General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

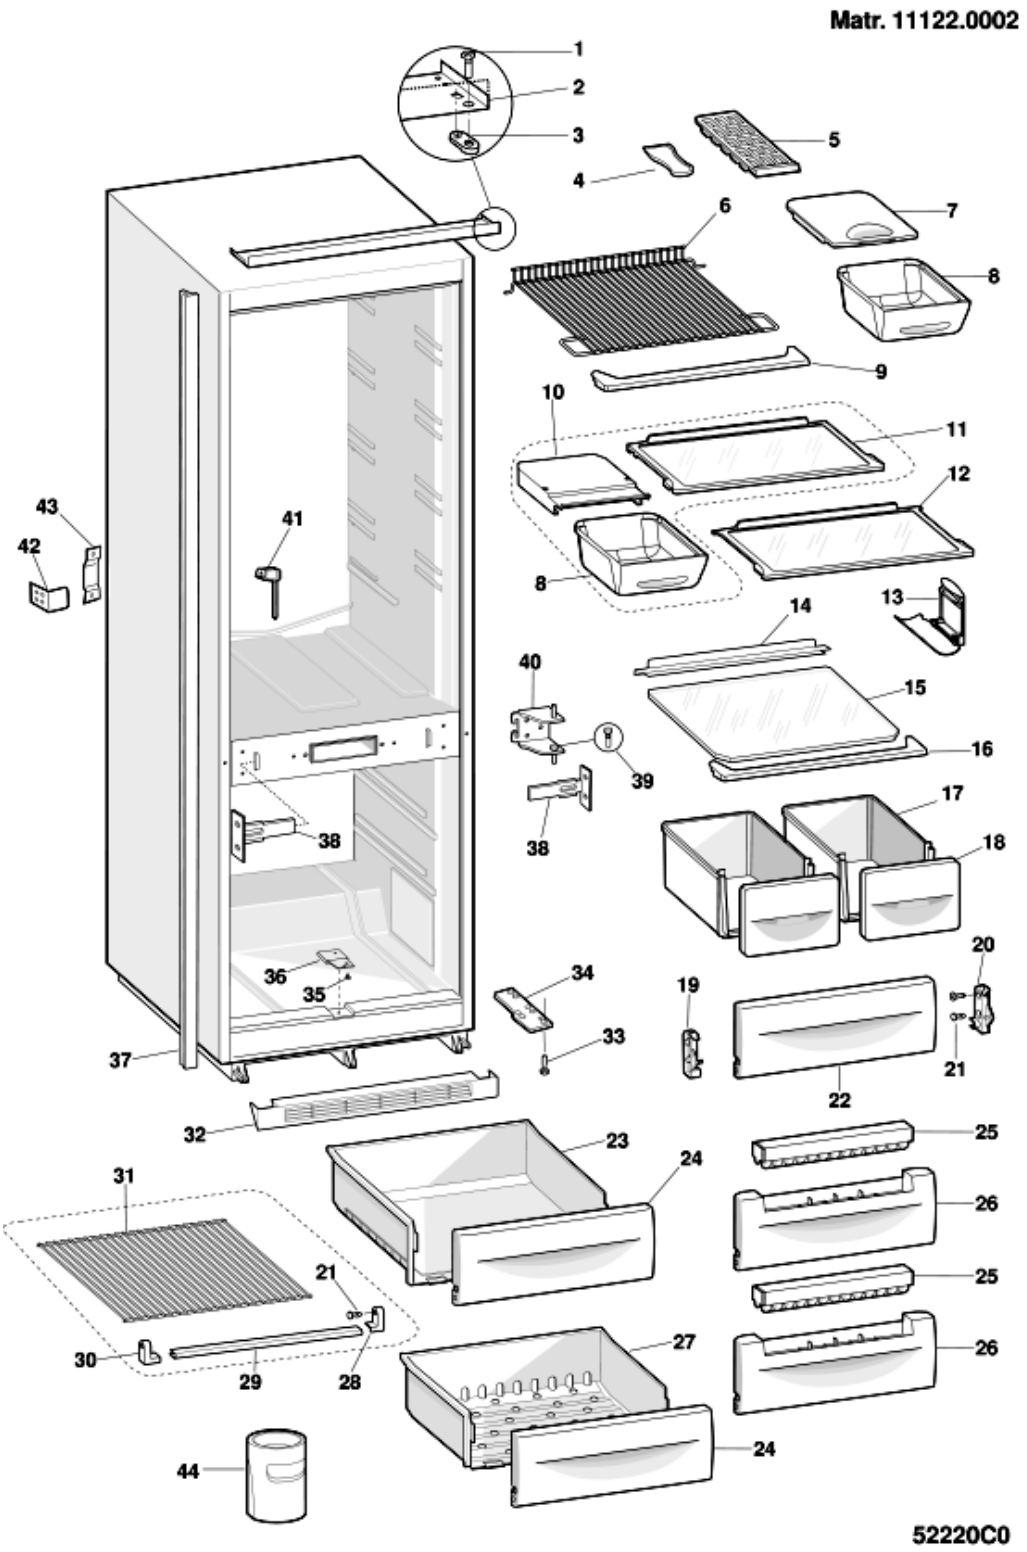

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

0522067: SEALS FOR DOORS FOAMED AS ONE PIECE

Various types of gaskets with different profile, as shown in figures (A) and (B), are used to fix the door (fig. A-5; B-5) and the inner door (fig. A-6; B-6) on the block foamed doors of combined freezers and refrigerators.
---Ilpea profile 245; 179; 412 (fig.A)
---Ilpea profile 287 (fig.B)
When replacing gaskets with profiles 245; 179; 412 these are fixed with screws (2 per corner) to the door.
Gaskets with profile 287 can not be used as spare parts but are designed to house the Ilpea type 900 gaskets (see figure C).
When replacing the gasket (287), once it is removed you will find a pocket (fig. B-1) between the door and inner door.
The rigid tooth (fig.C-1) of the gasket (900) is inserted inside between the pocket and the inner door, doing away with the need for screws.
Gasket with profile 287 is easy to identify since it has an exterior double edge (fig.B-2) which acts as a cushion when the door is closed.
To replace this gasket, follow these steps:
---Dismount the door and cut the four corners of the gasket along the joint (fig.D);
---lift the gasket and pull it carefully along its full length without tearing it (fig.E).
The purpose here is to detach the inner door slightly from the foam along the exterior edge for a depth equal to that of the gasket (fig.B-3);
---lift the corner of the inner door slightly, prising it up with your thumb (fig.F). Do not use a tool which might break the inner door;
---continue cutting the gasket inside the inner door for about 6 mm (fig.G);
---push in the tip of the pliers (type USAG N131) and pull outwards until you see the top edge of the pocket (fig. B-4) which is empty (fig.H-1);
---if you carry out this operation correctly (fig.L) you will be able to pull off the top edge of the pocket for the full length of the door.
If the gasket tears before the top edge (fig. L-2) you should repeat this operation from the other corner of the door.
---once the gasket (287), has been removed the space above the pocket (fig. L-1) can house the rigid tooth (fig. C-1) of the gasket 900.
When you fit this gasket ensure that it lies flush against the edge for the full length of the door.
If the rigid tooth is difficult to fit, eliminate any residues of foam between the door and the inner door in the gasket area.
fig.5131549A

0522076: DOORS FOAMED AS ONE PIECE

As from January-94, the doors of all the one-door and combi built-in models (I) and (K), including the under-cabinet models, will

