INDESIT company

Model type:
LI420

Commercial code:
F030392

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

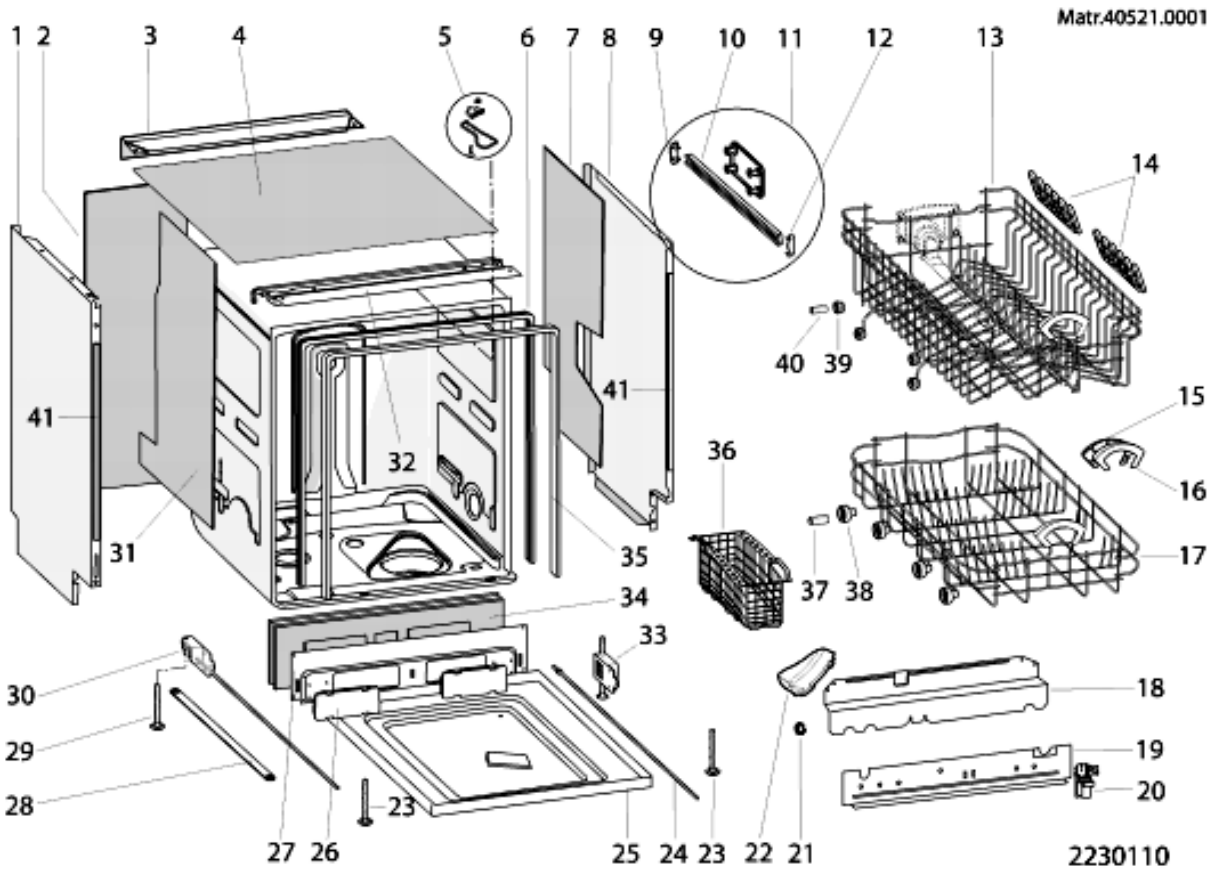

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

n1045048: BIT 100 CARD INITIALIZATION

Free-standing dishwasher

1- Close the door and switch the dishwasher on.
2- Wait for the test cycle to start (2 LEDs light up or "ROD" appears on dishwashers with display).
3- Wait 10 seconds (dishwasher will start to fill water...)
N.B. If the cycle fails to start the card has probably already initialized, so proceed to point 5.
4- To reset the test cycle turn the programme button to reset or hold down the start/reset button for 5 seconds. (Wait for the buzzer to beep three times or if the dishwasher does not have a buzzer, wait for the programme LEDs to switch off.)
5- To check the aforementioned steps have completed successfully, select a programme and see if it starts; (reset it after this check).
6- The dishwasher is ready for the customer.

Built-in dishwashers

1- Close the door and switch the dishwasher on.
2- Wait for the test cycle to start
3- Wait 10 seconds (the dishwasher will start to fill...)
N.B. If the cycle fails to start the card has probably already initialized, so proceed to point 5.
4- To reset the cycle, open the door (2 LEDs lit up) and press the programme button for three bips of the buzzer (or until the programme LEDs go off for dishwashers with no buzzer).
5- To check the aforementioned steps have completed successfully, press the select programme button and check that the indicator light beside the corresponding programme comes on.
6- The dishwasher is ready for thecustomer.

n1045084: Elimination of duct fixing pin code 056342

Duct fixing pin code 056342 has been eliminated from all dishwashers affected by this note, modifying the connection between the feeder-distribution assembly and the internal duct.

Introduced items:
Internal duct 110527

Feeder-distribution assembly 110526

Eliminated items:
Internal duct 054926
Feeder-distribution assembly 094134 (EX 054871)
Duct fixing pin 056342

The modification has been introduced progressively, starting from serial no. 40517.0001.

n1045085: Introduction of new litre counter turbine integrated on air-break.

All dishwashers affected by this note have been equipped with a new litre counter turbine on the air-break.
Picture N1045085FIG1 illustrates the premodification structure, picture N1045085FIG2 the new structure.

Items affected by the modification.

