INDESIT company

Model type:

BAN12NFSUK

Commercial code:

F035376

F040166

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

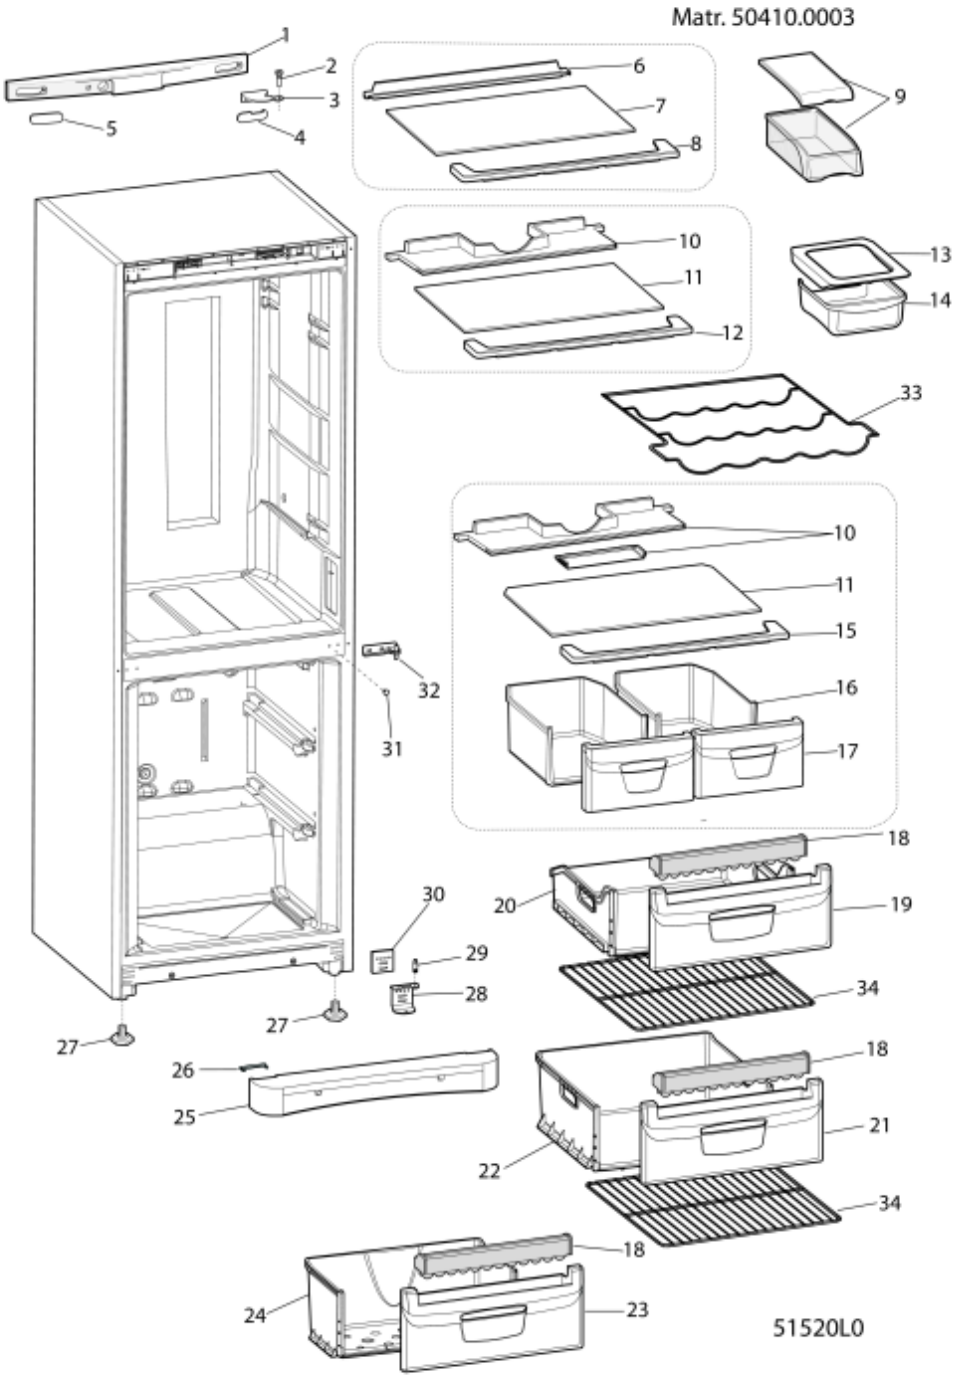

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

n1025093: Doors / weather stripping combined fridges / freezers Indesit/2000 Melano and Setubal

---

With the exception of the model R45, width 700 mm produced in Turkey (Manisa), on all the combined fridge and freezer models in the Indesit (range 2000), width 600 mm produced in Italy (Melano) and in Portugal (Setubal), Poland (Lodowek) the doors handled as replacement are without weather stripping because this is no longer blocked between door and counter-door.
The weather stripping has a new profile and is located in the housing resulting along the external perimeter of the counter-door, where it is threaded through by simple hand pressure. To remove the weather stripping it will suffice to unthread it from its housing without any other operation.

