INDESIT company

Model type:
HO87EF(IX)

Commercial code:
F026514

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

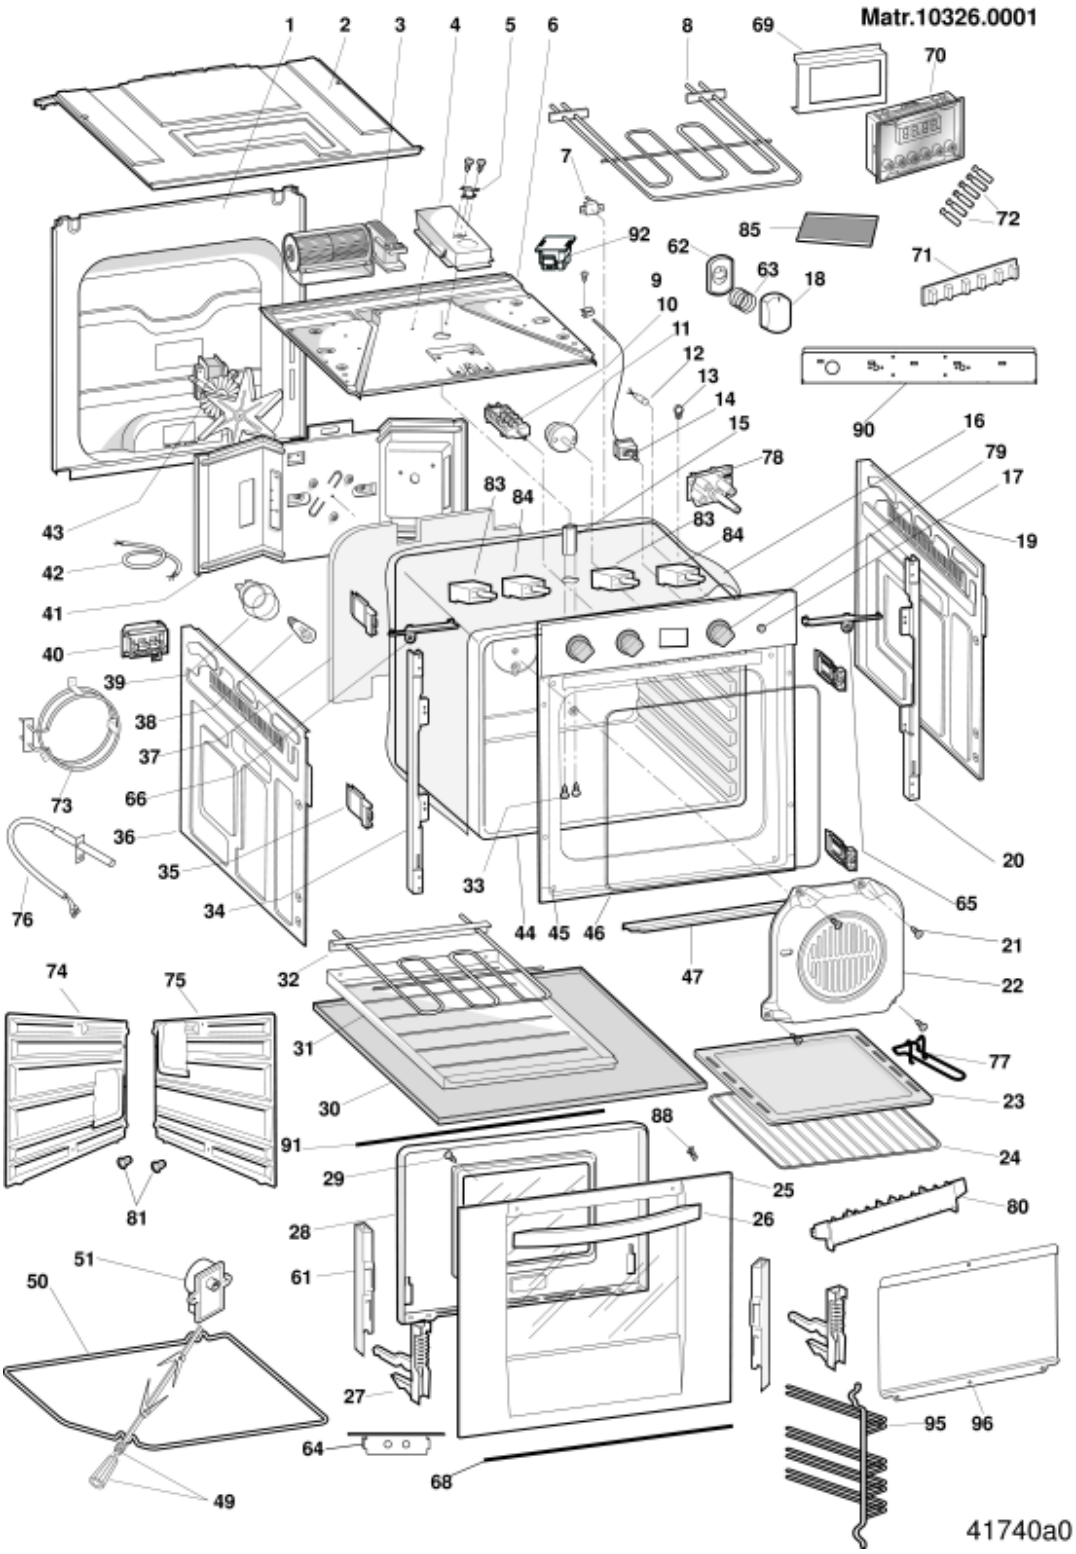

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

n1015019: Connection Connector Kits for New Ovens - Old Cook tops and Old Ovens - New Cook tops.

Connection Kits have been realized to assist in connecting the new ovens to the old cook tops and new cook tops to the old ovens.