AIR-BREAK:
new 110610;
premodification 094174;
the new item features a new integrated litre counter turbine and its water supply hose has a smaller diameter.

LITRE COUNTER TURBINE code 094172 has been eliminated.

SOLENOID VALVES:
new:
1-WAY code 110611;
2-WAY code 084558(Rohs 143737);
premodification:
1-WAY code 094227;
2-WAY code 094168;
the new solenoid valves have a smaller diameter drain hose fitting.

HOSES:
new solenoid valve hose/air-break code 110612;
premodification turbine hose/air-break code 094267;
premodification solenoid valve hose/air-break code 094267;
the new hose has a smaller internal diameter.

WIRING:
the litre counter turbine connecting cable is longer, but since the connector is the same, the new item can be used in place of the premodification one.

n1045128: New airbreak - solution of water spurts leaking from base LVS 45 CM

From serial number 50930.0001, to solve the problem of water spurts emitted from the lower right and left side of the door the following modifications were introduced in production:

1-Airbreak without insert to allow the necessary pressure venting
2-Honeycomb top panel to protect the kitchen unit from any steam emitted (only on built-under models)
3-Tank seal length increased by 3 cm to improve water tightness
4-Two clips for correct fixing of the tank base seal (in production from serial number 50701.0001)

New parts:
C00141308 - Airbreak
C00141514 - Honeycomb top panel (built-under versions only)
C00141316 - Tank seal
C00140679 - Tank base seal fixing clip

Premodification parts
C00110610 - Airbreak
C00116516 - Tank seal

1) AIRBREAK REPLACEMENT
It is mandatory to use the new part; in the event of replacement with premodification appliances proceed as follows:
- replace the airbreak with the new part C00141308
- on the built-under version, fit honeycomb panel C00141514 on the top of the appliance
- replace tank seal with the new seal P/N C00141316

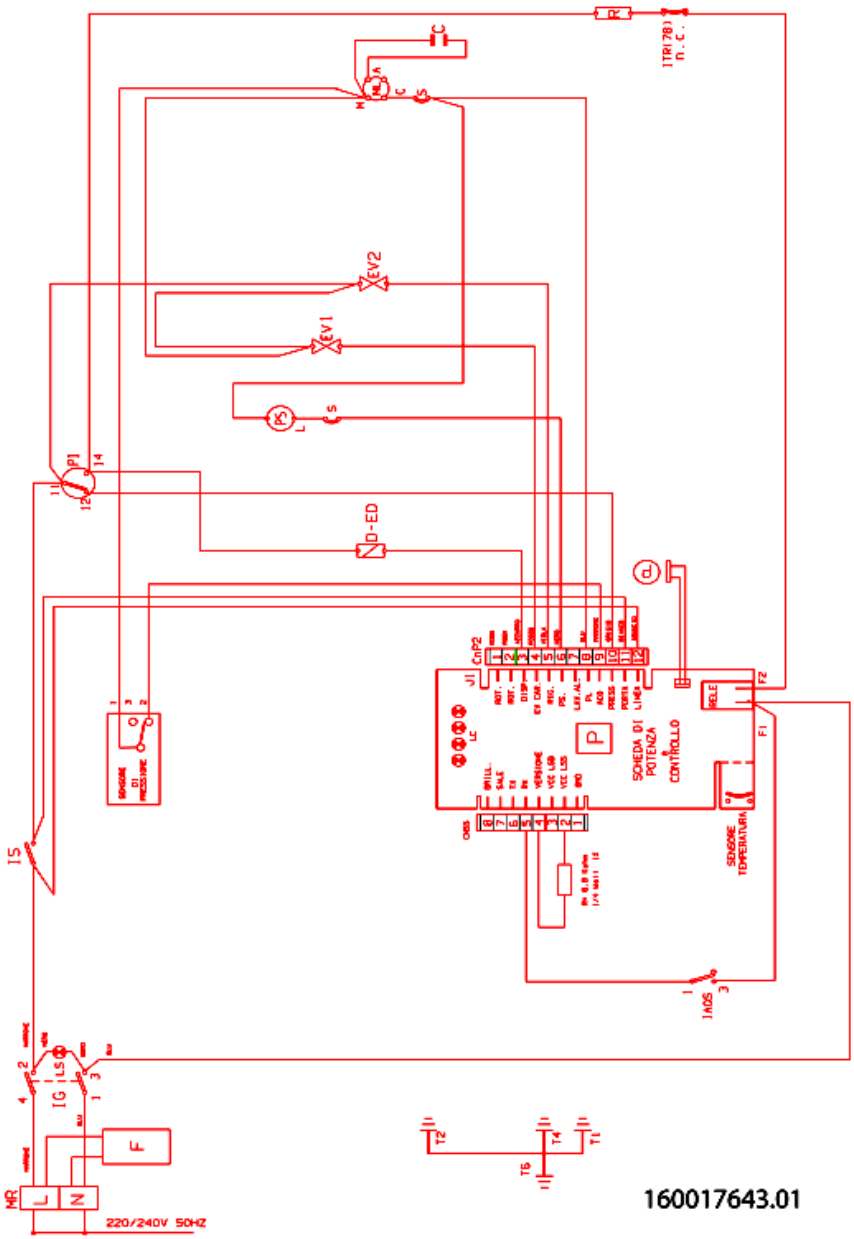

WARNING: when replacing an airbreak without a litre-counter turbine use exclusively the same type of part (P/N C00094174 - all the relevant details are given in bulletin n1045085)

2) CHANGING THE TANK SEAL

On appliances with serial number from 40101.0001 to 50930.0001, you can use the new tank seal P/N C00141316 after cutting 1.5 cm off each end.
