INDESIT company

Model type:
TA47FR

Commercial code:
F036739

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarly have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:

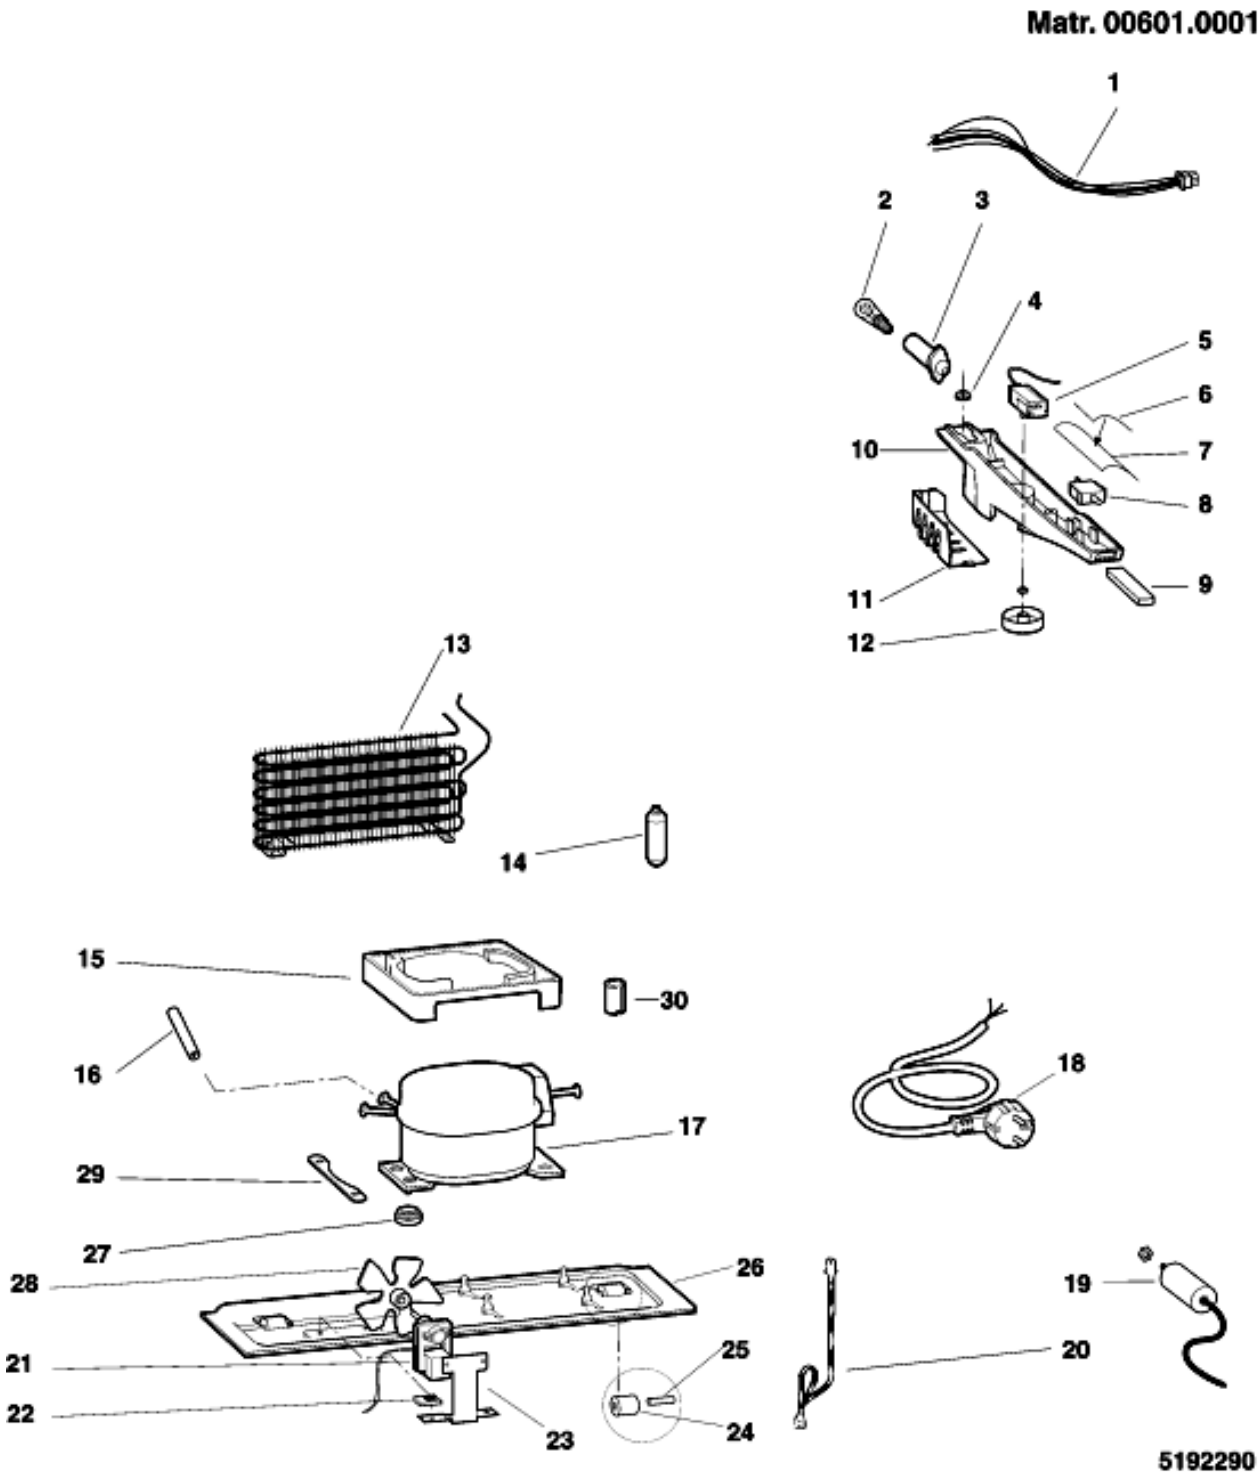

REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

n2510b00: SUBSTITUTION RUBBER BUFFER FOR COMPRESSOR

Since month of February 2010 has been substitute in assistance the rubber buffer for compressor C00089673 with the C00109592.
Substitution is not valid for the products which use JIAXIPERA compressors respectively differentiate for type, Single Door (SD) / Double Door (DD) or different:

SD/DD C00089673 --> C00277320
NOT SD/DD C00089673 --> C00032453

n2510e00: ELIMINATION OF ICE BOX INTEGRATED ON DOOR

From S/N 00218... on DD L70 models has been deleted ice box integrated in inner door and it has been substituted with door without integrated ice box plus added of "normal" ice box. At the end of stock will be managed only doors without integrated ice box.

SUBSTITUTED CODES ARE:

C00117948
C00098205
C00117771
C00110211

NEW CODES ARE:

C00196559
C00117027
C00252517

n2511i00: ACCESSORIES' COLOR CHANGE

Light blue/light green accessories has been replaced with those in transparent version. At the end of stock only transparent spare parts will be managed.

n2511k01: ICE TRAY STANDARDIZATION

Ice tray has been standardized in order to manage only 12cubes version.

n2512b03: Thermostat box kit (low Ambient Temp. +16?C)