The codes of the new items are as follows:

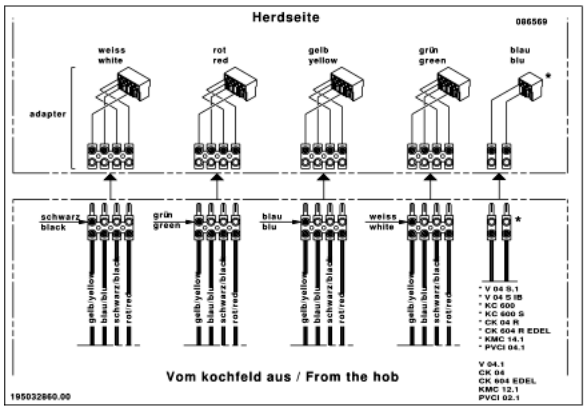

Code SAT 086569 - Connection Kit for old cook tops and new ovens;
Code SAT 086570 - Connection Kit for new cook tops and old ovens;

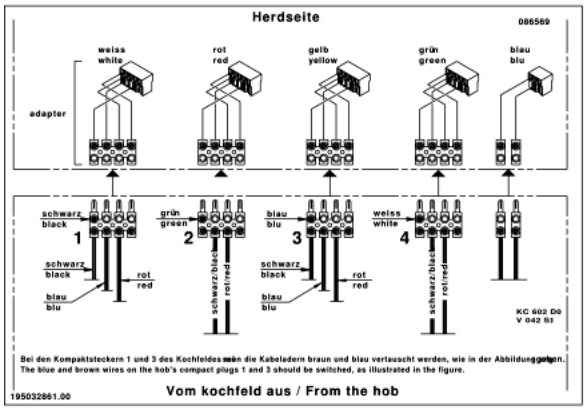

The Kit code SAT 086569 is also equipped with 3 specific diagrams that highlight the connections to be performed, and the same for the Kit 086570.

