INDESIT company

Model type:

FO98P.1 IX DIGITAL

Commercial code:

F028350

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

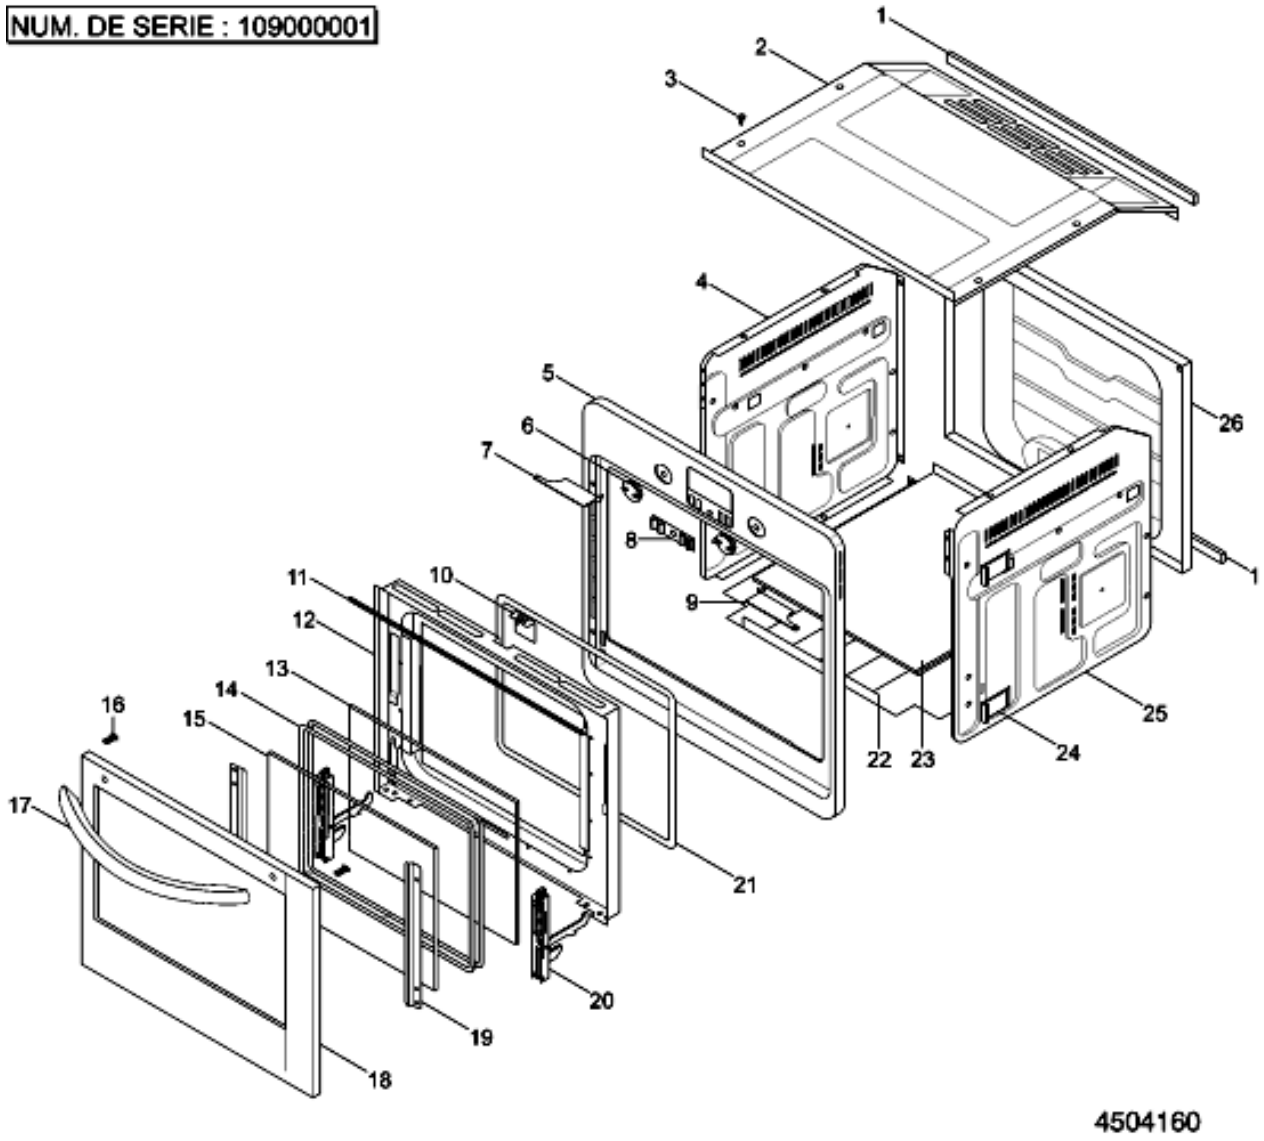

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

0450312: MODIFICATION OF WINDOW - ENAMELLED DOOR

From serial number 303200001 onwards, modification of the window / door fixing system.

- Replacement of the enamelled door 140076 by the enamelled door 094299
- Replacement of the pyroclips seal 138863 by the pyroclips seal 096820
- Replacement of the window unit IX 140198 by the window unit IX 097823

The new parts are not interchangeable with the old ones.

n1015047: INTRODUCTION OF ALUMINIUM TAPE ON ALBACINA ELECTRONIC OVEN RACEWAY

From serial number 30303.0001, all built-in ovens produced in the Albacina factory and affected by this modification, have been fitted with a special aluminium tape (cod. 094295) to close the space between the front and the raceway. This modification has been introduced to prevent condensate from forming in the intersection area of the raceway and oven front. This formation could cause malfunction of the display.
To carry out the modification, proceed as described in the four pictures below.

PULIRE LA SUPERFICIE CON UN PRODOTTO SGRASSANTE (TIPO ACETONE)

CLEAN THE SURFACE WITH A DEGREASING AGENT (E.G. ACETONE)

NETTOYER LA SURFACE AVEC UN PRODUIT DÉGRAISSANT (TYPE ACÉTONE)

DIE OBERFLÄCHE MIT EINEM ENTFETTER REINIGEN (Z.B. AZETON)

LIMPIAR LA SUPERFICIE CON UN PRODUCTO DESENGRASANTE(TIPO ACETONA)

LIMPAR A SUPERFÍCIE COM UM PRODUTO DESENGORDURADOR (TIPO ACETONA)

POSIZIONARE IL NASTRO IN MODO DA FARLO ARRIVARE FINO
AL LIMITE DELLA CANALIZZAZIONE

POSITION THE TAPE SO THAT IT REACHES THE END OF THE RACEWAY

POSITIONNER LE RUBAN DE MANIÈRE À LE FAIRE ARRIVER
AU BORD DE LA CANALISATION