As of February-2012, the "thermostat box KIT for low ambient temperatures" is being handled with part number C00290221 and is to be used on DD STATIC L70.
The kit should be used exclusively to solve those problems obtained due to the poor performance of the freezer due to an ambient temperature below +16°C.
The kit is innovative, as it has a 4 Watt resistance fitted inside the thermostat box that should be activated by the toggle switch with a rubber protection situated underneath the thermostat knob. The switch is activated when the ambient temperature drops below +13°C.
This resistance heats up and enables the thermostat to be reactivated, thereby allowing the appliance to operate correctly.
On the thermostat box, the resistance is glued onto an aluminium plate (58x60) itself glued to the box.
When replacing the thermostat box, no components should be re-used, and this includes the wiring.
The wiring in the kit has terminals with fastons for connecting them to the compressor's terminal board.
Moreover, on the models that use the hidden bulb thermostats, the position of the mark should be remade on the thermostat in the kit and, if necessary, the sheath protecting the bulb should be removed.

This is a list of the parts that make up the kit that are handled as spare parts:

New parts

C00091088 - LAMP SOCKET
C00143380 - THERMOSTAT(C.POST)DANFOSS 077B-6916 ROHS
C00170367 - LAMP 220/240V 15W E14
C00094754 - LIGHT DEFLECTION FOLIO(58*60*0.1)
C00032399 - TOGGLE SWITCH PROTECTION (21X15)
C00032395 - TOGGLE SWITCH 250V S.A1 (21X15)
C00264046 - THERMOSTAT BOX (CENTRE POST) - PW
