INDESIT company

Model type:
FB21A.2(WH)

Commercial code:
F029019

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

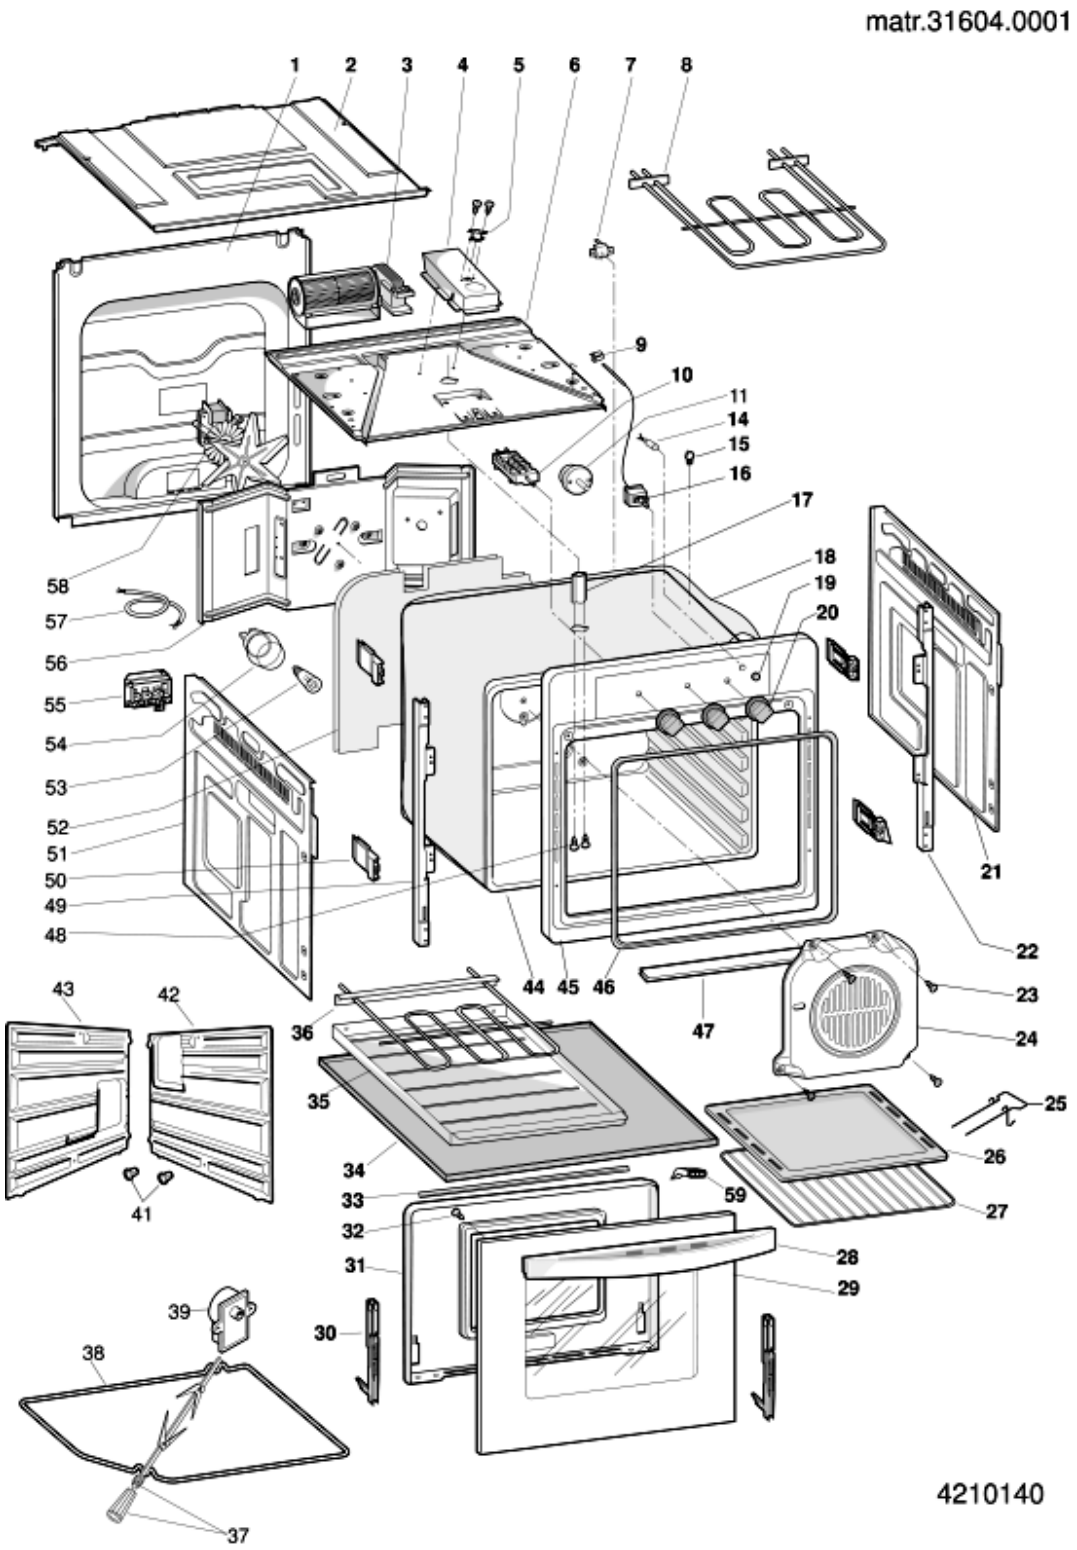

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

n1015028: Forced ventilation FB21A, FB51A, FB21A.2 e FB51A.1

Models FB21A, FB21A.2, FB51A, FB51A.1 can be fitted with a forced ventilation kit to improve general cooling and cooling of the oven door handle. The kit comprises:
FB21A
-specific front panel (depending on the colour of the oven)
-089129 raceway installation
-089130 tangential fan
-089120 screw (8 pieces)
-081600 klixon (replaces 121897)
-089131 wiring
-089132 installation instructions

FB51A
-same kit as for model FB21A + electrical oven thermostat code 081597 (replaces 082365)

The following is a list of the front panel codes (according to colour) to be used in specific cases when fitting the forced ventilation kit:
-082466 for FB21A stainless steel (replaces 082412)
-082463 for FB21A white (replaces 082363)
-082465 for FB21A black (replaces 082411)
-082383 for FB51A stainless steel (replaces 082456)
-082403 for FB51A white (replaces 082455)
-081596 for FB51A black (replaces 082454)
-086714 for FB51A aluminium (replaces 084696)
-094599 for FB21A.2 black (replaces 094776)
-094597 for FB21A.2 inox (replaces 094778)
-094615 for FB21A.2 white (replaces 094772)
-094707 for FB51A.1 black (replaces 094720)
-094713 for FB51A.1 inox (replaces 094724)
-094719 for FB51A.1 white (replaces 094723)

The electrical diagram for the oven with forced ventilation kit fitted is included in the documentation and can be distinguished from the diagram for the oven without this kit by the words at the bottom of the figure "ELECTRICAL DIAGRAM... WITH FORCED VENTILATION KIT"

n1015100: POLAR WHITE FACTORY 03 (ALBACINA)

From serial no. 50504.0001, the new "Polar white" colour is used on all appliances produced in factory 03 in place of "White 27".

All models affected by this modification have a new industrial code.
To determine the new Polar White codes, it is necessary to know the industrial code or serial number of the appliance being repaired.

The new items, which bear the initials "PW", are not aesthetically interchangeable with premodification items as the whites are different.

Given below is the list of products/industrial codes (equal or higher) affected by the introduction of the new Polar White colour.
