General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

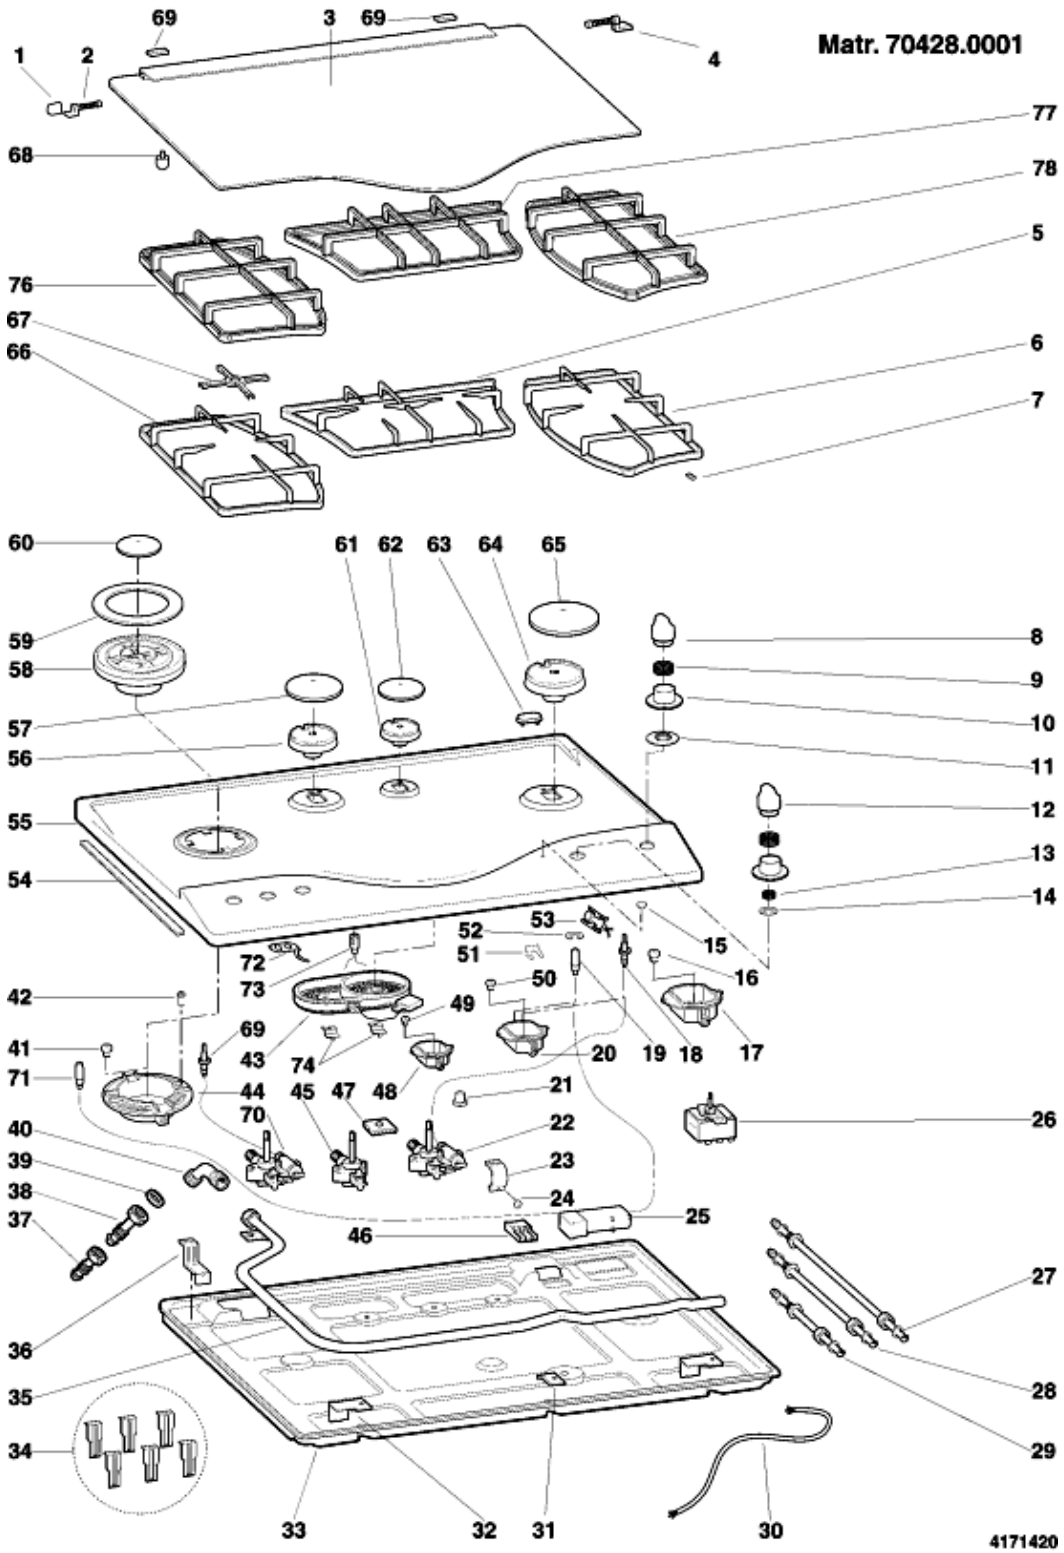

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

n1010002: Introduction of the New Grids - PH940/1

Beginning with serial no. 71013.0001, new grids made of folded black plate are being used on the following built-in cooktops: PH940M, PH940MS, PH941M and PH941MS. They are not individually interchangeable with the pre-modification ones made of punched black plate. Punched grid part no.:053168 Folded grid part no.: 054643
Punched grid part no.:053170 Folded grid part no.: 054644
Punched grid part no.:053171 Folded grid part no.: 054645
The new grids are interchangeable with the pre-modification ones when treated as a group and vice versa.

n1010003: Introduction of New Gas Valves and Tubes - PH6/9

Beginning with serial no. 80119.0001, the PH6 and PH9 cooktops with safety device will use three new valves and gas supply tubes which area not interchangeable with the pre-modification ones.
The part nos. for the pre-modification valves and tubes are as follows:

VALVES	GAS SUPPLY TUBES
052981	052942
052982	052943
053172	052944

The part nos. for the new valves and gas supply tubes are as follows:

VALVES	GAS SUPPLY TUBES
057596	057599
057597	057600
057598	057601

The new gas valves can be replaced with the pre-modification ones only if the gas supply tubes are replaced as well with the pre-modification ones. The pre-modification gas valves can be replaced with the new ones only if the gas supply tubes are replaced as well with the new ones.

n1010005: Introduction of a new triple ring thermocouple

Beginning with serial no. 81116.0001, a new tap and thermocouple which are not interchangeable with the pre-modification ones have been introduced on hobs PH6 and PH9 with triple ring burner.
The pre-modification part numbers will continue to be handled normally.

This modification improves the reliability of the component considerably and is advisable should the pre-modification components be faulty.