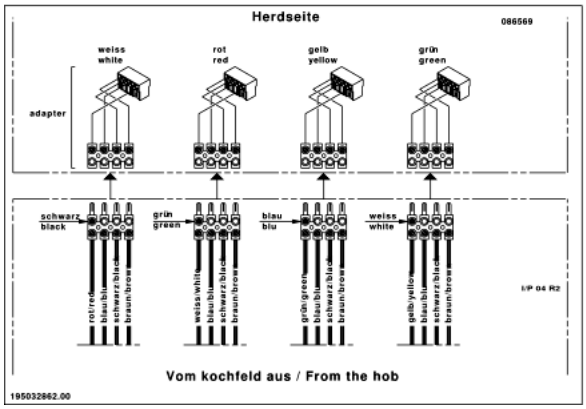

Where the Kit 086569 is used you will need to check the match code on the diagram to the cook top model.
The same procedure is to be performed for the kit 086570.

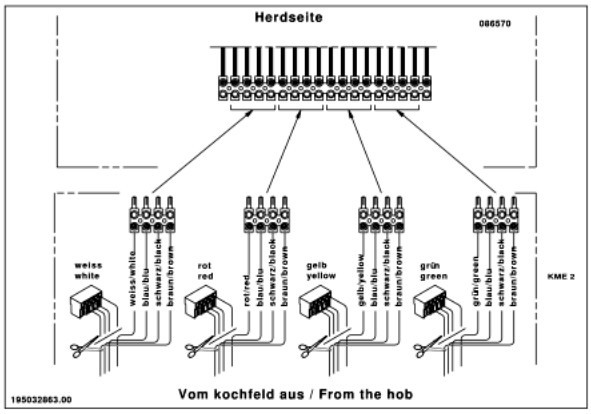

In order to simplify the matching of the kit, we have realized in the enclosed diagrams to this Notice the following four diagrams:

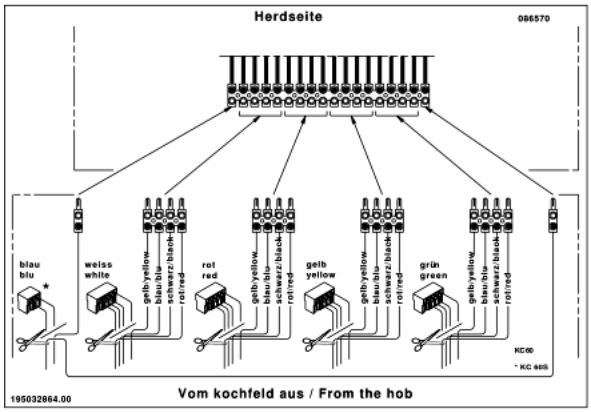

1) Table A referred to the code SAT 086569 for all models of New Ovens - Old Cook tops.
2) Table B referred to the code SAT 086570 for all models of Old Ovens - New Cook tops.
3) Connections diagram kit code SAT 086569;
4) Connections diagram kit code SAT 086570.

n1015040: INTRODUCTION OF ALUMINIUM FLAPS ON TECH OVENS

All ovens of the Tech range produced in the Albacina and Thionville factories and affected by this modification have been equipped with new flaps on both sides, in order to improve quality.
The new aluminium flaps replace the bakelite ones. The new items maintain the same Sat code as the previous ones.
In the event that one of the bakelite flaps needs replacing on ovens with serial number preceding the introduction dates of the aluminium flaps, it will be necessary to order 2 of the new items to avoid aesthetic problems.
The introduction dates and codes of the aluminium flaps are indicated below:
-087267 BLACK RH FLAP (BK) valid from 09/12/02 (e.g. serial number 212090001)
-087268 BLACK LH FLAP (BK) valid from 09/12/02
-083887 ANTHRACITE GREY RH FLAP (AN) valid from 9/12/02
-083888 ANTHRACITE GREY LH FLAP (AN) valid from 9/12/02
-082500 CHROMED RH FLAP (IX) valid from 21/10/02
-082501 CHROMED LH FLAP (IX) valid from 21/10/02
-083881 ALUMINIUM RH FLAP (AL) valid from 21/10/02
-083882 ALUMINIUM LH FLAP (AL) valid from 21/10/02