Therefore in case of replacement of the door the weather stripping may be recovered from the existing door, however the weather strips are handled singularly as a spare part.

n1030092: PCB 119388 (new reed switch position) mechanical no-frost fridge-freezers(Melano

---

As from September-05 (serial number 50901.0001) the factory started installing a control panel PCB with the reed switch positioned on the upper side of the board on Ariston no-frost fridge-freezers (05 range) (see N1030092fig1).
This modification was needed to improve alignment between the reed switch and magnet for the door open signal (the reed switch was initially mounted on the bottom of the PCB (solder side), see photo N1025150fig2.
Moving the reed switch on the PCB also involved modification of the cabinet control panel, on which the two tabs have been eliminated to allow the PCB to be fitted correctly (see photo N1025150fig3).
On premodification models replacing PCB P/N 119388 calls for the service engineer to remove the two tabs from the control pane

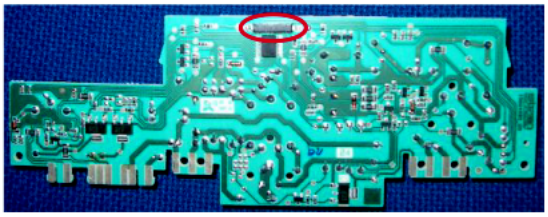

The PCB and and cabinet control panels managed as replacement parts are already aligned with the modification described.

Parts affected:

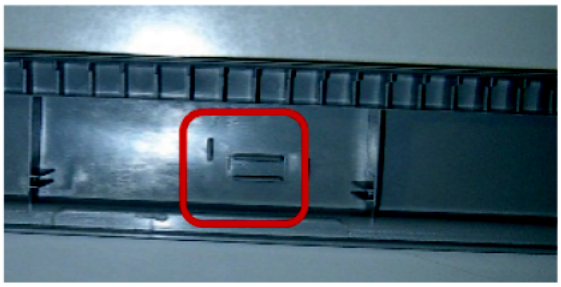

C00119388(Rohs 143103) - ELECTRONIC THERMOSTAT PCB (FZ NF-MEC)

C00119618 - POLAR WHITE CONTROL PANEL (MECHANICAL-NF) 596X55

n1030097: No-frost combi 28 watt drip tray heating element (width 60) Ariston - Indesit

---

In the event of breakage of the heating element utilised on the appliance for defrosting of the drip tray, use the 28 watt heating

N1030092FIG1

C00119388

element (C00140585) and cable supplied as replacement parts.
For the use of these parts refer to the Technical Bulletin "TB001007" (ex STN - CL 0602.2) sheet entitled: "Broken drip tray heating element Platform 2005 NF W60"

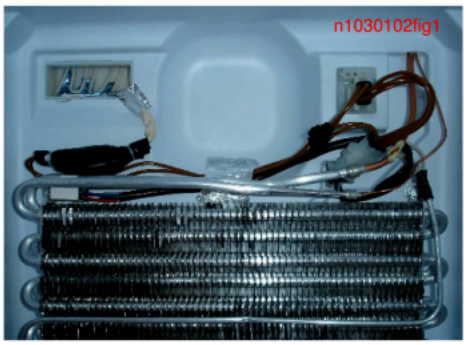

n1030102: Ice formation in the duct

There are managed two kits C00143953 and C00271924.

Check the Technical Bulletin TB001008

N1030102FIG1

n2510j00: SUBSTITUTION LOWER HINGE PIN

In order to make better the assembly and to prevent an accidental unscrewing of lower hinge pin with consequent falling down of the door, original pin has been substituted by another one longer.

In the course of the time more than one pin has been tested, therefore the history of the substitutions is reported:

C00017658 (13.5mm) --> C00259768 (21mm) --> C00281425 (23mm)

For quality issues on interested models is managed only the last one C00281425 (23mm).

n2511b02: ELIMINATION COVER FOR UPPER DOOR SHELF-INTERNAL ACCESSORIES

RESTYLING

Cover for upper door shelf has been eliminated. The upper door shelf has been standardized with the middle one. Subsequently has been standardized with transparent internal accessories instead of those in light blue colour once stock has depleted.

n2512d01: BOTTLE HOLDER ELIMINATION

BOTTLE HOLDER HAS BEEN ELIMINATED FROM PRODUCTION

n3007c02: Color change on inner door upper heading

From s/n 70129.0001 (January 2007) on teak – inox – silver Indesit models has been introduction in production a new white inner door upper heading / white hinge blanking plate.
The spare part code of the door remain the same.
When replacing the door in the products produced before the modification replacing also the brown hinge blanking plate (for teak versions), grey (for silver version), aluminium (for inox versions) with the white.

n3007k06: REED SWITCH & NEW MODULE

Change of Position for Reed Switch
From serial number 50901.0001, the reed switch that controls the interior light will be positioned on the component side of the PCB as apposed to the soldered side.
This is to improve the alignment of switch and the magnet mounted in the door.
If fitting to an appliance that still has the original control panel it will be necessary to remove the corresponding plastic tabs before refitting. New control panels will have these tabs removed.
Change of Module
Starting 11th September (serial number commencing 70911) this model was updated and has two sensors rather than just the one. This necessitates a change of module.
It is important that engineers understand the difference and use the correct replacement module.
The second sensor is to control the evaporator defrost.

n3008i01: SURFACE MOUNT GUTTER HEATER

If the gutter heater fails, a SERVICE replacement AND link harness are available.
Visually check before ordering either Inarca or Amp Link Harness or refer to the serial numbers on the VIEW LIST tab.