be foamed in one piece.
The 17.5 mm doors for the following models, are involved by this modification:
---028520 - 032981 Undeer cabinet SKUP100 (3-steps)
---028519 - 032979 Built-in models with narrow door KUP80 litres
---026383 - XXXXXX Built-in models with wide door IUP141
---025375 - XXXXXX Built-in models with narrow door KUP141
---026865 - 032984 Built-in models with narrow door KUP141 Smeg
---031807 - XXXXXX Built-in models with narrow door KUP141 Pigs
---039243 - XXXXXX Built-in models with narrow door KUP141 Indesit
---028520 - 042662 Built-in models with narrow door KRF315 4-stg Ariston
---032981 - 042663 Built-in models with narrow door KRF315 4-stg Smeg
---028520 - 038774 Built-in models with narrow door KRF300 4-stg Ariston
---032981 - 038775 Built-in models with narrow door KRF300 4-stg Smeg
---038628 - 037113 Built-in models with narrow door KRF300 smkt Indesit
---042661 - XXXXXX Under-cabinet fan-models SKVF1200 (ecologic version)
---032102 - 032835 Under-cabinet fan-models SKVF1200 Ariston
---039234 - XXXXXX Under-cabinet fan-models SKVF1200 Indesit
The 17.5 mm doors marked with a fluorescent green dot are manufactured with the pentane cycle used specifically to produce environmental friendly products. This production cycle will gradually be used for the complete range of products.
The gasket with Ilpea 900 profile (see notice 67) should be used as a spare part for the doors foamed in one piece.
The doors of the 2-door refrigerators (concealed models) have been foamed in one piece since July-91 (see notices 113 and 119).
The codes of the block foamed doors for the built-in combined IRF315
model are not shown on the list because this model is no longer in production and the modification has therefore been dropped.

n1025101: Disappearing bulb thermostats (warning!)

The apparatus that provide for the thermostat to be threaded into a small tube located inside the fridge cabinet are noted as versions with "disappearing bulbs".
The bulb must be inserted for a length equal to the position indicated on the colored ribbon (small mark) which confirms the correct position of the bulb in the evaporation area, otherwise causing the poor performance of the apparatus.
Therefore in cases of thermostat replacement it will be necessary to reset on the new, if missing, the same small mark position and always check that the thermostat bulb is completely devoid of the sheath so as to ease its insertion.
The entrance of the small tube, placed in the thermostat container, is protected by a perforation cover in order to avoid the formation of condensation. The perforation cover was initially situated externally and could be substituted with putty or silicone.
For the models with disappearing bulb thermostats, the spare parts are inclusive of the small colored marker,
however check that its position corresponds to that on the thermostat that will be replaced.
The spare part description always notes the position of the small marker in millimeters as well as the thermostat initials.

Example : 074519 = THERMOSTAT A13-0547 C. POST FASTEX (L.390)

n1030071: New control moulding on built-in mechanical 310-330 litre fridge-freezers

---

In January 2004 (serial no. 40119.0001) the Carinaro factory modified the control moulding on built-in 310 and 330-litre fridge-freezers (mechanical), unifying it with that of the electronic version in fixing and eliminating the control support.
The new moulding cannot be fitted on premodification models because also the control box and thermostat knob have been modified.
The moulding is fixed with two screws that are accessed by removing the hole covers.

n1030078: Replacement of light button (032387) on Ariston and Indesit built-in combined fr

---

In April 2004 (serial no. 40406.0001), the Carinaro factory replaced the light button (ARCOLECTRIC) on Ariston and Indesit built-in combined fridge-freezers of the 2000 range.
The new light button (DEKA) cannot be fitted on premodification models, as the two buttons do not have the same dimensions and therefore are not interchangeable.

New parts

092774 - LIGHT BUTTON 250V (NC) DEKA

Parts replaced

032387 - LIGHT BUTTON 250V (NC) ARCOLECTRIC

n1030084: New sliding blocks for fixing the furniture door to the refrigerator door

---

Since October 2004, the Carinaro factory has been using new sliding blocks for fixing the furniture door to the refrigerator door.
The new items are fixed to the side of the refrigerator door, whereas the previous ones were fixed to the front.
The doors are no longer provided with sixteen 2.6 mm holes on the front for fixing the old slides.
The new sliding blocks can also be fitted on premodification models. Proceed as shown in the attached figure (N1030084fig.1).
When replacing the sliding blocks on premodification models it will necessary to replace both guides.
This modification has involved changing the installation KITS

NB - Door spare part codes have not been changed.

N130084FIG1

n1030100: New fixing bracket for combined 310-330 litre built-in models (Carinaro)

Since January 2006 (s/n 60123.0001) the fixing bracket, fitted on the cabinet, has been modified to strengthen the top hinge pin area.
The modification consists of having replaced the plastic bush with a threaded metal bushing (12x15) welded to the fixing bracket. The new fixing bracket can also be fitted on premodification models.

