General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

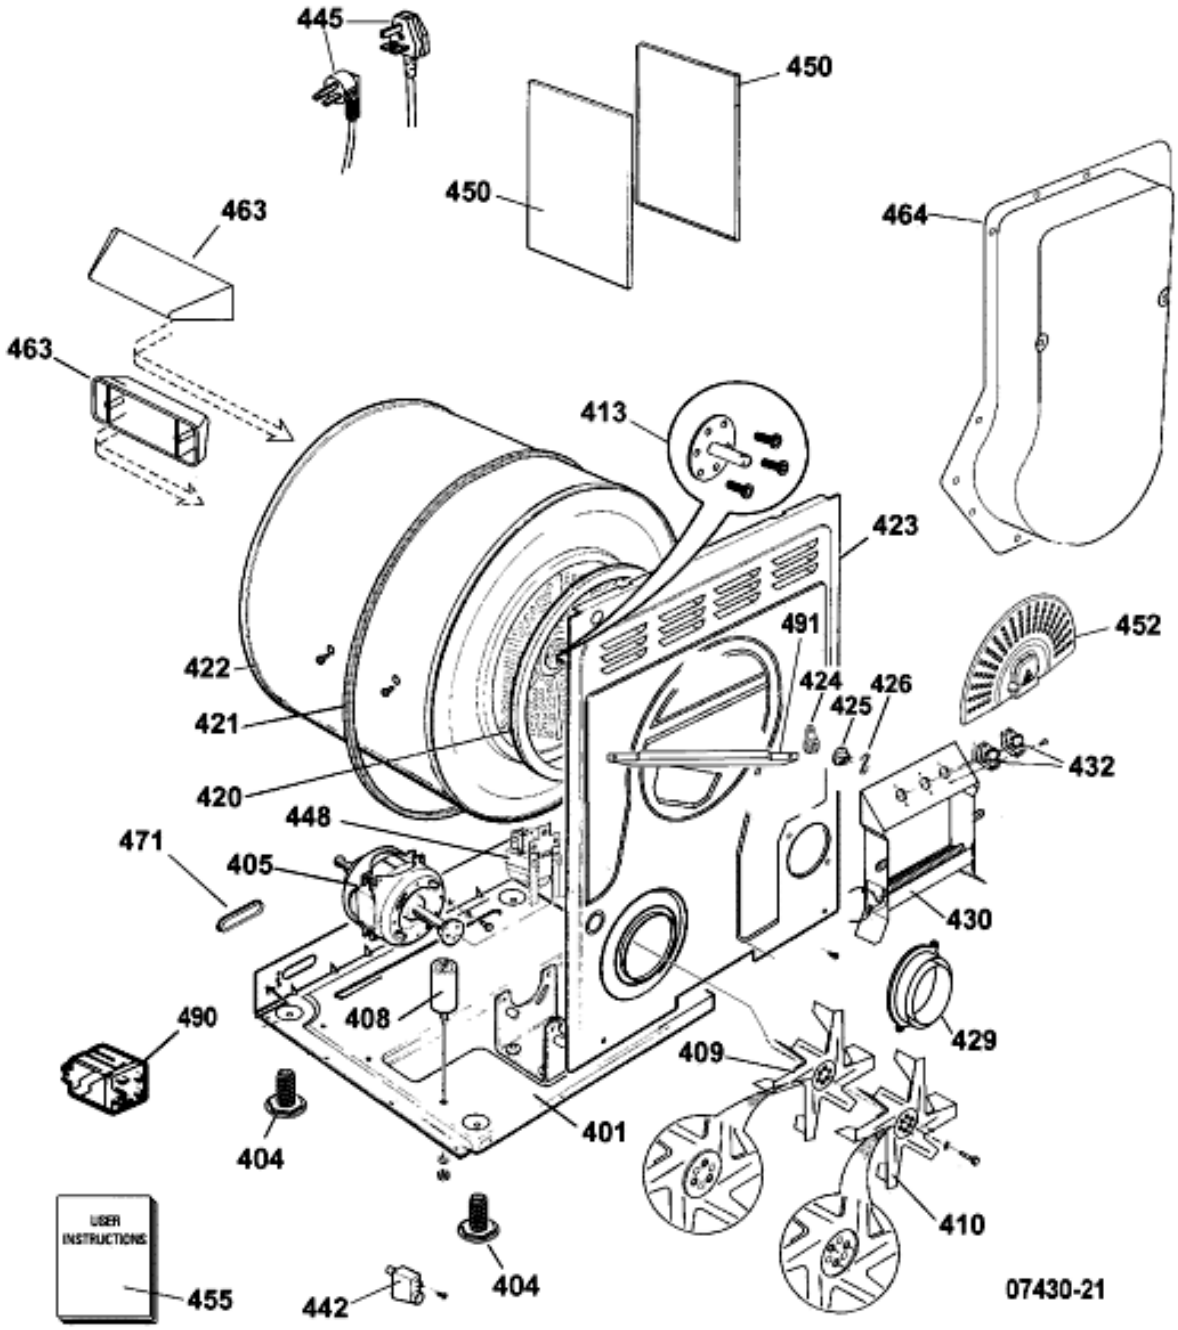

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

n4408a01: VENTED TUMBLE DRYER HEATERS

From Serial Number 70802.0001, Two different Heater manufacturers were used in production. These DBK and Blaissi Heaters are totally interchangeable if replaced as an assembly.

But the thermostat kits for these Heaters are not interchangeable.

From Serial number 70802.0001, before a Stat. Kit is replaced the heater fitted to the machine must be identified first.
The cover of the Blaissi heater has 2 raised dome shaped pips, there is also a Blaissi Label inside the heater attached to the inside of the heater cover
The Cover of the DBK Heater has 4 raised dome shaped pips.

DBK heaters and covers are used as service spares, therefore if a heater or cover have previously been replaced further identification is required.

The DBK heater element wire is in a strip.
The Blasi heater element wire is circular.

For the Dryer to work correctly the correct Heater and Stat. Kit must always be fitted.

See “Parts List” to select required part.

n4409k00: FRONT AIR DUCT & AIR DUCT SEAL

FRONT AIR DUCT SEAL
Both 14mm and 16mm Air Duct Seals have been used in production.
14 mm - used Before Serial No. 50501.0000 (May 2005)and After 00115.0001 (Jan 2010)
16 mm - used Between Serial No.s 50501.0001 (May 2005) and 00115.0000 (Jan 2010) - See note below
If replacing only the Seal - select the CORRECT size from the parts list.
AIR DUCT
White Air Ducts were used in production from 10601.0000 (June 2011), the only difference to the Grey Ducts is the colour change.
WHITE AIR DUCTS ONLY will become the only Service Air Duct Once Stock of the Grey Air Ducts is exhausted

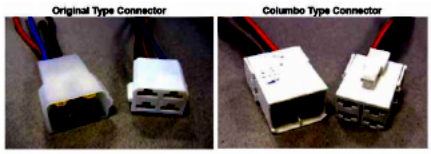

If the original air duct is grey, the air duct kit is required which includes a white filter.
NOTE: ALL SERIAL NUMBERS:
If the AIR DUCT is being replaced you will require a 14mm Seal because the service replacement AIR DUCT is 14mm. See parts List