The heater has an adhesive backing to secure it to the gutter moulding. It is important that the area is dried properly before attempting to affix the new heater.
All parts are listed in the parts list with image 07324-03 as items 999.

n3011k00: COLOR CHANGE

Color has been changed on control panel, hinge covers, push buttons, knobs. Painted parts has been replaced from those colored by mass.

n3012b00: EGGS HOLDER ELIMINATED

---

n3009i01: CHANGE DAMPER

OLD version C00118571 is not interchangeable with C00275656 (replace C00118571 with C00275656=OK; replace C00275656 with C00118571=KO).

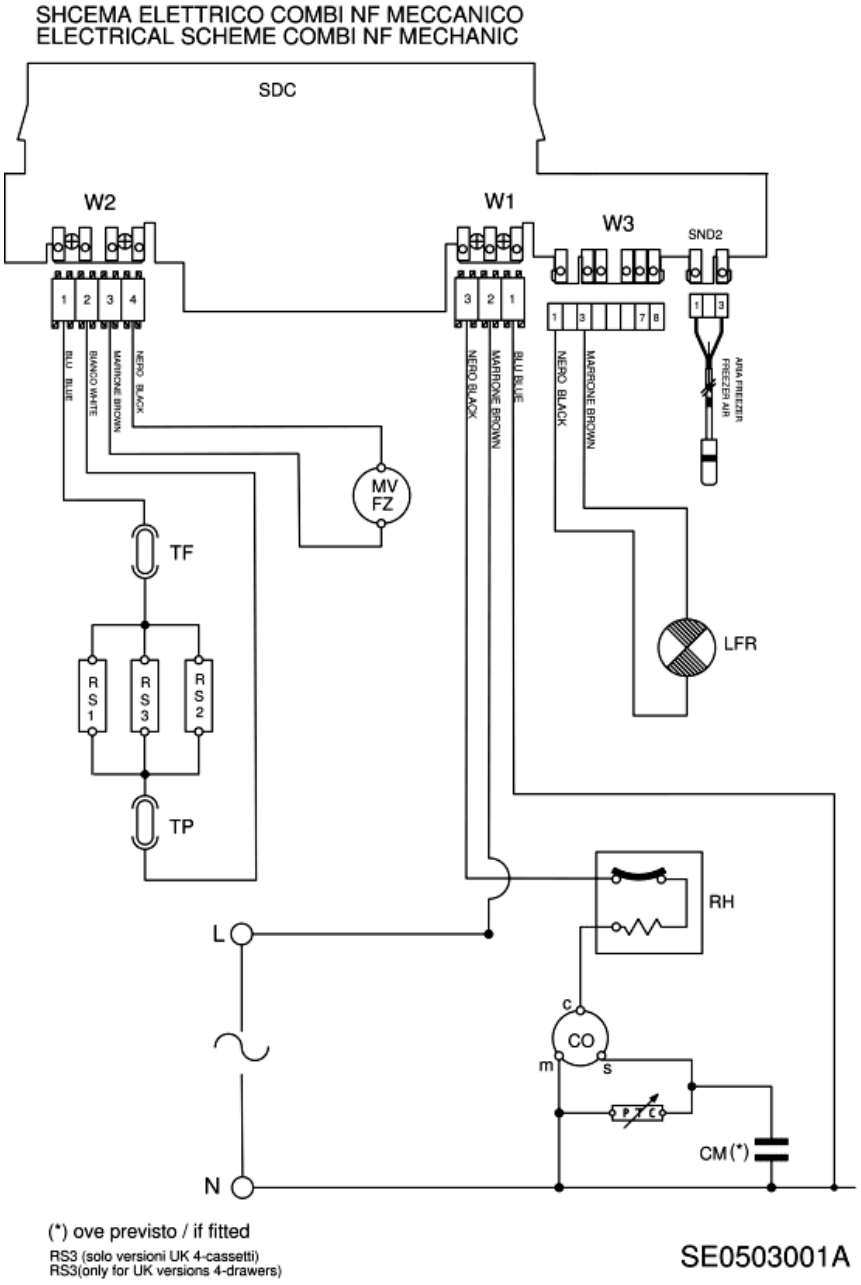

C00118571 will be used until the end of pieces in stock, after that moment it will be manged only new version C00275656.

OLD version C00275656 is not interchangeable with C00285439 (replace C00275656 with C00285439=OK; replace C00285439 with C00275656=KO).

C00275656 will be used until the end of pieces in stock, after that moment it will be manged only new version C00285439.