New parts

144558 - HINGE-M8 FIXING BRACKET WHITE (LXDXH 540X90X22)

Parts replaced

075191 - HINGE-FIXING BRACKET WHITE (LXLXH)540X90X22
057839 - WHITE BUSH (27X15X4.6) FOR PIN M8
110027 - WHITE BUSH 27X15X8) FOR PIN M8

n2511b03: COLOR CHANGE BUTTER BOX AND COVER

Only transparent will be managed

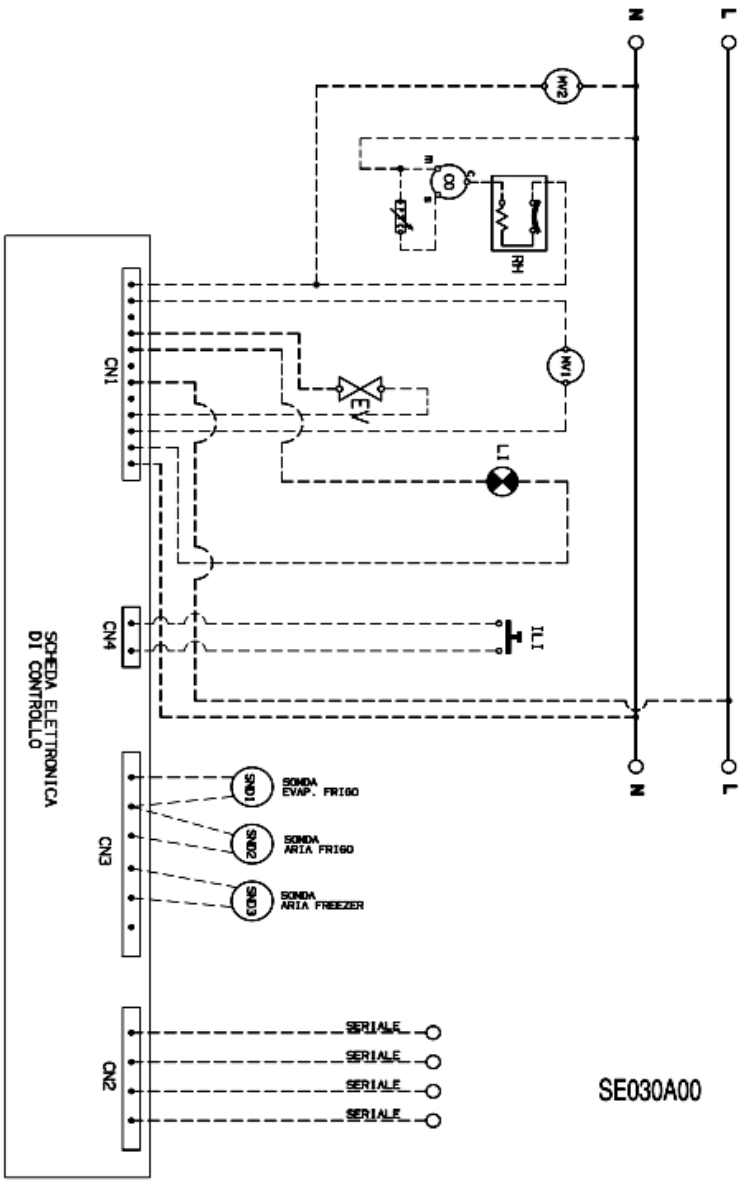

n3010j01: Colour Change of Internal Accessories

The colour of some of the internal shelves and accessories have changed to transparent. This affects models produced in Carinaro-Manisa. Modification is functionally interchangeable therefore once the colour versions of the parts have depleted they will automatically substitute to its corresponding transparent parts. Some parts will have been made obsolete with no substitution.

Some parts have changed from Satin Finish to Shiny (Crystal) Finish. These parts include;
-Door Shelves
-Crisper Front Panels
-Freezer Drawer Front Panels
All pre-modification components will be managed till the end of stock and after they will be substituted with new version.