Old part no. -> New part no.

n1011k03: Intervention on Micro e Copreci taps

In the hobs with industrial code inferior to 03xxxxxx0300 there has been used taps Micromeccanica that are not managed as spare part, so in case of the intervention order the kit taps C00288966.

In the hobs with industrial code superior to 03xxxxxx0300 there has been used taps Copreci so in case of intervention it is possible to order each singular tap C00111240 or C00111241.

See tap kit content on the figure attached.

n1015018: New Value knobs to co-ordinate with the Style ovens.

From the registration no. 10723.0001
The Value knobs have been introduced on certain Ariston cook tops : PF7, PH6, PH9
to co-ordinate with the new Ariston STYLE ovens.
The old knobs will be handled normally.

New gas knobs are: 084021 WH
084017 BK
084020 IX
084019 AN

New electric knobs are : 084022 WH
084018 BR

n1015066: INTRODUCTION OF COPRECI COMPONENTS ON PH HOBS WITH SAFETY DEVICE

All Ariston PH6 and PH9 built-in hobs with safety device and Hotpoint GF64 hobs have gradually been equipped with Copreci components in place of Micromeccanica items (taps, microswitches, tap fixing clamps and relevant screws). The new components are interchangeable separately with the premodification items, which will continue to be stocked by the Spare Parts Warehouse as they are used on other products. The hobs equipped with Copreci parts have different INDUSTRIAL CODES. The excel table below (n1015066fig1) indicates all the modified hob models with relevant industrial code.
Besides the parts mentioned above, the introduction of Copreci parts has also involved changing cup-tap supply pipes. When replacing Copreci pipes it is necessary to order:
- SAT code 111603 = aluminium pipe
- no. 1 nut SAT code 058507
- no. 1 nut SAT code 010401
- no. 2 washers SAT code 111602

Given below are the tables of components divided by hob type:
- list of Micromeccanica components (for premodification hobs)
- list of Copreci components (for modified hobs)
