducts were used in production from 10601.0000 (June 2011), the only difference to the Grey Ducts is the colour change.
WHITE AIR DUCTS ONLY will become the only Service Air Duct Once Stock of the Grey Air Ducts is exhausted
If the original air duct is grey, the air duct kit is required which includes a white filter.
NOTE: ALL SERIAL NUMBERS:
If the AIR DUCT is being replaced you will require a 14mm Seal because the service replacement AIR DUCT is 14mm. See parts List
